Evidence Requirements for the Unit

Assessors should use their professional judgement, subject knowledge and experience, and understanding of their learners, to determine the most appropriate ways to generate evidence and the conditions and contexts in which they are used.

Evidence is required to show that the learner has met the Outcomes and Assessment Standards.

Assessment evidence can be drawn from a variety of sources such as texts, drawings, photographs, artefacts and models and presented in a variety of formats, including brief written responses to questions, participation in group tasks, presenting information to other groups, and routine digital presentations.

All of the evidence does not need to be from the one activity, but can be assembled from a variety of tasks and assessments carried out during the duration of the Course.

Evidence may be presented for individual Outcomes or gathered for the Unit or Course as a whole by combining assessment holistically in one single activity.

Exemplification of assessment will be provided in the *National Assessment Resource*. Advice and guidance on possible approaches to assessment is provided in the *Unit Support Notes*

Development of skills for learning, skills for life and skills for work

Further information on building in skills for learning, skills for life and skills for work is given in the *Unit Support Notes*.
