--	--

You need to know and understand:

Evidence of knowledge and understanding should be collected during observation of performance in the workplace. Where it cannot be collected by observing performance, other assessment methods should be used.

1. the relevant legal and regulatory requirements, health and safety, hygiene and environmental standards and what might happen if they are not met
2. common reasons for item damage during washing and drying,
3. how to minimise damage during washing and drying and what might happen if this is not done
4. the procedures for setting up, starting up, controlling and shutting down washing and drying machinery and why it is important to follow these procedures
5. how to recognise and deal with items that do not meet specification why it is important to recognise and set the correct washing and drying
6. parameters to the specification for the types of items to be washed and dried
7. why it is important to check that items have been correctly washed and dried how to isolate equipment and report for maintenance or replacement, and why it
8. is important to work within procedures
9. the limits of your own authority are and why it is important to work within them lines and methods of communication within your organisation
10. reporting and recording requirements and why it is important to carry these out correctly

Evidence of performance may employ examples of the following assessment:

- observation
- written and oral questioning;

- evidence from company systems (e.g. Food Safety Management System)
- reviewing the outcomes of work
- checking any records of documents completed
- checking accounts of work that the candidate or others have written
