

[SQA Unit Code – DX7C 04] V1

SfL105 Specify the requirements for the distribution of supplies

Overview

What this standard is about

This standard is about specifying requirements for the distribution of supplies. It deals with obtaining information, confirming availability of resources and providing specifications for distribution requirements. It involves assessing all relevant factors, informing colleagues and ensuring specifications comply with requirements.

Who this standard is for

This standard is for supply chain practitioners. This could, for example be in purchasing, freight logistics operations or transport management roles.
