

SCQF NUMERACY

We use numbers every day in lots of ways without knowing we are using numeracy:

paying for shopping

using time

weighing yourself

87			
0823	1623	1653	1723
0839	1629	1659	1729
0834	1634	1704	1734
0841	1641	1711	1741
0847	1647	1717	1747

using bus timetables

Why not get a certificate to show your numeracy skills?

Numeracy - Measuring

Some of the things you will learn about measuring will help with:-

how to find the size of a centimetre, a metre and a kilogram

how to find out how tall and how heavy an object is

how to find out how hot or cold the room is

how to work out the correct size of curtains or furniture to buy

As soon as you feel happy with what you have learned your tutor may ask you some questions or watch you using a tape measure or thermometer, so that they can see that you have remembered all the things you have learned.

You don't have to sit a test

You will learn lots of new ways to use numbers in your everyday life – and hopefully have fun while you are learning.
