You need to know and understand:

Evidence of knowledge and understanding should be collected during observation of performance in the workplace. Where it cannot be collected by observing performance, other assessment methods should be used.

1. Tasks and activities for which you are responsible
2. How to carry out tasks and activities
3. Who to go to for further information and advice on specific tasks and activities
4. The importance of seeking further information or advice on how to do specific tasks and activities and the risks involved if you do not do this
5. What clothing, footwear and equipment is suitable and required by your organisation
6. Bio-security procedures on site and when entering and leaving the site
7. How contamination and cross-contamination occurs, and the possible effects on livestock
8. Standards of bio-security for the work area
9. Health and safety procedures regarding bio-security
10. Methods of working effectively with others
11. Methods of communication effectively
12. The reasons why effective communication is important

Evidence of performance may employ examples of the following assessment:

- observation
- written and oral questioning;
- evidence from company systems (e.g. Food Safety Management System)
- reviewing the outcomes of work
- checking any records of documents completed
- checking accounts of work that the candidate or others have written
