About this guide

This guide provides some practical examples of how to assess your candidates for the **SVQs in Roof Sheeting and Cladding (Construction) and Cladding Occupations (Construction) at level 2**. You may be able to think of other ways of assessing your candidates and recording your decisions about their competence.

Using assessments based on these examples does not guarantee successful verification — it is still your responsibility to ensure that internal quality assurance procedures are followed.

Introduction

This introduction provides a brief overview of SVQs and how they are assessed in the workplace. If you are already familiar with the concept of SVQs, you may wish to go to the next section.

About SVQs

Scottish Vocational Qualifications (SVQs) are work-based qualifications which set the level of occupational competence for each sector of the economy. Standards-setting bodies made up of experienced practitioners who represent employers, professional bodies, trade unions, education and voluntary organisations have designed the qualifications.

Each standards-setting body is responsible for developing national standards which define *what* employees (or potential employees) must be able to do, *how well*, and *in what circumstances*, to show that they are competent in their work.

Each SVQ which a standards-setting body develops has to fit into a broad framework which allows qualifications in the UK and throughout Europe to be compared. SVQs are specified at five levels which reflect the various technical and supervisory skills, knowledge and experience which employees should have as they progress in their industry.

Explanation of levels

- Level 1** Defines competent performance in a range of activities which are largely routine and predictable.
- Level 2** Specifies that competent performance must be shown in a broader range of work activities which are less routine and predictable. The employee will have more autonomy and responsibility, and may have to work as part of a team.
- Level 3** Specifies that competent performance must involve the employee in carrying out a broad range of varied work activities, most of which are complex and non-routine. There is considerable autonomy and responsibility, including the possibility of controlling or guiding others.
- Level 4** Specifies competence as complex technical or professional work activities which require a substantial degree of personal autonomy or responsibility. Managing staff and other resources is often involved.
- Level 5** Specifies competent performance as involving the employee in carrying out a significant range of activities in a wide variety of situations which are often unpredictable. Substantial responsibility and autonomy are involved in the work, which requires decision-making in the allocation of resources and the work of others. This will require complex skills such as analysis, design and evaluation.

How are standards defined in SVQs?

All SVQs consist of standards which can be broken down into various parts.

Units define the broad functions carried out in the sector, and are made up of a number of **component parts**:

- ◆ Unit title
- ◆ Unit number
- ◆ Description of what the Unit is about
- ◆ Performance Criteria
- ◆ Scope (range) of performance
- ◆ Knowledge and understanding related to Performance Criteria
- ◆ Scope of knowledge and understanding

The quality of performance in what people must be able to do and how well they have to perform is described by **Performance Criteria**. These may also be called **statements of competence** or **what candidates should be able to do**.

Scope (range) of performance lists the breadth of performance the candidate has to be competent in.

Knowledge and understanding relating to Performance Criteria lists what candidates must know and understand in relation to the performance criteria.

Scope of knowledge and understanding lists the breadth of knowledge and understanding evidence requirements in relation to the occupational area being assessed.

Increasingly, you may see changes to this format as standards become more user-friendly and are written in plain English. For example, there may be some standards containing Range Statements or Evidence Requirements, but over time these should disappear. You may, however, find that information on the context, nature and amount of evidence which is required to prove competence (which used to be given in Range Statements and Evidence Requirements) is now defined in the assessment guidance for the qualification. Assessment guidance is drawn up by the awarding body and is packaged along with the standards to form the SVQ.

Who is involved in SVQs?

There are several roles:

- ◆ **the candidate:** the person who wants to achieve the SVQ (eg an employee)
- ◆ **the assessor*:** the person who assesses the candidates and decides if they are competent (eg a supervisor)
- ◆ **the internal verifier*:** an individual nominated by the centre (eg a company) who ensures that assessors apply the standards uniformly and consistently (eg the supervisor's line manager)
- ◆ **the external verifier*:** an individual appointed by SQA who ensures that standards are being applied uniformly and consistently across all centres offering the SVQ

*Assessors and verifiers in centres will be asked by SQA to prove they have the appropriate occupational competence to assess and verify the SVQ. Occupational competence has been defined by the standards-setting body in the assessment strategy for these SVQs — see the appendix.

Assessors and verifiers are also expected to obtain an appropriate qualification in assessment and verification — this can be the Assessor/Verifier Units (the national standards for assessment and verification), either in their current form or as 'D-Units', or an alternative qualification which SQA also recognises.

