Course outline

Course title: National 5 Care

SCQF: level 5 (24 SCQF credit points)

Course code: C712 75

Mandatory Units

Care: Values and Principles (National 5) 6 SCQF credit points

Care: Human Development and Behaviour (National 5) 6 SCQF credit points

Care: Social Influences (National 5) 6 SCQF credit points

Course assessment 6 SCQF credit points

This Course includes six SCQF credit points to allow additional time for preparation for Course assessment. The Course assessment covers the added value of the Course. Further information on the Course assessment is provided in the Assessment section.

Recommended entry

Entry to this Course is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by the following or by equivalent qualifications and/or experience:

- ◆ National 4 Care Course or relevant component Units
- ◆ Literacy Unit (National 4)

In terms of prior learning and experience, relevant experiences and outcomes may also provide an appropriate basis for doing this Course.

Progression

This Course or its Units may provide progression to:

- ◆ other qualifications in Care or related areas
- ◆ further study, employment or training

Further details are provided in the Rationale section.

Equality and inclusion

This Course Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information, please refer to the *Course Support Notes*.

Rationale

All new and revised National Courses reflect Curriculum for Excellence values, purposes and principles. They offer flexibility, provide more time for learning, more focus on skills and applying learning, and scope for personalisation and choice.

In this Course, and its component Units, there will be an emphasis on skills development and the application of those skills. Assessment approaches will be proportionate, fit for purpose and will promote best practice, enabling learners to achieve the highest standards they can.

This Course provides learners with opportunities to continue to acquire and develop the attributes and capabilities of the four capacities as well as skills for learning, skills for life and skills for work.

All Courses provide opportunities for learners to develop breadth, challenge and application, but the focus and balance of the assessment will be appropriate for the subject area.

Relationship between the Course and Curriculum for Excellence values, purposes and principles

This Course meets Curriculum for Excellence values by enabling learners to understand and explain the way an individual is influenced by, and influences, the world in which they live.

Learners will engage in a range of tasks that will enable them to develop their understanding of individuals and society. They will recognise that each individual has a unique blend of abilities and needs, and will understand the qualities and skills required to sustain different types of relationships.

Learners will develop an understanding of the value base required in the care profession. They will have the opportunity to understand and explain influences on human development and behaviour. They will also gain an understanding of the social, physical, emotional, cognitive and cultural needs of people who use care services. This knowledge and these skills will be relevant for future experience in learning, life and work and will enhance the ability of learners to become effective contributors and responsible citizens

Learners will develop their thinking skills by applying knowledge from a range of topics from the social sciences to contemporary care practice. The insights gained from the Course will enable them to progress confidently onto further study or training.

Purpose and aims of the Course

The main purpose of this Course is to enable learners to understand why people use care services and to develop the knowledge and value base required for working in contemporary care practice in settings such as health care, social care and childcare. Learners will develop knowledge, understanding and attributes that will help them to make informed decisions to support the health and wellbeing of others.

Active learning and personalisation will be promoted by giving learners opportunities to investigate care issues and topics of their own choice. Many activities will involve collaborative learning as learners work with others to discuss and present their ideas.

The main aims of the Course are to enable the learner to:

- ◆ develop an understanding of the needs of individuals and an awareness of the care services that can meet these needs
- ◆ develop an understanding of the ways in which positive care practice is based on legislation, values, principles, knowledge and skills
- ◆ develop an awareness of the ways in which social influences can impact on people, and the relevance of this for care practice
- ◆ develop an understanding of explanations for human development and behaviour
- ◆ apply knowledge of psychological theories and sociological concepts to care issues and scenarios
- ◆ develop research and investigation skills to plan, organise, evaluate and present information

Information about typical learners who might do the Course

This Course will attract learners who have an interest in Care. In this Course, learners will build on the experiences and outcomes in health and wellbeing and other relevant curriculum areas. Life experience also provides a good foundation for learners who want to take this Course.

The Course is also suitable as a progression from the National 4 Care Course, Intermediate 1 Early Education and Childcare (Skills for Work) Course, Intermediate 1 Health Sector (Skills for Work) Course, Literacy Unit (National 4), Numeracy Unit (National 4) or equivalent qualifications.

The following skills will be developed in this Course: explaining, evaluating and presenting information; planning and task management skills; research and investigation skills and applying knowledge and understanding to care issues and scenarios.

Course structure and conditions of award

Course structure

This Course develops the skills of explaining, evaluating, presenting, planning, task management, research and investigating as well as applying knowledge and understanding.

Each Unit of the Course helps the learner develop skills and knowledge, which will be integrated and applied in the Course assessment.

Units are statements of standards for assessment and not programmes of learning and teaching. They can be delivered in a number of ways.

This Course has three mandatory Units.

Care: Values and Principles (National 5)

In this Unit, learners will investigate the health and social care provision available to meet the needs of people requiring care. Learners will explain needs and how methods of assessment are used to identify needs. Learners will gain an understanding of the key features of a positive care environment, and describe the role of legislation. They will look at the importance of values and principles in promoting positive care practice.

