

2105 Protect the vehicle and the load (Skills for Logistics DVG2)		
SQA Unit Code		H3NJ 04
Level 2	SCQF Level 5	Credit value 2

Unit Summary

What this standard is about

This standard is about checking a goods vehicle and its load at appropriate times during a journey. It covers the physical checks that a driver needs to make and the procedures and associated documentation that they may need to complete if damage or other problems are found. It requires drivers to be aware of factors that may affect the security of the vehicle and its load and the actions they can take to reduce risks.

Who this standard is for

This standard is relevant to drivers of goods vehicles and those who are responsible for goods vehicles within logistics organisations.

In order to be assessed as competent you must demonstrate to your assessor that you can consistently perform to the requirements set out below. Your performance evidence must include at least one observation by your assessor.

You must be able to:	You need to show:
<p>1. Protect the vehicle and the load</p> <p>This means you:</p> <p>Obtain information on the organisation's procedures and all relevant legal, safety and operating requirements relating to the protection of the vehicle and load</p> <p>Take appropriate action if you identify any problems in complying with the organisation's procedures</p> <p>Monitor the condition of the load at regular intervals</p> <p>Report any change in the condition of the load according to the organisations procedures</p> <p>Follow the organisations protection procedures in relation to the vehicle and the load in different</p>	<p>Evidence must be work-based, simulation alone is only allowed where shown in <i>bold italics</i></p> <p>Evidence of protecting the vehicle and the load in accordance with workplace procedures</p>

<p>locations</p> <p>Report any theft or damage to the vehicle or load, according to the organisations procedures</p> <p>Carry out vehicle security checks at appropriate times</p>	
--	--

You need to know and understand:

Evidence of knowledge and understanding should be collected during observation of performance in the workplace. Where it cannot be collected by observing performance, other assessment methods should be used.

1. Where to obtain information on legal, safety and operating requirements for the vehicle and load
2. The actions required if there are any problems in complying with the organisations procedures
3. How to identify damage or deterioration in the condition of the load
4. What the reporting procedures are if there is a change in the condition of the load
5. Methods for protecting different types of load
6. The type of problems that can occur with protecting the vehicle and load
7. What different risks are associated with protecting the vehicle and load at different locations

Evidence of performance may employ examples of the following assessment:

- observation
- written and oral questioning;
- evidence from company systems (e.g. Food Safety Management System)
- reviewing the outcomes of work
- checking any records of documents completed
- checking accounts of work that the candidate or others have written