The steps involved in assessing a candidate for an SVQ

In deciding whether a candidate should get an SVQ, you will go through these stages:

- ◆ planning for assessment
- ◆ generating and collecting evidence of the candidate's competence in the Units
- ◆ judging the evidence of the candidate's ability and making an assessment decision based on the evidence
- ◆ recording the assessment decision and the candidate's achievement

1 The SVQs in Roof Sheeting and Cladding (Construction) and Cladding Occupations (Construction) at level 2

The SVQs in Roof Sheeting and Cladding (Construction) and Cladding Occupations (Construction) have been developed by ConstructionSkills and are intended for people in the craft sector of the construction industry.

These people may be already working within the construction industry. They will require skills and knowledge in, among others: practical ability, health and safety, interpreting information and working to timescales.

The SVQs are designed to be assessed in the workplace, or in conditions of the workplace. Examples of the settings or centres in which the SVQs are likely to be delivered include construction sites and training centres.

Structure of the SVQs

This section lists the Units which form the SVQs in Roof Sheeting and Cladding (Construction) and Cladding Occupations (Construction) at level 2.

SVQ in Roof Sheeting and Cladding (Construction) at level 2 (G88G 22)

Candidates must complete seven mandatory Units plus one optional Unit in the optional group.

Mandatory Units

SQA ref	SCQF level	SCQF credit points	SSC ref	Title
DX9J 04			VR 01	Conform to General Workplace Safety
DX9H 04			VR 02	Conform to Efficient Work Practices
DY4A 04			VR 03	Move and Handle Resources
DY7P 04			VR 94	Prepare Resources for Roof Sheeting and Cladding
DY2K 04			VR 95	Install Roof Sheeting and Cladding Systems
DY2G 04			VR 96	Install Roof Sheeting and Cladding Rainwater Goods
D8GA 04			VR 01	CITB Health and Safety Test

Optional Units (one Unit required)

SQA ref	SCQF level	SCQF credit points	SSC ref	Title
DY9M 04			VR 97	Refurbishment of Roof Sheeting and Cladding
F006 04			VR 98	Repair Roof Sheeting and Cladding Systems
F00Y 04			VR 402	Slinging and Signalling the Movement of Loads

SVQ in Cladding Occupations (Construction): Specialised Cladding and Rainscreen Systems at level 2 (GD4H 22)

Candidates must complete three mandatory Units plus three optional Units, up to one Unit from each of the optional groups.

Mandatory Units

SQA ref	SCQF level	SCQF credit points	SSC ref	Title
DX9J 04			VR 01	Conform to General Workplace Safety
DX9H 04			VR 02	Conform to Efficient Work Practices
DY4A 04			VR 03	Move and Handle Resources

Optional Units (three Units required)

Prepare Backgrounds

SQA ref	SCQF level	SCQF credit points	SSC ref	Title
F7A5 04			VR 183	Prepare Backgrounds to Receive Wall Cladding Systems: Rainscreen Cladding
F7A6 04			VR 183	Prepare Backgrounds to Receive Wall Cladding Systems: Specialist Cladding

Install Wall Cladding

SQA ref	SCQF level	SCQF credit points	SSC ref	Title
F775 04			VR 184	Install Wall Cladding Systems: Rainscreen Cladding
F776 04			VR 184	Install Wall Cladding Systems: Specialist Cladding

Repair Wall Cladding

SQA ref	SCQF level	SCQF credit points	SSC ref	Title
F70B 04			VR 185	Repair Wall Cladding Systems: Rainscreen Cladding
F709 04			VR 185	Repair Wall Cladding Systems: Specialist Cladding

Remove Existing Wall Cladding

SQA ref	SCQF level	SCQF credit points	SSC ref	Title
F710 04			VR 186	Remove Existing Wall Cladding Systems: Rainscreen Cladding
F70Y 04			VR 186	Remove Existing Wall Cladding Systems: Specialist Cladding

Note: Where industry requests, qualifications can, where applicable, be endorsed to show the option route and the type of resources and/or activities that relate to the Unit. (See the following page for specific Unit endorsements, as applicable to the individual route.)

