About this guide

This guide provides some practical examples of how to assess your candidates for the **SVQ in Providing Financial Services at level 3**. You may be able to think of other ways of assessing your candidates and recording your decisions about their competence.

Using assessments based on these examples does not guarantee successful verification — it is still your responsibility to ensure that internal quality assurance procedures are followed.

Introduction

This introduction provides a brief overview of SVQs and how they are assessed in the workplace. If you are already familiar with the concept of SVQs, you may wish to go to the next section.

About SVQs

Scottish Vocational Qualifications (SVQs) are work-based qualifications which set the level of occupational competence for each sector of the economy. The qualifications have been designed by standards-setting bodies made up of experienced practitioners who represent employers, professional bodies, trade unions, education and voluntary organisations.

Each standards-setting body is responsible for developing national standards which define *what* employees (or potential employees) must be able to do, *how well*, and *in what circumstances*, to show that they are competent in their work.

Each SVQ which a standards-setting body develops has to fit into a broad framework which allows qualifications in the UK and throughout Europe to be compared. SVQs are specified at five levels which reflect the various technical and supervisory skills knowledge and experience, which employees should have as they progress in their industry.

Explanation of levels

- Level 1** Defines competent performance in a range of activities which are largely routine and predictable.
- Level 2** Specifies that competent performance must be shown in a broader range of work activities which are less routine and predictable. The employee will have more autonomy and responsibility, and may have to work as part of a team.
- Level 3** Specifies that competent performance must involve the employee in carrying out a broad range of varied work activities, most of which are complex and non-routine. There is considerable autonomy and responsibility, including the possibility of controlling or guiding others.
- Level 4** Specifies competence as complex technical or professional work activities which require a substantial degree of personal autonomy or responsibility. Managing staff and other resources is often involved.
- Level 5** Specifies competent performance as involving the employee in carrying out a significant range of activities in a wide variety of situations which are often unpredictable. Substantial responsibility and autonomy is involved in the work, which requires decision-making in the allocation of resources and the work of others. This will require complex skills such as analysis, design and evaluation.

How are standards defined in SVQs?

All SVQs consist of standards which can be broken down into various parts.

Units define the broad functions carried out in the sector. These **Units** describe the activities which which employees have to perform, and will require candidates to demonstrate certain skills, behaviours, knowledge and understanding.

The quality of performance in what people must be able to do — how well they have to perform — is described by **Performance Criteria**. These may also be called **statements of competence** or **what candidates should do**.

The section on **behaviours** describes how a candidate should **act** or **conduct** themselves during their performance.

The section on **knowledge and understanding** says what candidates must know and understand, and how this knowledge applies to their jobs.

You may, however, find that information on the context, nature and amount of evidence which is required to prove competence (which used to be given in Range Statements and Evidence Requirements) is now defined in the **assessment guidance** for the qualification. Assessment guidance is drawn up by the awarding body and is packaged along with the standards to form the SVQ.

Who is involved in SVQs?

There are several roles:

- ◆ **the candidate:** the person who wants to achieve the SVQ (eg an employee)
- ◆ **the assessor*:** the person who assesses the candidates and decides if they are competent (eg supervisor)
- ◆ **the internal verifier*:** an individual nominated by the centre (eg a company) who ensures that assessors apply the standards uniformly and consistently (eg supervisor's line manager)
- ◆ **the external verifier*:** an individual appointed by SQA who ensures that standards are being applied uniformly and consistently across all centres offering the SVQ

*Assessors and verifiers in centres will be asked by SQA to prove they have the appropriate occupational competence to assess and verify the SVQ. Occupational competence has been defined by the standards-setting body in the assessment strategy for this SVQ — see SQA's website: www.sqa.org.uk

Assessors and verifiers are also expected to obtain an appropriate qualification in assessment and verification — this can be the Assessor/Verifier Units (the national standards for assessment and verification), or an alternative qualification which SQA also recognises.