Care: Human Development and Behaviour (National 5)

In this Unit, learners will apply their knowledge and understanding of development and behaviour to individuals using care services. They will develop an understanding of how life experiences can affect people, and will be able to explain how a care worker can use psychological theories to understand the behaviour of individuals using care services.

Care: Social Influences (National 5)

In this Unit, learners will explain the ways in which social influences can impact on people, and the relevance this has for care practice. They will use sociological concepts to explain social influences and the impact these might have on people's life chances. Learners will also explain actions taken in society to improve the life chances of individuals using care services.

Flexibility within Units will offer the opportunity for personalisation, as the learner can choose which care issues and settings to investigate.

The Units are designed to stand alone or be taught in any sequence, although the theme of developing a strong value base and applying this knowledge and understanding to contemporary care practice runs through all the Units and provides an opportunity for integration of Units and assessment.

This Course has been constructed to facilitate a hierarchical arrangement with the National 4 Care Course and the Higher Care Course.

Conditions of award

To gain the award of the Course, the learner must pass all of the Units as well as the Course assessment. The required Units are shown in the Course outline

section. Course assessment will provide the basis for grading attainment in the Course award.

Skills, knowledge and understanding

Further information on the assessment of the skills, knowledge and understanding for the Course is given in the *Course Assessment Specification*. A broad overview of the mandatory subject skills, knowledge and understanding that will be assessed in the Course is given in this section. This covers:

- ◆ applying knowledge and understanding of needs and care services
- ◆ applying knowledge and understanding of human development and behaviour and psychological theories
- ◆ using sociological concepts to demonstrate knowledge and understanding of the ways in which social influences can impact on individuals
- ◆ investigating features of positive care practice
- ◆ planning and task management skills
- ◆ researching, investigating, evaluating and presenting information

Skills, knowledge and understanding to be included in the Course will be appropriate to the SCQF level of the Course. The SCQF level descriptors give further information on characteristics and expected performance at each SCQF level (www.sqa.org.uk/scqf).

Assessment

Information about assessment for the Course is included in the *Course Assessment Specification*, which provides full details including advice on how a learner's overall attainment for the Course will be determined.

Unit assessment

All Units are internally assessed against the requirements shown in the *Unit Specification*.

They can be assessed on an individual Unit basis or by using other approaches which combine the assessment for more than one Unit.

They will be assessed on a pass/fail basis within centres. SQA will provide rigorous external quality assurance, including external verification, to ensure assessment judgements are consistent and meet national standards.

The assessment of the Units in this Course will be as follows:

Care: Values and Principles (National 5)

The learner will be required to provide evidence to show they can explain needs and how methods of assessment are used to identify needs. They will describe features of positive care practice and explain the ways in which positive care environments meet needs.

Care: Human Development and Behaviour (National 5)

The learner will be required to provide evidence to show they can explain development at different stages of the life span and explain how a care worker could use psychological theories to understand the behaviour of individuals.

Care: Social Influences (National 5)

The learner will be required to provide evidence to show they can explain the social influences on individuals and how these impact on their life chances. Learners will explain actions taken in society to improve the life chances of individuals.

Course assessment

Courses from National 4 to Advanced Higher include assessment of [added value](#)¹. At National 5, Higher and Advanced Higher, the added value will be assessed in the Course assessment. The added value for the Course must address the key purposes and aims of the Course as defined in the Course Rationale. It will do this by addressing one or more of breadth, challenge or application.

¹ Jargon Buster can be found here: www.sqa.org.uk/sqa/58409.html

In this National 5 Care Course, added value will focus on:

- ◆ breadth
- ◆ application

The Course will be assessed through a [project](#)². Learners will investigate the needs of ~~individuals~~ [an individual](#) requiring care and the services that meet these needs. They will choose from a range of briefs provided by SQA and plan the project, respond to the brief and evaluate the project. Learners will draw on and apply skills and knowledge learned throughout the Course. The project will be sufficiently open and flexible to allow for personalisation and choice within a chosen care context.

² Jargon Buster can be found here: www.sqa.org.uk/sqa/58409.html

Development of skills for learning, skills for life and skills for work

It is expected that learners will develop broad, generic skills through this Course. The skills that learners will be expected to improve on and develop through the Course are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and are drawn from the main skills areas listed below. These must be built into the Course where there are appropriate opportunities.

1 Literacy

1.2 Writing

1.3 Listening and talking

3 Health and wellbeing

3.5 Relationships

4 Employability, enterprise and citizenship

4.6 Citizenship

5 Thinking skills

5.3 Applying

Amplification of these skills is given in SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work*. The level of these skills will be appropriate to the level of the Course. Further information on building in skills for learning, skills for life and skills for work for the Course is given in the *Course Support Notes*.
