

Draft National Unit Specification

Unit title: Art and Design (Design): Design Studies (Advanced Higher)

SCQF: level 7 (8 SCQF credit points)

Unit code: to be advised

Unit outline

The general aim of this Unit is to enable learners to research and investigate a personally selected area of design, and to develop and apply in-depth knowledge and critical understanding of design work and practice to their own creative work. The Unit provides opportunities for learners to independently research design work and practice, to analyse and synthesise information, and to form and communicate substantiated judgments when evaluating the contexts that informed the work and approaches of selected designers.

Learners who complete this Unit will be able to:

- 1 Research and investigate an area of personal interest in design

This Unit is a mandatory Unit of the Advanced Higher Art and Design (Design) Course and is also available as a freestanding Unit. The Unit Specification should be read in conjunction with the *Unit Support Notes*, which provide advice and guidance on delivery, assessment approaches and development of skills for learning, skills for life and skills for work. Exemplification of the standards in this Unit is given in the *National Assessment Resource*.

The *Course Assessment Specification* for the Advanced Higher Art and Design (Design) Course gives further mandatory information on Course coverage for learners taking this Unit as part of the Advanced Higher Art and Design (Design) Course.

Recommended entry

Entry to this Unit is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by one or more of the following or equivalent qualifications and/or experience:

- ◆ Higher Art and Design Course or relevant component Units

Equality and inclusion

This Unit Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information, please refer to the *Unit Support Notes*.

Standards

Outcomes and assessment standards

Outcome 1

The learner will:

- 1 Research and investigate an area of personal interest in design by:**
 - 1.1 Selecting and explaining the relevance of the selected area of design of personal interest
 - 1.2 Identifying designers and producing an action plan and methods for carrying out the research and investigation
 - 1.3 Analysing and critically evaluating examples of design work and practice
 - 1.4 Forming and presenting substantiated judgements about designers' use of materials, techniques and/or technology and the contexts and influences on their work and practice

Evidence Requirements for the Unit

Assessors should use their professional judgement, subject knowledge and experience, and understanding of their learners, to determine the most appropriate ways to generate evidence and the conditions and contexts in which they are used.

Evidence will include a combination of written and/or recorded evidence and supporting visuals.

Evidence may be presented for individual Outcomes or it may be gathered for the Unit as a whole by combining assessment holistically in one single activity. If the latter approach is used, it must be clear how the evidence covers each Outcome.

In this Unit, learners will be required to provide evidence of:

- ◆ using higher-order thinking skills and complex analytical and evaluative skills when planning and carrying out the research and investigation
- ◆ synthesising information from a variety of sources
- ◆ presenting clear, relevant and accurate factual information and substantiated personal opinions about the selected research, using specialist vocabulary and coherent argument
- ◆ independent and self-directed working

Exemplification of assessment is provided in the *National Assessment Resource*. Advice and guidance on possible approaches to assessment is provided in the *Unit Support Notes*.

Development of skills for learning, skills for life and skills for work

It is expected that learners will develop broad, generic skills through this Unit. The skills that learners will be expected to improve on and develop through the Unit are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and drawn from the main skills areas listed below. These must be built into the Unit where there are appropriate opportunities.

1 Literacy

1.1 Reading

3 Health and wellbeing

3.1 Personal learning

5 Thinking skills

5.4 Analysing and evaluating

Amplification of these is given in SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work*. The level of these skills should be at the same SCQF level as the Unit and be consistent with the SCQF level descriptor. Further information on building in skills for learning, skills for life and skills for work is given in the *Unit Support Notes*.
