Section 2: Comments on assessment

Assessment approaches

Most centres used published assessments. Some centres appropriately adapted assessments from published unit assessment support packages.

Assessment judgements

Centre judgements were generally in line with accepted standards. Where appropriate, supportive comments were provided.

03

Section 3: General comments

Centres showed a good understanding of the assessment standards. When adapting or creating assessments, care should be taken when choosing a written or archaeological source that the source provides adequate scope for achieving standards. Note that comparison prompts ask for **two** comments about **single** similarities/differences, not for two separate similarities/differences.