Unit endorsements for Cladding Occupations level 2

Listed below are the endorsements that can apply for the following Units:

Unit No.	Endorsement
VR 94	Built up systems Standing seam/secret fix systems Composite panel systems Fibre-cement systems
VR 95	Built up systems Standing seam/secret fix systems Composite panel systems Fibre-cement systems
VR 183	Rainscreen cladding Specialist cladding
VR 184	Rainscreen cladding Specialist cladding
VR 185	Rainscreen cladding Specialist cladding
VR 186	Rainscreen cladding Specialist cladding
VR 402	Own area of work: (ie Roof Sheeting and Cladding, Stonemasonry)

Note: Where industry requests an Awarding Body to further endorse a Unit, the Awarding Body must first seek approval from the Standards Setting Body to ensure the endorsement is appropriate to the Unit.

An Assessment Strategy for the SVQ

As part of their review of the SVQs in Roof Sheeting and Cladding (Construction) and Cladding Occupations (Construction) at level 2, the standards-setting body ConstructionSkills has developed an Assessment Strategy which defines a range of requirements:

- ◆ the occupational expertise of assessors and verifiers
- ◆ a definition of simulation
- ◆ definition of the workplace
- ◆ information on a model of independent assessment or external quality control

The relevant parts of the Assessment Strategy are published on SQA's website (www.sqa.org.uk), and both SQA and centres must comply with these requirements.

Why would people be interested in the SVQ?

People will take SVQs for a variety of reasons: to gain promotion, to prove their job competence, or for personal development. There will be other reasons too. One of the first things to do is to find out why your candidates want to do the SVQ, and to advise them of the appropriateness of the qualification. If anyone is acting as a coach or mentor to your candidates, they might help you to do this.

How do candidates begin?

Choosing the SVQ

You should make sure that candidates get guidance before starting out on an SVQ — they need advice to ensure that their existing job remit, skills, experience, and their plans for progression, are matched to the SVQ selected. It does not have to be you as the assessor, who carried out the matching process, but whoever has responsibility for this should ensure that the assessment opportunities available to the candidate are also considered.

All examples relate to experienced workers.

New entrant

Candidates must be employed in the construction industry. They will receive training and assessment in both the workplace and off the job where necessary. In addition to this, candidates may be required to sit and pass the CITB Health and Safety test, dependent on the SVQ they undertake.

Example

James left school and was deciding which career to follow. He had taken qualifications at school and studied the Scottish Progression Awards in Construction. Therefore James felt he would be suited to a hands-on type of role.

With this in mind, he contacted ConstructionSkills and completed an application form. James was invited to sit the ConstructionSkills learning exercise which he passed at a level suitable to pursue a career in Roof Sheeting and Cladding. James then contacted some local companies and managed to secure a Modern Apprenticeship. He worked with his company gaining relevant training, experience and assessment on-site and also attended the local training school for additional off-the-job training. During his four year apprenticeship, James also sat and passed his Health and Safety test, which allowed him to successfully complete his SVQ in Roof Sheeting and Cladding (Construction) at level 2.

Experienced worker route

This route is available to candidates who have been employed as a labourer for several years, but hold no formal qualifications giving them national recognition for their existing skills.

A skills matching exercise would be undertaken, recording the candidate's skills, knowledge, and expertise against the SVQ Units. The candidate would then, under guidance from the assessor, construct a portfolio of evidence to achieve these Units.

Where candidates are unable to generate sufficient evidence to meet the requirements of the Units, some planning would be required in order to provide the candidate with the opportunity to demonstrate competence in these areas.

All these arrangements would be agreed by everyone involved and written up into an assessment plan for the candidate.

Example

Angus had served his apprenticeship with a small company but had not had the opportunity to attend college to gain certification for his training. He had a vast knowledge of his trade, and many years practical experience, but no formal qualifications. To enable Angus to apply for work on more sites, he had to have a construction operative registration card which was only issued on proof of relevant qualifications such as SVQs. To enable him to be eligible for a card he enrolled for the SVQ in Cladding Occupations (Construction) at level 2 with a local training provider. The training provider allocated an assessor to Angus, who completed a skills match against the Units to see what expertise Angus already had and to identify any training needs. As a result of this, an assessment plan was drawn up for Angus and agreed by all the parties involved.

With assistance from his assessor, Angus proceeded to gather evidence to satisfy the Performance Criteria of the Units using observations, witness testimonies, personal statements and practical evidence. He was questioned by his assessor to ensure he had the knowledge and understanding of the performance evidence which was recorded in his portfolio.

