
Overview

What this standard is about

This standard is about monitoring the transportation of supplies. It deals with collating and analysing information in regard to the transportation of supplies. It involves identifying any problems and providing results of analysis and making recommendations in regard to the transportation of supplies.

Who this standard is for

This standard is for supply chain practitioners. This could, for example be in purchasing, freight logistics operations or transport management roles.

[SQA Unit Code – DX6D 04] V1