The steps involved in assessing a candidate for an SVQ

In deciding whether a candidate should get an SVQ, you will go through these stages:

- ◆ planning for assessment
- ◆ generating and collecting evidence of the candidate's competence in the Units
- ◆ judging the evidence of the candidate's ability and making an assessment decision based on the evidence
- ◆ recording the assessment decision and the candidate's achievement

1 The SVQ in Providing Financial Services

The **SVQ in Providing Financial Services at level 3** has been developed by the **Financial Services Skills Council (FSSC)** and is intended for people working within the Financial Services Sector. Examples might include company personnel working in claims, sales, insurance, savings and investment. They will require skills and knowledge in the regulations governing the Financial Services Sector, rules and regulations, products and services, company guidelines, risk, underwriting, etc

The SVQ is designed to be assessed in the workplace, or in conditions of the workplace. Examples of the settings or centres in which the SVQ is likely to be delivered include: Banks, Building Societies, Insurance or Investment Companies. Partnership providers may also be formed between employers and colleges/training providers.

Structure of the SVQs

This section lists the Units which form the SVQ in Providing Financial Services at level 3. Candidates must complete a total of **seven** Units which must include — **three** mandatory Units — plus at least **two** Units from one of the restricted optional groups 1–10 and a further **two** Units from the additional options group 11.

An assessment strategy for the SVQ

As part of its review of the SVQ, the standards-setting body **Financial Services Skills Council (FSSC)** has developed an assessment strategy which defines a range of requirements:

- ◆ the occupational expertise of assessors and verifiers
- ◆ a definition of simulation
- ◆ definition of the workplace
- ◆ information on a model of independent assessment or external quality control

The relevant parts of the assessment strategy are published on SQA's website (www.sqa.org.uk), and both SQA and centres must comply with these requirements.

Why would people be interested in the SVQ?

People will take SVQs for a variety of reasons: to gain promotion, to prove their job competence, or for personal development. There will be other reasons too. One of the first things to do is to find out why your candidates want to do the SVQ, and to advise them of the appropriateness of the qualification. If anyone is acting as a coach or mentor to your candidates, they might help you to do this.

How do candidates begin?

Choosing the SVQ

You should make sure that candidates get guidance before starting out on an SVQ — they need advice to ensure that their existing job remit, skills, experience, and their plans for progression, are matched to the SVQ selected. It does not have to be you as the assessor, who carried out the matching process, but whoever has responsibility for this should ensure that the assessment opportunities available to the candidate are also considered.

Example

After successfully completing his temporary contract with an insurance company, Jamie Stevens is offered a full time position in the Home Insurance Department. He hopes to develop himself further within this role.

Company policy states that all employees must achieve some type of formal qualification. Since Jamie stresses he does not want to go to college, he wonders if there is another way to achieve this. The Training and Development Officer advises that Jamie should consider an SVQ as he could gain a qualification while carrying out his job. Jamie likes the idea but needs to know more about how it works.

An assessor from an approved training company explains that Jamie will need to demonstrate job competency over a period of time. This will be done by presenting different types of evidence in the form of a portfolio.

The assessor explains that (where possible) an integrated approach to assessment will be used, ie evidence demonstrating competence in one Unit can be used to match Evidence Requirements for another Unit(s).

In order to ensure Jamie chooses the right qualification, the assessor matches Jamie's skills, knowledge and current job role against the standards for the SVQ in Providing Financial Services at level 3. The Insurance Option is the most suitable route for him to take, as he can easily present sufficient evidence to achieve this.

At this point time Jamie has opted to start with the Unit, *Evaluate Insurance Products and Services*. He will select a further three Units at a later date.

On completion of the above process, the Training and Development Officer will draw up a Personal Development Plan for Jamie.

2 Preparing to assess the SVQ

This section offers practical advice on how to begin to go about assessing your candidates for the SVQ. This advice is offered as examples of good practice — you may develop your own approaches to assessing your candidates which also work well.