After gathering sufficient evidence for all the Units required, Angus could expect to be awarded the SVQ in Cladding Occupations (Construction) at level 2.

2 Preparing to assess the SVQ

This section offers practical advice on how to begin to go about assessing your candidates for the SVQ. This advice is offered as examples of good practice — you may develop your own approaches to assessing your candidates which also work well.

Your role and your candidate's role

Assessing the SVQ will involve several stages. Both you and the candidate should be clear on your roles in the assessment process before you begin.

Your role

- ◆ ensure candidates understand what is to be assessed and how it is to be assessed
- ◆ ensure the conditions and resources required for assessment are available
- ◆ help candidates to identify and gather evidence
- ◆ observe and record candidates carrying out the activities described in the standards — records should say what has been observed, how it was carried out, and what it demonstrates
- ◆ assess products of the candidate's own work
- ◆ question candidates and record results
- ◆ help candidates to present evidence
- ◆ authenticate the evidence candidates provide
- ◆ judge evidence and make assessment decisions
- ◆ identify gaps or shortfalls in candidates' competence
- ◆ provide feedback to candidates throughout the assessment process
- ◆ record achievement

Candidates' role

- ◆ prepare for assessment — become familiar with the standards, what is to be assessed and how it is to be assessed
- ◆ help to identify sources of evidence and how these could be assessed
- ◆ carry out activities, and/or produce products of own work, and/or answer questions
- ◆ gather and present evidence
- ◆ receive and act on feedback from the assessor

Planning

In planning for assessment, you will find it helpful to meet with your candidate and plan what is to be assessed, in what way, and when and where the assessment is to take place. This discussion can be confirmed in the form of an agreed assessment plan between you and your candidate.

You should treat assessment plans as working documents — they can be updated and changed as you review progress with your candidate.

As you are planning assessment, don't forget to make the most of opportunities to *integrate* assessment. This means planning to assess an activity which draws on the contents of different Units or Elements. It can be a practical and cost-effective way of assessing your candidate's competence.

If you are a new assessor working towards your A/V Units (the national standards in assessment and verification) you will need copies of completed assessment plans as part of your evidence.

To help you plan for assessment, we have produced an assessment plan which covers Units VR01 *Conform to General Workplace Safety*, VR03 *Move and Handle Resources* and VR96 *Install Roof Sheetting and Cladding Rainwater Goods*.

You will notice that we have included spaces to enter dates when the assessment plan has been reviewed. Any gaps identified during these reviews should be discussed with your candidates and noted for action in the assessment plan.

Assessment plan

Units	VR 01 Conform to General Workplace Safety, VR 03 Move and Handle Resources, and VR 96 Install Roof Sheeting and Cladding Rainwater Goods				
Activities	Performance Criteria (PC)	Method of assessment/ Sources of evidence	Date of assessment	Evidence already available	Links to other Units (PC and range)
<ul style="list-style-type: none"> ◆ Flat roofs with gutters and downpipes including brackets and supports ◆ Roof pipes and outlets ◆ Flat roof sheeting and cladding <p>During this practical activity observation, note will be taken of any other relevant integrated activities to include for example, reading the roof drawings, storing and stacking of roofing materials and components, methods used to lift and load materials on to the roof, protecting surrounding areas, keeping work area tidy, working safely including safe access on to the roof, using personal protective equipment and taking care of tools and equipment.</p>	<p>VR 96 Install Roof Sheeting and Cladding Rainwater Goods PCs 1, 2, 3, 4, 5 and 6</p> <p>VR01 Conform to General Workplace Safety PCs 1, 2, 3, 4</p> <p>VR 03 Move and Handle Resources PCs 1, 2, 3, 4</p>	<p>Observation Witness statement Product evidence Questions</p> <p>Observation Witness statement Product evidence Questions</p> <p>Observation Witness statement Product evidence Questions</p>	02/02/11	Existing roof sheeting and cladding structure	Unit VR 02 Conform to Efficient Work Practices

Selecting methods of assessment

The methods of assessment you use should be valid, reliable and practicable.

- ◆ By *valid* we mean that the assessment method should be appropriate to the standards
- ◆ By *reliable* we mean that the assessment method should ensure consistent results when used with different candidates, different assessors and on different occasions
- ◆ By *practicable* we mean that the method ensures that the assessment makes best use of available resources, equipment and time

Before you assess a candidate, you must make sure that the methods of assessment you have chosen to use, along with any assessment materials (such as questions and sample answers) have been agreed within your centre through its system of internal quality assurance. This system is often called *internal verification* — its purpose is to help to ensure that assessment methods are valid, reliable and practicable.

