

DK9Y 04 (SFHCH S7) — Obtain and Test Specimens from Individuals

Overview

This standard covers obtaining specimens, testing some specimens in the work area, and forwarding some specimens for laboratory investigation.

Collection of blood specimens is not included.

Users of this standard will need to ensure that practice reflects up to date information and policies.

Dimension: HWB8 Biomedical investigation and intervention

Performance Criteria — What you do in your job

You must provide evidence to meet all the 15 Performance Criteria for this Unit. The Performance Criteria are grouped under headings to assist you with planning how best to meet these points.

Place the number of the piece of work where this Performance Criteria has been met in the evidence box after each criteria.

	Performance Criteria	Evidence Number where this criteria has been met
1	Work within your level of competence, responsibility and accountability for obtaining and testing specimens.	
2	Apply appropriate health and safety measure, standard precautions for infection prevention and control and personal protective equipment relevant to the procedure and environment.	
3	Check the individual's identity and gain valid consent and authorisation for the planned activity.	
4	Communicate effectively in the appropriate medium to meet the individual's needs and preferences.	
5	Ensure privacy and dignity at all times, taking into account the individuals ethnic and religious background which might influence certain aspects of collecting specimens.	
6	Check the required preparations have been completed and stop the procedure if the necessary preparations have not been followed by the individual or staff.	
7	Provide the necessary and appropriate container for the specimen to the individual.	
8	Obtain specimens from clients when they cannot do this themselves, and place them in the appropriate container.	
9	Ensure specimens are collected in the correct order where necessary.	

	Performance Criteria	Evidence Number where this criteria has been met
10	Label specimens correctly, attach the relevant documentation, place in the relevant biohazard bags, and put them in the correct place for storage, collection or transportation.	
11	Record any problems in obtaining the specimen to the appropriate member of the team without delay.	
12	When required, test specimens using the correct process for the investigation to be performed, and according to the specimen being tested.	
13	Report immediately any findings which are outside of normal ranges and which demand urgent attention in line with local policies, protocols and procedures.	
14	Reassure and inform the individual of the results of the tests according to their needs or pass this on to other staff members if this is beyond your role and responsibility.	
15	Maintain full, accurate and legible records of sample collection and testing and store in correct location in line with current legislation, guidelines, local policies and protocols.	

Knowledge and Understanding — Why and how you do what you do in your job

You must provide evidence of your knowledge and understanding to meet all the 16 knowledge points for this Unit. The knowledge points are grouped under headings to assist you with planning how best to meet them.

Place the number of the piece of work where each knowledge point has been met in the 'evidence number' box after each point.

	Knowledge and Understanding <i>You need to know and understand:</i>	Evidence Number where this knowledge point has been met
1	Your own level of competence, authority and specialist knowledge base in relation to obtaining and testing specimens from individuals.	
2	How to communicate effectively in the appropriate medium to meet the individual's needs and preferences.	
3	Why it is essential to check the identity of the individual, valid consent and authorisation for the planned activity.	
4	The importance of maintaining the individual's confidentiality, privacy and dignity.	
5	The importance of applying appropriate health and safety measures, standard precautions for infection prevention and control and personal protective equipment relevant to obtaining and testing specimens from individuals and the potential consequences of poor practice.	
6	The required preparation for individuals prior to the type of specimen collection within your work practice.	
7	The importance of giving clear explanations to individuals to enable them to collect their own specimens when appropriate.	

	Knowledge and Understanding <i>You need to know and understand:</i>	Evidence Number where this knowledge point has been met
8	The materials and equipment required for collecting the specimen and the types of specimens that you may obtain.	
9	The different types of container, transport media and request forms for specimens appropriate to the specimen and planned test procedure.	
10	The information that is required to ensure accurate labelling of specimens and the potential hazards and other consequences related to incorrect labelling or dispatch of specimens.	
11	The tests and investigations that may be carried out on the specimens you obtain.	
12	The implications the results of the tests will have on the individual.	
13	The importance of accurate record keeping.	
14	The importance of immediately reporting any findings which are outside of normal ranges and which demand urgent attention.	
15	The current national legislation, guidelines, organisational policies and protocols which affect your work practice.	
16	The policies and guidance that clarify your scope of practice, accountabilities and the working relationship between yourself and others.	

The candidate and assessor must only sign below when all Performance Criteria and knowledge points have been met.

Unit assessed as being complete