Your role and your candidate's role

Assessing the SVQ will involve several stages. Both you and the candidate should be clear on your roles in the assessment process before you begin.

Your role

- ◆ ensure candidates understand what is to be assessed and how it is to be assessed
- ◆ ensure the conditions and resources required for assessment are available
- ◆ help candidates to identify and gather evidence
- ◆ observe and record candidates carrying out the activities described in the standards — records should say what has been observed, how it was carried out, and what it demonstrates
- ◆ assess products of the candidates' own work
- ◆ question candidates and record results
- ◆ help candidates to present evidence
- ◆ authenticate the evidence candidates provide
- ◆ judge evidence and make assessment decisions
- ◆ identify gaps or shortfalls in candidates' competence
- ◆ provide feedback to candidates throughout the assessment process
- ◆ record achievement

Candidates' role

- ◆ prepare for assessment — become familiar with the standards, what is to be assessed and how it is to be assessed
- ◆ help to identify sources of evidence and how these could be assessed
- ◆ carry out activities, and/or produce products of own work, and/or answer questions
- ◆ gather and present evidence
- ◆ receive and act on feedback from the assessor

Planning

In planning for assessment, you will find it helpful to meet with your candidate and plan what is to be assessed, in what way, and when and where the assessment is to take place. This discussion can be confirmed in the form of an agreed assessment plan between you and your candidate.

You should treat assessment plans as working documents — they can be updated and changed as you review progress with your candidate.

As you are planning assessment, don't forget to make the most of opportunities to *integrate* assessment. This means planning to assess an activity which draws on the contents of different Units or Elements. It can be a practical and cost-effective way of assessing your candidate's competence.

If you are a new assessor working towards your A/V Units (the national standards in assessment and verification) you will need copies of completed assessment plans as part of your evidence.

To help you plan for assessment, we have produced an integrated assessment plan which covers the following Units:

- ◆ Evaluate Insurance Products and Services
- ◆ Develop Yourself to Improve and Maintain Workplace Competence in a Financial Services Environment

You will notice that we have included spaces to enter dates when the assessment plan has been reviewed. Any gaps identified during these reviews should be discussed with your candidates and noted for action in the assessment plan.

Selecting methods of assessment

The methods of assessment you use should be valid, reliable and practicable.

- ◆ By *valid* we mean that the assessment method should be appropriate to the standards
- ◆ By *reliable* we mean that the assessment method should ensure consistent results when used with different candidates, different assessors and on different occasions
- ◆ By *practicable* we mean that the method ensures that the assessment makes best use of available resources, equipment and time

Before you assess a candidate, you must make sure that the methods of assessment you have chosen to use, along with any assessment materials (such as questions and sample answers) have been agreed within your centre through its system of internal quality assurance. This system is often called *internal verification* — its purpose is to help to ensure that assessment methods are valid, reliable and practicable.

There are both benefits and challenges when you are assessing SVQs in the workplace, or in conditions in the workplace. When you select methods of assessment, you should try to offer the candidate the benefits of workplace assessment and minimise any potential difficulties.

The benefits might be:

- ◆ Candidates can be assessed in the workplace — cost and time involved can be minimised
- ◆ Good rapport/relationships can be built between assessor and candidates
- ◆ Assessment can progress at the candidates' own pace
- ◆ Flexibility of planning assessment to fit the needs of those involved in the process
- ◆ No formal assessment necessary as credit is given on performance
- ◆ Familiarity of work environment and tasks to be carried out
- ◆ Support of other experienced staff
- ◆ Promotes confidence and loyalty
- ◆ Useful part of job training and development

The challenges might be:

- ◆ Pressures of work
- ◆ Confidentiality issues
- ◆ Interference/disruptions from surroundings
- ◆ Lack of opportunity to gather appropriate evidence
- ◆ Lack of privacy

- ◆ Time constraints
- ◆ Working unsocial hours
- ◆ Sufficiency of access for assessors
- ◆ Organising assistance from others involved in the assessment process

Example

You might agree with a candidate working in an Insurance Company who has to demonstrate how they deal with a situation where they have to inform a colleague that they are unable to fulfill their commitment to them, this will be carried out by **observation** as and when such a situation arises. If you are an assessor who is working alongside the candidate you should be well placed to observe the candidate's performance, perhaps using a prepared checklist, and to question the candidate about the situation afterwards.