There are both benefits and challenges when you are assessing SVQs in the workplace, or in conditions in the workplace. When you select methods of assessment, you should try to offer the candidate the benefits of workplace assessment and minimise any potential difficulties.

The benefits might be:

- ◆ performance and product evidence will be valid and can be authenticated
- ◆ resources to be used are readily available
- ◆ familiarity of the work area and equipment, so the candidate is comfortable during the assessment
- ◆ candidate can progress at his/her own pace

The challenges might be:

- ◆ pressure of work
- ◆ location of workplace
- ◆ all criteria not met during the assessment

Example

Agreement might be made to observe a candidate who has to demonstrate how to install a cladding system. If the assessor is working alongside the candidate they would be well placed to observe the candidate's performance, perhaps using a prepared checklist, and to question the candidate afterwards.

Methods of assessment

Assessment may involve a range of assessment methods. For SVQs, some of the most commonly used methods are observation, product evidence, and questioning.

Observation

Observation by an assessor is considered to be the most valid and reliable method of assessment. It can be organised in a variety of ways:

- ◆ working alongside the candidate
- ◆ arranging to visit when naturally-occurring activities are carried out by the candidate
- ◆ arranging for activities to take place

Observation by the assessor can often be supplemented by other types of assessment methods such as questioning. For example, it may be appropriate to ask oral questions of candidates as they carry out naturally-occurring activities.

Observation by the assessor can be of:

- ◆ The candidate producing product evidence, eg laying a resin floor supplemented by questions regarding terminology and regulations
- ◆ The candidate taking instructions, interpreting information, working as part of a team

Product evidence

As candidates work towards achieving the SVQ, they will produce evidence in the form of products of their work. The nature of this evidence can vary widely depending on what the candidate's job entails, but examples of product evidence include:

- ◆ a product of work completed by the candidate and documented by an expert witness, work records or photographic evidence (indirect evidence)
- ◆ written evidence in the form of an assessment by the assessor (direct evidence)

Questioning

Candidates have to show that they can meet the knowledge specifications for the SVQs. For these SVQs, Knowledge and Understanding is specified for each PC . Much of a candidate's knowledge and understanding will be apparent from what they do or produce as part of their work, but this will not always be the case, and questioning can be a useful way of confirming what candidates know and understand.

Questions can be asked in a variety of forms, such as oral questions, short answer written questions, and multiple-choice.

You should be careful that the method of questioning does not go beyond the competence required for the SVQ and become a barrier to fair assessment. For example, some candidates will feel more comfortable with oral questions than written.

Candidates can be asked questions during or after observation of practical activities to confirm their full grasp of the knowledge and understanding required for the PC which may not be evident from direct observation. For example:

Q State the most appropriate fire extinguisher to be used on EACH of the following fires:

- a natural gas
- b electrical
- c solid fuel
- d inflammable liquid

A

- a natural gas — dry powder
- b electrical — CO₂ or dry powder
- c solid fuel — water or foam
- d inflammable liquid — foam or CO₂

Q Describe why it is important to liaise with other operatives?

A To avoid hold-ups, delays and confrontation.

Other methods of assessment

These methods, like questioning, are often used for authentication. See Section 3 for more about authenticating candidates' evidence.

Personal statements

You might sometimes find it helpful to ask a candidate to give an account of why they did an activity in a certain way or how they produced a product of their work. This is often referred to as a *personal statement*. You should take care to ensure that by asking candidates to produce such statements, you are not asking them to demonstrate competence beyond what is required by the standards. You should also be selective in the use of personal statements, and make sure they have not been produced as a substitute to a more valid, reliable and practical method of assessment.

Example

The candidate could use a personal statement in Unit VR 396 *Installing Roof Sheeting and Cladding Rainwater Goods*. You may not have been able to observe the candidate meeting all the Performance Criteria. The personal statement would allow the candidate to explain the process and procedures as well as demonstrating their grasp of knowledge and understanding.

Witness testimony

For practical reasons, you may not be able to observe all the activities carried out by your candidates, but might feel that other people may be able to provide a statement on what your candidates have been doing or producing as part of their work. Statements of this kind are called *witness testimony*, and are often used to support other evidence produced by candidates. If witness testimony is used, you should, ideally, identify witnesses and opportunities for using their testimony as part of assessment planning.

