

PROFFI351 (SQA Unit Code - FE53 04) Improve process and quality control in a commercial environment

Overview

This standard addresses the competence required to improve process and quality control in a commercial environment in the furniture, furnishings and interiors industry. This involves:

- 1 identifying areas where improvements could be made to work processes and quality
- 2 suggesting improvements to work processes and quality
- 3 identifying potential developments elsewhere (troubleshooting)
- 4 working in ways which maintain your own and others' safety

There is also a scope statement which defines the coverage of this standard.

PROFFI351 (SQA Unit Code - FE53 04)

Improve process and quality control in a commercial environment

Performance criteria

Identify and suggest improvements in the workplace, concerning work processes and quality

You must be able to:

- P1 monitor and review existing quality control methods in the workplace
- P2 monitor and review existing work **procedures** and **work objectives**
- P3 identify possible developments in the system, in work processes and quality
- P4 specify and recommend potential developments to the existing work system
- P5 ensure that these recommendations can be realistically achieved using available **resources**
- P6 submit recommendations to the relevant **others** in the organisation
- P7 check that these developments will meet all current health and safety considerations

You must be able to:

Troubleshooting

- P8 collect information and feedback on current working practices and **procedures**
- P9 assess current working practices and **procedures** against agreed standards of performance
- P10 identify opportunities for improving current working practices and **procedures**
- P11 make realistic suggestions for improvements to working practices and **procedures**
- P12 show what benefits could be achieved from improvements
- P13 present suggestions for improvement in accordance with organisational **procedures**
- P14 take into consideration all current health and safety guidelines

PROFFI351 (SQA Unit Code - FE53 04)

Improve process and quality control in a commercial environment

Knowledge and understanding

You need to know and understand:

Identify and suggest improvements in the workplace, concerning work processes and quality

- K1 methods of monitoring quality control in the work operation
- K2 methods of monitoring work processes in the operation
- K3 other methods of monitoring quality and work processes
- K4 current standards of workplace performance
- K5 how to review the information gained against current standards of performance