Methods of assessment

Assessment may involve a range of assessment methods. For SVQs, some of the most commonly used methods are observation, product evidence, and questioning.

Observation

Observation by an assessor is considered to be the most valid and reliable method of assessment. It can be organised in a variety of ways:

- ◆ working alongside the candidate
- ◆ arranging to visit when naturally-occurring activities are carried out by the candidate
- ◆ arranging for activities to take place

Observation by the assessor can often be supplemented by other types of assessment methods such as questioning. For example, it may be appropriate to ask oral questions of candidates as they carry out naturally-occurring activities.

Example 1

Observation of the candidate applying the process and procedure for creating new and/or updating investors records.

Example 2

Observation of a candidate interacting face-to-face with a customer in order to identify ways of meeting their saving needs for retirement. Here candidates' communication skills and the ability to gather appropriate information can be evidenced.

Product evidence

As candidates work towards achieving the SVQ, they will produce evidence in the form of products of their work. The nature of this evidence can vary widely depending on what the candidate's job entails, but examples of product evidence include:

- ◆ Customer records prepared by the candidate
- ◆ Reports or other written communication prepared by the candidate — recommendations for improving products and services.

Questioning

Candidates have to show that they can meet the knowledge specifications for the SVQs. For this SVQ, knowledge and understanding is specified for each Unit. Much of a candidate's knowledge and understanding will be apparent from what they do or produce as part of their work, but this will not always be the case, and questioning can be a useful way of confirming what candidates know and understand.

Questions can be asked in a variety of forms, such as oral questions, short answer written questions, and multiple choice.

You should be careful that the method of questioning does not go beyond the competence required for the SVQ and become a barrier to fair assessment. For example, some candidates will feel more comfortable with oral questions than written.

Note

Due to the practical nature of the Financial Services Qualification, it is suggested that **oral** (as opposed to written) questions should be used to test candidates' knowledge and understanding.

Q What procedures are in place to keep information confidential and secure?

A Compliance with Data Protection Act ensures data is only given to those who are authorised to receive it. Hard copy data is securely locked away and access restricted to authorised personnel. Data held on the computer can only be accessed by providing correct user ID and password.

Q What is the difference between giving financial advice and providing facts and figures?

A By providing financial advice you are giving your opinion on what is best for the customer.

Providing facts and figures will give information to the customer without guiding them in any way.

Other methods of assessment

These methods, like questioning, are often used for authentication. See section 3 for more about authenticating candidates' evidence.

Personal statements

You might sometimes find it helpful to ask a candidate to give an account of why they did an activity in a certain way or how they produced a product of their work. This is often referred to as a *personal statement*. You should take care to ensure that by asking candidates to produce such statements, you are not asking them to demonstrate competence beyond what is required by the standards. You should also be selective in the use of personal statements, and make sure they have not been produced as a substitute to a more valid, reliable and practical method of assessment.

Witness testimony

For practical reasons, you may not be able to observe all the activities carried out by your candidates, but might feel that other people may be able to provide a statement on what your candidates have been doing or producing as part of their work. Statements of this kind are called *witness testimony*, and are often used to support other evidence produced by candidates. If witness testimony is used, you should, ideally, identify witnesses and opportunities for using their testimony as part of assessment planning.

You should bear in mind that the weight of the evidence will vary, depending on the knowledge and expertise of the person providing the witness testimony. You will have to take these factors into account as you make your judgement.