You should bear in mind that the weight of the evidence will vary, depending on the knowledge and expertise of the person providing the witness testimony. You will have to take these factors into account as you make your judgement.

	Strongest	Someone with considerable occupational expertise in the candidate's area of work and who is familiar with the standards. This person may also be an assessor or internal verifier qualified with the A/V Units or 'D-Units'.
		Someone with considerable occupational expertise in the candidate's area of work and who is familiar with the standards.
		Someone with considerable occupational expertise in the candidate's area of work, but with no knowledge of the standards.
		Someone who may be a colleague of the candidate, but with no knowledge of the standards.
	Weakest	Someone with no or little knowledge of the candidate's work or no knowledge of the standards.

Witness testimony is unlikely to be sufficient in itself for a decision about the candidate's competence, and would normally be supplemented by questioning candidates.

Example

In Unit VR 01 *Conform to General Workplace Safety*, candidates are required to 'Comply with all workplace safety legislation requirements at all times'. A witness testimony produced by the candidate's supervisor or employer would be very useful, as it could detail the capacity of the candidate to conform to legislation in their work role.

Simulation

Simulation is any structured assessment exercise involving a specific task which reproduces real-life situations.

On some occasions, it may not be practical to assess a candidate in real work. Examples might be where the standards require candidates to carry out emergency or contingency procedures, or where client confidentiality is an issue, or where a candidate's job role does not cover all aspects of the qualification.

Within the Roof Sheeting and Cladding (Construction) and Cladding Occupations (Construction) awards, ConstructionSkills has defined what it regards as simulation, and has specified in the standards when simulation is and is not acceptable. The standards also state when candidates must demonstrate competence in the workplace.

For more details on simulation and what constitutes performance in the workplace, look at the Assessment Strategy on SQA's website: **www.sqa.org.uk**.

Other sources of evidence

Other sources of evidence can be previous experience or learning, case studies or assignments.

SQA's *Guide to Assessment* (see section 5) has more advice on methods of assessment and how to ensure that your assessment is valid, reliable and practicable.

3 Generating evidence

The methods of assessment you use should generate sufficient evidence to demonstrate the candidate's competence.

We described earlier the circumstances in which you might choose to use different methods of assessment. Starting on the next page, this section gives you examples of forms which you can use to record and present evidence of:

- ◆ observation (by the assessor)
- ◆ questions and candidate responses
- ◆ personal statement (produced by the candidate)
- ◆ witness testimony

There are blank forms which you can copy and use in assessment in Appendix 1.

Observation

For observation, note that the form asks you to record the skills and activities observed. This helps you to make a judgement on how the activity was carried out and what it demonstrates.

Observation record

Unit/Element(s)	VR 96 Install Roof Sheeting and Cladding Rainwater Goods
Candidate	James Cameron
Evidence index number	01
Date of observation	10/02/11

Skills/activities observed	Performance Criteria covered
<p>James is installing roof sheeting and cladding rainwater goods. This will allow for all the range requirements of range statement 5 in particular to be observed.</p> <p>James showed good organisational skills when loading out the materials required for the task, including sheets and fixings, brackets, supports, gutters and down pipes.</p> <p>He checked the quantity of materials before he started work against the specifications and drawings; we discussed how to solve problems with damaged and inappropriate materials.</p> <p>James demonstrated skills in measuring and marking out the positions of the gutters and down pipes and marking the position of fixing brackets, etc.</p> <p>He also took a full set of tools with him when he went onto the scaffold. He wore appropriate personal protective equipment (PPE) throughout the working activities he also used gloves, eye and ear protection when cutting the guttering and down pipe to length with a disc cutter saw.</p> <p>James used a 110v drill to fix the brackets to the building. The guttering was fixed to level and the down pipe was connected vertically.</p> <p>He safely removed all of the excess materials as he worked, in a systematic manner. He placed the debris in a chute and lowered it down carefully to the labourer in attendance.</p> <p>James met all relevant legal and company requirements in terms of health and safety and codes of practice. He wore all relevant PPE during a variety of work activities — including the use and maintenance of hand held power tools — and also complied with the safety notices and warning signs displayed in the work place.</p> <p>All work was completed within the allocated time.</p>	<p>PC3 range 1</p> <p>PC1 range 1</p> <p>PC5 ranges 1 and 2</p> <p>PC2 ranges 1 and 2</p> <p>PC5 ranges 2 and 3</p> <p>PC4 ranges 2 and 3</p> <p>PC6 range 1</p>

Knowledge and understanding apparent from this observation

K1, K2, K3, K4, K6, K7, K8, K9, K10, K11

Knowledge and understanding not apparent from this observation

K5, K12, K13

Other Units/Elements to which this evidence may contribute

VR01, VR02, VR03.

