

Draft National Unit Specification

Unit title: Economics of the Market (Higher)

SCQF: level 6 (6 SCQF credit points)

Unit code: to be advised

Unit outline

The general aim of this Unit is to enable learners to analyse the economic problem of unlimited wants in relation to limited resources and how this impacts on the daily choices made by individuals, firms and governments. Learners will analyse how demand and supply drives resource allocation and economic production. This provides learners with an in-depth understanding of the operation of markets.

Learners who complete this Unit will be able to:

- 1 Apply knowledge and understanding of the basic economic problem and opportunity cost to choices made by individuals, firms and governments
- 2 Analyse market economics in relation to demand, supply, production and costs

This Unit is a mandatory Unit of the Higher Economics Course and is also available as a free-standing Unit. The Unit Specification should be read in conjunction with the *Unit Support Notes* which provide advice and guidance on delivery, assessment approaches and development of skills for learning, skills for life and skills for work. Exemplification of the standards in this Unit is given in the *National Assessment Resource*.

The Course Assessment Specification for the Higher Economics Course gives further mandatory information on Course coverage for learners taking this Unit as part of the Higher Economics Course.

Recommended entry

Entry to this Unit is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by one or more of the following or equivalent qualifications and/or experience:

- ◆ Economics (National 5) Course or relevant component Units
- ◆ Higher Business Management Course

Examples of other such relevant prior learning and experiences would involve an interest in the economy and/or current affairs.

Equality and inclusion

This Unit Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information please refer to the *Unit Support Notes*.

Draft

Standards

Outcomes and assessment standards

Outcome 1

The learner will:

- 1 Apply knowledge and understanding of the basic economic problem and opportunity cost to choices made by individuals, firms and governments by:**
 - 1.1 Explaining the basic economic problem and its impact on choices made by individuals, firms and governments
 - 1.2 Describing the concept of opportunity cost using a production possibility curve

Outcome 2

The learner will:

- 2 Analyse market economics in relation to demand, supply, production and costs by:**
 - 2.1 Using diagrams to explain how changes in demand and supply affect equilibrium price and quantity traded
 - 2.2 Describing factors affecting price elasticity of demand and analysing how changes in these factors affect total revenue
 - 2.3 Describing how specialisation can affect production costs and productivity
 - 2.4 Comparing short-run and long-run average total cost curves

Evidence Requirements for the Unit

Assessors should use their professional judgement, subject knowledge and experience, and understanding of their learners, to determine the most appropriate ways to generate evidence and the conditions and contexts in which they are used.

Evidence can be drawn from a variety of sources and presented in a variety of formats including short written responses and/or recorded oral evidence. Learners should use appropriate economic terminology at all times in their responses and include, where appropriate, the use of relevant examples.

Evidence may be presented for individual Outcomes or it may be gathered for the Unit as a whole through integrating assessment holistically in one single activity. If the latter approach is used, it must be clear how the evidence covers each Outcome.

Exemplification of assessment will be provided in the *National Assessment Resource*. Advice and guidance on possible approaches to assessment is provided in the *Unit Support Notes*.

Development of skills for learning, skills for life and skills for work

(Note: The information given below reflects the initial thinking on significant opportunities for development of skills for learning, skills for life and skills for work. These may be subject to change as the development process progresses.)

It is expected that learners will develop broad, generic skills through this Unit. The skills that learners will be expected to improve on and develop through the Unit are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and drawn from the main skills areas listed below. These must be built into the Unit where there are appropriate opportunities.

1 Literacy

1.2 Writing

2 Numeracy

2.3 Information handling

5 Thinking skills

5.3 Applying

5.4 Analysis and evaluating

Amplification of these is given in SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work*. The level of these skills should be at the same SCQF level of the Unit and be consistent with the SCQF level descriptor. Further information on building in skills for learning, skills for life and skills for work is given in the *Unit Support Notes*.