Given that assessors are responsible for judging and signing off all evidence, they must ensure that any witness testimony comes from a reliable and credible source. The ideal witness will be:

- ◆ experienced in the area of work carried out by the candidate
- ◆ familiar with the standards to be met, and
- ◆ in possession of relevant qualification(s)

However, where no one in the workplace meets all the above criteria the assessor must make a judgement on a person's suitability based on other equivalent factors (position in organisation, length of service, proven ability to meet standards, etc).

Strongest	Someone with considerable occupational expertise in the candidate's area of work and who is familiar with the standards. This person may also be an assessor or internal verifier qualified with the A/V Units or 'D-Units'.
	Someone with considerable occupational expertise in the candidate's area of work and who is familiar with the standards.
	Someone with considerable occupational expertise in the candidate's area of work, but with no knowledge of the standards.
	Someone who may be a colleague of the candidate, but with no knowledge of the standards.
Weakest	Someone with no or little knowledge of the candidate's work or no knowledge of the standards.

Witness testimony is unlikely to be sufficient in itself for a decision about the candidate's competence, and would normally be supplemented by questioning candidates.

Example 1

A candidate may be asked to provide evidence of producing a report on the evaluation of insurance products and services. A witness testimony from the person who requested the information may provide evidence that the report contained comprehensive information presented in a clear and concise format.

Example 2

Testimony from a more senior member of staff could be provided to verify that the candidate consistently develops productive working relationships by, exchanging information with others, providing clear and accurate information, meeting commitments within deadlines and offers help and support to others.

Simulation

Simulation is any structured assessment exercise involving a specific task which reproduces real-life situations.

On some occasions, it may not be practical to assess a candidate in real work. Examples might be where the standards require candidates to carry out emergency or contingency procedures, or where client confidentiality is an issue, or where a candidate's job role does not cover all aspects of the qualification.

The Financial Services Skills Council has defined in their Assessment Strategy, Providing Financial Services at levels 2 and 3 when/where it considers simulation to be an acceptable form of assessment.

For more details on simulation and what constitutes performance in the workplace, look at the assessment strategy on SQA's website:
www.sqa.org.uk

In cases where the opportunity has not presented itself during the normal course of events, it would be appropriate to use simulation as a method of assessment. The following are two examples of the type of events that may exist within this qualification:

- ◆ Take appropriate action where fraud or potential fraud is suspected
- ◆ Advise colleagues promptly of any difficulties or where it is impossible to carry out agreed tasks

Other sources of evidence

Other sources of evidence can be previous experience or learning, case studies or assignments.

SQA's *Guide to Assessment* (see section 5) has more advice on methods of assessment and how to ensure that your assessment is valid, reliable and practicable.

3 Generating evidence

The methods of assessment you use should generate sufficient evidence to demonstrate the candidate's competence.

We described earlier the circumstances in which you might choose to use different methods of assessment. Starting on the next page, this section gives you examples of forms which you can use to record and present evidence of:

- ◆ observation (by the assessor)
- ◆ questions and candidate responses
- ◆ personal statement (produced by the candidate)
- ◆ witness testimony

There are blank forms which you can copy and use in assessment in Appendix 1.

Observation

For observation, note that the form asks you to record the skills and activities observed. This helps you to make a judgement on how the activity was carried out and what it demonstrates.

Assessor's comments and feedback to candidate:
 During this observation you demonstrated that you had gathered sufficient information from various sources that allowed a detailed and comprehensive report to be produced and presented. Further evidence is still required to ensure sufficient evidence is available to show competence. Knowledge and understanding has not been fully met at this point.

I can confirm the candidate's performance was satisfactory.

Questions and candidate responses

This form can be used to record any questions you might ask the candidate to establish what they know and understand. You should note the candidate's responses on this form too.

Note that there is a space near the top of the form for you to record when, where, how and why you asked the questions.

