

Draft National Unit Specification

Unit title: 2D Graphic Communication (National 5)

SCQF: level 5 (9 SCQF credit points)

Unit code: to be advised

Unit outline

The general aim of this Unit is to develop the learner's skills and creativity in producing and interpreting 2D graphics. It will enable the learner to initiate, develop and communicate ideas and solutions, using graphic techniques in simple and familiar contexts with some complex features.

Learners will develop skills in both manual and electronic graphic communication techniques. They will acquire knowledge and understanding of terms and techniques in CADD (computer-aided drawing and design), CAG (computer-aided graphics) and DTP (desktop publishing). They will learn how graphic communication technologies impact on our environment and society. The Unit also develops transferable skills in creativity and problem solving in a graphic communication context.

Learners who complete this Unit will be able to:

- 1 Produce and interpret 2D sketches and drawings
- 2 Produce preliminary 2D designs and illustrations for single-page promotional displays
- 3 Create 2D promotional graphic layouts

This Unit is a mandatory Unit of the Graphic Communication (National 5) Course and is also available as a free-standing Unit. The Unit Specification should be read in conjunction with the *Unit Support Notes* which provides advice and guidance on delivery, assessment approaches and development of skills for learning, skills for life and skills for work. Exemplification of the standards in this Unit is given in the *National Assessment Resource*.

Recommended entry

Entry to this Unit is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by one or more of the following or equivalent qualifications and/or experience:

- ◆ Graphic Communication (National 4) Course or relevant component Units

In terms of prior learning and experience, relevant experiences and outcomes may also provide an appropriate basis for doing this Unit. Further information on relevant experiences and outcomes will be given in the *Unit Support Notes*.

Equality and inclusion

This Unit Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information please refer to the *Unit Support Notes*.

Standards

Outcomes and assessment standards

Outcome 1

The learner will:

1 Produce and interpret 2D sketches and drawings by:

- 1.1 Producing well-proportioned orthographic sketches of very good line quality of everyday objects and/or geometric forms
- 1.2 Producing orthographic drawings and details of everyday objects, buildings, structures and/or geometric forms to within an accuracy of 1 mm
- 1.3 Extracting information from given drawings to inform new drawing work
- 1.4 Identifying and applying appropriate drawing standards and conventions where these apply; including third angle projection, dimensioning, line types and the use of scale
- 1.5 Explaining basic CADD commands, techniques and practice

Geometric forms will be based on complete and partial prisms, cylinders, pyramids and cones. Everyday objects, buildings and structures will be based on combinations and intersections of complete and partial prisms, cylinders, pyramids and cones.

Outcome 2

The learner will:

2 Produce preliminary 2D colour designs and illustrations for single-page promotional displays by:

- 2.1 Illustrating 2D sketches or drawings of everyday objects to convey surface texture, tonal change and colour
- 2.2 Planning and justifying the choice of colours, layout and presentation techniques in promotional graphic displays
- 2.3 Explaining aspects of colour theory including: primary, secondary and tertiary colours; tints and shades; warm and cool colours; advancing and receding; creating contrast, harmony and unity through the use of colour in promotional and marketing contexts; and moods created by the main colour groups
- 2.4 Planning the design and justifying the choice of informational graphic to suit a given scenario
- 2.5 Identifying the design principles and elements used to create promotional layouts and displays

Everyday objects, buildings and structures will be based on combinations and intersections of complete and partial prisms, cylinders, pyramids and cones.

Outcome 3

The learner will:

3 Create 2D promotional graphic layouts by:

- 3.1 Producing single-page displays or layouts that have significant visual impact and incorporate a main feature, a backdrop and text including heading/title and extended text; consistent and effective use of contrast, harmony, alignment, dominance, unity and depth are required; one DTP feature from: cropping, text wrap, flow text along a path, bleed, transparency or drop shadow must be used
- 3.2 Producing informational graphics that transmit statistical information clearly and concisely and have visual impact
- 3.3 Explaining basic DTP terms used in the design and production of promotional and informational graphics
- 3.4 Explaining the impact of graphic communication technologies on our environment and society

Evidence Requirements for the Unit

Assessors should use their professional judgement, subject knowledge and experience, and understanding of their learners, to determine the most appropriate ways to generate evidence and the conditions and contexts in which they are used.

In this Unit, Evidence Requirements are as follows:

Evidence may be a combination of written, oral and graphical.

In general, Outcomes may be met using either manual graphics techniques or electronic techniques, or a combination of both manual and electronic. When an Outcome or Assessment Standard specifically refers to a task that can only be carried out using manual techniques or electronic techniques, then those must be used.

Evidence may be presented for individual Outcomes or it may be gathered for the Unit as a whole through combining assessment holistically in one single activity. If the latter approach is used, it must be clear how the evidence covers each Outcome.

For this Unit, learners will be required to provide evidence of:

- ◆ skills in 2D graphics including drawing, sketching and illustration:
 - everyday objects/geometric shapes and forms
 - buildings/structures
 - dimensioned components
 - assemblies (minimum three parts)
 - related orthographic views (minimum of two)
 - surface developments
 - true shapes
 - tonal and rendering skills on flat and curved surfaces to convey surface texture and represent different materials
- ◆ skills in creating 2D promotional graphics and informational graphics
- ◆ knowledge and understanding of appropriate drawing standards and conventions
- ◆ knowledge and understanding of techniques and terminology involved in creating graphic displays

- ◆ knowledge and understanding of how graphic communication technologies impact on our society and the environment
- ◆ knowledge and understanding of CADD /DTP techniques and terminology

Exemplification of assessment will be provided in the *National Assessment Resource*. Advice and guidance on possible approaches to assessment is provided in the *Unit Support Notes*.

Draft

Development of skills for learning, skills for life and skills for work

It is expected that learners will develop broad, generic skills through this Unit. The skills that learners will be expected to improve on and develop through the Unit are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and drawn from the main skills areas listed below. These must be built into the Unit where there are appropriate opportunities.

2 Numeracy

- 2.2 Money, time and measurement
- 2.3 Information handling

4 Employability, enterprise and citizenship

- 4.2 Information and communication technology (ICT)

5 Thinking skills

- 5.3 Applying
- 5.4 Analysing and evaluating
- 5.5 Creating

Amplification of these is given in SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work*. The level of these skills should be at the same SCQF level of the Unit and be consistent with the SCQF level descriptor. Further information on building in skills for learning, skills for life and skills for work is given in the *Unit Support Notes*.
