

Draft National Unit Specification

Unit title: Health and Food Technology: Food Science, Production and Manufacturing (Advanced Higher)

SCQF: level 7 (16 SCQF credit points)

Unit code: to be advised

Unit outline

This Unit allows learners to develop detailed knowledge and understanding of the underpinning science and functional properties of food and their uses in creating food prototypes. Learners will research, analyse and evaluate food products in terms of food science and the production, manufacturing and marketing processes.

Learners who complete this Unit will be able to:

- 1 Investigate the application of food science in commercial manufacturing processes
- 2 Apply knowledge and understanding to develop food products to meet current food trends

This Unit is a mandatory Unit of the Advanced Higher Health and Food Technology Course and is also available as a free-standing Unit. The Unit Specification should be read in conjunction with the *Unit Support Notes*, which provide advice and guidance on delivery, assessment approaches and development of skills for learning, skills for life and skills for work. Exemplification of the standards in this Unit is given in the *National Assessment Resource*.

The *Course Assessment Specification* for the Advanced Higher Health and Food Technology Course gives further mandatory information on Course coverage for learners taking this Unit as part of the Advanced Higher Health and Food Technology Course.

Recommended entry

Entry to this Unit is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by one or more of the following or equivalent qualifications and/or experience:

- ◆ Higher Health and Food Technology Course or relevant component Units

Equality and inclusion

This Unit Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information please refer to the *Unit Support Notes*.

Draft

Standards

Outcomes and assessment standards

Outcome 1

The learner will:

- 1 Investigate the application of food science in commercial manufacturing processes by:**
 - 1.1 Researching stages in commercial food manufacturing processes
 - 1.2 Analysing the functional properties of ingredients in relation to commercial food manufacturing
 - 1.3 Analysing how functional properties of ingredients impact on consumer acceptability of foods

Outcome 2

The learner will:

- 2 Apply knowledge and understanding to develop food products to meet current food trends by:**
 - 2.1 Investigating market research methods used in the food sector
 - 2.2 Analysing trends in food purchasing and consumption
 - 2.3 Devising a specification for a food product for an identified trend
 - 2.4 Evaluating consumer acceptability of the food product specification

Evidence Requirements for the Unit

Assessors should use their professional judgement, subject knowledge and experience, and understanding of their learners, to determine the most appropriate ways to generate evidence and the conditions and contexts in which they are used.

Evidence may be presented for individual Outcomes or it may be gathered for the Unit as a whole by combining assessment in a single event. If the latter approach is used, it must be clear how the evidence covers each Outcome, and additional evidence must be provided for any Assessment Standard which has not been assessed.

Exemplification of assessment is provided in the *National Assessment Resource*. Advice and guidance on possible approaches to assessment is provided in the *Unit Support Notes*.

Development of skills for learning, skills for life and skills for work

It is expected that learners will develop broad, generic skills through this Unit. The skills that learners will be expected to improve on and develop through the Unit are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and drawn from the main skills areas listed below. These must be built into the Unit where there are appropriate opportunities.

2 Numeracy

2.3 Information handling

5 Thinking skills

5.3 Applying

5.4 Analysing and evaluating

Amplification of these is given in SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work*. The level of these skills should be at the same SCQF level as the Unit and be consistent with the SCQF level descriptor. Further information on building in skills for learning, skills for life and skills for work is given in the *Unit Support Notes*.
