

# SCQF NUMERACY

We use numbers every day in lots of ways without knowing we are using numeracy:

paying for shopping

using time

weighing yourself

using bus timetables

**Why not get a certificate to show your numeracy skills?**

## Numeracy - Graphical Information

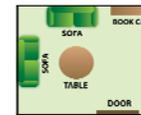

**Some of the things you will learn are how to:-**

read a simple bus timetable and make one of your own

understand a very easy map and to add items onto it

make a plan up of your room

find out the time of a TV programme.

As soon as you feel happy with what you have learned your tutor may ask you some questions or watch you using a timetable or a map, so that they can see that you have remembered all the things you have learned.

**You don't have to sit a test**

You will learn lots of new ways to use numbers in your everyday life – and hopefully have fun while you are learning.
