

## 3076 Monitor health, safety and environmental systems in food manufacture

**SQA Unit Code**

**F2P1 04**

**Level 3**

**SCQF Level 6**

**SCQF Credit value 6**

### Unit Summary

This unit is about monitoring health, safety or environmental systems within an organisation. You will need to implement systems for monitoring and maintaining health, safety and hygiene, staff working conditions and facilities within your area of responsibility, communicate relevant information to colleagues, contribute to the auditing of safety and environmental procedures.

You will also need to ensure timely corrective action where necessary and ensure that illness, incidents and accidents are promptly reported and recorded.

You will also follow monitoring and evaluation procedures, communicate your findings to colleagues and recognise the need to seek competent assistance.

In order to be assessed as competent you must demonstrate to your assessor that you can consistently perform to the requirements set out below. Your performance evidence must include at least one observation by your assessor.

You must be able to:	You need to show:
<p>1. Report on status of compliance</p> <p>This means you:</p> <p>Implement health, safety and environmental monitoring systems fully for all operations within your area of responsibility</p> <p>Monitor conditions to ensure health, safety and environmental system requirements are met</p>	<p>Evidence must be work-based, simulation alone is only allowed where shown in <b><i>bold italics</i></b></p> <p>Evidence of reporting on status of compliance in accordance with workplace procedures</p>
<p>2. Monitor completion of allocated work activities with due regard to risk assessments</p> <p>This means you:</p> <p>Undertake health, safety and environmental management audits of operations and take prompt corrective action when required</p>	<p>Evidence of monitoring completion of allocated work activities with due regard to risk assessments in accordance with workplace procedures</p>

<p>Report and record the outcomes of monitoring in accordance with organisational and statutory requirements</p>	
<p>3. Make recommendations to improve systems</p> <p>This means you:</p> <p>Make recommendations for improving health, safety and environmental management systems</p> <p>Disseminate the agreed improvements to the relevant people with information to ensure the improvements can be implemented</p>	<p>Evidence of making recommendations to improve systems in accordance with workplace procedures</p>

<p>You need to know and understand:</p> <p>Evidence of knowledge and understanding should be collected during observation of performance in the workplace. Where it cannot be collected by observing performance, other assessment methods should be used.</p>