Where you want to give the candidate written questions, this form could also be used.

Candidate's personal statement

If a personal statement is being used as evidence, it should be completed by the candidate. The statement should record what they did, how and why they chose to carry out an activity or produce work in a certain way. Where other people may have been present during an activity and they may be able to provide witness testimony, the candidate should record how the statement links to other evidence in the column provided.

Witness testimony

Remember when you begin to use witness testimony that it must be capable of being authenticated — even if the testimony itself is being used to authenticate a candidate's claim to competence.

To make sure the witness testimony is genuine, you must ensure that you have a record of who is acting as a witness, their relationship to the candidate (eg supervisor, client) address, telephone number and the date. There are spaces for this information in the form.

Filling the gaps

There may come a time when your candidate has provided evidence for most of the Unit (or SVQ), but there are some gaps. For example, you may find that certain situations, such as handling contingencies, have not arisen during assessment. Often these will relate to dealing with health and safety issues, or unexpected problems with workflow like delays in receiving information from another part of the organisation.

In this SVQ, such gaps are likely to occur in generating evidence for:

- ◆ Developing productive working relationships in a small department
- ◆ Dealing with unusual or infrequent occurrences — suspected fraud, conflicts and complaints
- ◆ Lack of available development opportunities within small organisation/department

You may be able to overcome these by:

- ◆ Transferring candidates to larger departments
- ◆ Making use of simulation
- ◆ Discuss options with organisation to help find a solution
- ◆ Make use of other methods of assessment

Guidance and support to candidates

At all times during the assessment process — from planning through to making your assessment decision — feedback should be on-going, clear and constructive. Feedback should be given against the national standards by relating it to the evidence provided, including the knowledge specifications.

Where there are any shortfalls in a candidate's competence, you should discuss these with your candidate and make plans for re-assessment.

Judging candidate evidence and making an assessment decision

In judging candidate evidence, you must be satisfied that your candidates can work consistently to the required standard, and that the evidence they have produced is their own. You must consider whether your candidate understands and applies the knowledge evidence and how this links to performance evidence.

Evidence must:

- ◆ be relevant to the SVQ
- ◆ be authentic
- ◆ show current competence
- ◆ be sufficient to help you form a decision about the candidate's competence

Insufficient evidence

You have to judge whether the candidate has produced enough evidence required by the standards for you to reach a decision about their evidence.

Where there is insufficient evidence, you should say this to your candidate. You should tell them that it is not that they are not yet competent — there is simply not enough evidence on which to make a decision.

In this situation, your feedback to your candidates must help them produce more evidence and/or plan for further assessment.

Authenticating candidates' evidence

Authentication is required where you have not observed candidates' performance at first hand.

You can check whether a candidate has produced evidence which they claim shows their competence by questioning them or, if this is appropriate, asking them to produce a personal statement, using witness testimony, or seeking peer reports from other colleagues of the candidate.

Example

For this SVQ a candidate may have produced a report containing information that would be useful to other members of staff. However, where the assessor has not been able to observe this taking place further evidence may be required to ensure that the document was entirely the candidate's own work.

To satisfy yourself that this is the case other evidence can be produced in support of this by:

- ◆ Requesting a witness testimony from a supervisor who can verify the candidate produced the document
- ◆ Questioning the candidate on their skills and knowledge of this area
- ◆ Holding a discussion with the candidate on how and why they produced the document
- ◆ Requesting a personal statement from the candidate explaining the how and why

4 Recording achievement

You should retain all evidence — clearly referenced — for internal and external verification.

The candidate's evidence is normally kept in a file, often called a *portfolio*. These documents help you and your candidates to collect, present and cross-reference the evidence to the national standards. They are also a means of recording your assessment decisions, and they tell an External Verifier what stage a candidate has reached in achieving the SVQ.

Recording documents do not need to be paper-based — it is possible to use an electronic format for collecting and structuring the evidence. Whatever format you and your candidates choose to use, the documents must show what evidence was generated, the assessment decisions you made, how the evidence meets the standards, and where the evidence can be located. You should avoid photocopying items simply to put them in a portfolio — a clear explanation of where the evidence can be found (for example, in a filing cabinet) may be sufficient for the External Verifier to follow it up and include it in the visit.

There are various reasons why record-keeping is so important:

- ◆ it provides a way of tracking a candidate's progress in achieving an SVQ
- ◆ it helps candidates to make claims for certification of their competence
- ◆ internal verifiers and External Verifiers use the records to sample assessment decisions
- ◆ it helps us to monitor the quality assurance of our qualifications

If your candidates' evidence is incomplete, or cannot be located, or if there is inaccurate cross-referencing to the standards, there is a risk that an internal verifier or External Verifier will be unable to confirm your assessment decisions.

To help you and your candidate present evidence and record your assessment decision, we have provided examples of the forms which you and your candidate might use to compile the portfolio.

- ◆ Completing the Unit progress record
- ◆ Using the evidence index
- ◆ Completing the Element achievement record

These forms are also used in SQA's portfolio.

Completing the Unit progress record

You should complete this form each time your candidate achieves a Unit from the SVQ by adding your signature and the date next to the relevant Unit.

At this stage, candidates should make sure they have completed the recording documents correctly and that their evidence can be easily located. Only then should they circle the relevant Unit number at the top of the form. This enables both of you to see at a glance what stage the candidate is at in their SVQ.

Qualification and level: SVQ in Providing Financial Services at level 3

Candidate: Jamie Stevens

To achieve the whole qualification, you must prove competence in three **mandatory** Units and four **optional** Units.

Optional	F896 04							

Mandatory Units achieved

F88N 04	Develop Productive Working Relationships in a Financial Services Environment		
F88P 04	Ensure you Comply with Regulations in the Financial Services Environment		

Optional Units achieved

F896 04	Evaluate Insurance Products and Services	<i>Frank Graham</i>	<i>05/01/10</i>

Using the index of evidence

The purpose of the index of evidence is to help you locate and work through the candidate's evidence. It should give you a summary of what evidence the candidate has collected, and where (eg in a portfolio) it can be found.

The index of evidence should be completed by entering:

- ◆ the index number for each piece of evidence
- ◆ a description of each piece of evidence
- ◆ the place or location where it can be found
- ◆ the initials of the internal verifier and the date (if they have sampled the candidate's evidence)

Ideally, it should be candidates themselves (with your support and encouragement) who complete the index.

You must make sure that the information in the evidence index is accurate when your candidates' portfolios are presented for assessment and verification — particularly the information about where the evidence can be located. This is important because we suggest that anything which has been produced as day-to-day work is kept in its normal location, but anything which has been produced through assessment for the SVQ, eg observation checklists, is filed in the candidate's portfolio. In this way, your candidate can avoid having to photocopy work products just for the sake of including them in a portfolio. It also means that evidence produced as a result of assessment is kept safely in a central file.

If the index of evidence is not completed with an accurate description and location of the evidence, there is a risk that an internal verifier or External Verifier might be unable to confirm your assessment decisions.

Completing the Element achievement record

To help you and your candidates cross-reference the evidence to the standards of the SVQs, we have provided records similar to those produced in the SQA portfolio. Use one record for each Unit. The grids should be completed by:

- ◆ entering the evidence index number in the first column
- ◆ giving a brief description of the evidence in the second
- ◆ ticking the relevant boxes for the Performance Criteria (or statements of competence as they are sometimes known)
- ◆ ticking the relevant boxes for the Behaviours
- ◆ entering the areas of knowledge and understanding the piece of evidence covers

If integrated assessment is used (linking PCs or Elements across different Units) the evidence should be cross-referenced back to the relevant Units.

We have provided a completed example to show how to use the record.