Assessor's comments and feedback to candidate

James, you carried out the task in a professional and assured manner, focusing on the need to meet the specification and adjusting to suit on-site conditions. At all times you were aware of your responsibilities regarding health and safety and other operatives in the vicinity.

I would ask you to obtain a copy of all non-sensitive documents you made reference to or used today, and place them in the supporting evidence section of your portfolio for evidence cross-referencing purposes.

Knowledge questions to cover K5, K12, K13 and K14 will be conducted at our next planned event.

I can confirm the candidate's performance was satisfactory.

Assessor's signature Robert Watson **Date** 10/02/11

Candidate's signature James Cameron **Date** 10/02/11

Questions and candidate responses

This form can be used to record any questions you might ask the candidate to establish what they know and understand. You should note the candidate's responses on this form too.

Note that there is a space near the top of the form for you to record when, where, how and why you asked the questions.

Where you want to give the candidate written questions, this form could also be used.

Record of questions and candidate's answers

Unit	VR96 Install Roof Sheeting and Cladding Rainwater Goods
Element(s)	5, 12, 13 and 14
Evidence index number	03
Circumstances of assessment	
Following observation the following questions were asked to cover the knowledge and understanding not confirmed by the observation	
List of questions and candidate's responses	
Q	Work at height must be in accordance with The Work at Height Regulations 2005 which require that such work is:
A	Risk assessed properly planned and supervised
Q	Gutter linings are manufactured from a wide range of materials, name three?
A	Galvanised Aluminium Mild steel
Q	Who is classed as an unlawful visitor on site? (1 out of 4)
A	Any person entering the site for the purpose of theft or to commit criminal activity.

Assessor's signature Robert Watson **Date** 11/02/11

Candidate's signature James Cameron **Date** 11/02/11

Candidate's personal statement

If a personal statement is being used as evidence, it should be completed by the candidate. The statement should record what they did, how and why they chose to carry out an activity or produce work in a certain way. Where other people may have been present during an activity and they may be able to provide witness testimony, the candidate should record how the statement links to other evidence in the column provided.

Personal statement

Date	Evidence index number	Details of statement	Links to other evidence (enter numbers)	Unit, Elements, Performance Criteria, Performance statements, scope covered
08/03/11	05	<p>Last Wednesday we were starting to work on a new flat roof on the industrial estate. The gaffer was away at a site meeting. I saw Wullie the labourer set up a ladder for access onto the scaffolding for us to access the roof, and he secured it at the top on to a standard. I thought 'that ladder is far too steep'.</p> <p>I warned Wullie, the labourer, not to get on to the ladder. He said he had fixed it at that angle because otherwise the ladder was too short to reach the step-off platform. He added that as it was only for access anyway, so it would be okay.</p> <p>I didn't argue with him, but told him to go and get a longer ladder, and meanwhile I would safely remove the one he had set up.</p> <p>I knew that the step-off platform was about eight metres above the ground, and therefore the ladder would need to be about two metres out from the bottom.</p>	Witness testimony (evidence no 09)	VR 96 PCs 1, 2 and 3

		<p>That's the 1 to 4 rule for ladders which we were told about at a safety talk recently, and it stuck in my head for some reason.</p> <p>Wullie soon brought another, longer ladder and we got it fixed at the right angle which made it much safer for everyone.</p>		
--	--	--	--	--

Candidate's signature James Cameron Date 08/03/11

Witness testimony

Remember when you begin to use witness testimony that it must be capable of being authenticated — even if the testimony itself is being used to authenticate a candidate's claim to competence.

To make sure the witness testimony is genuine, you must ensure that you have a record of who is acting as a witness, their relationship to the candidate (eg supervisor, client) address, telephone number and the date. There are spaces for this information in the form.

Witness testimony

SVQ title and level	SVQ in Roof Sheeting and Cladding (Construction) at level 2
Candidate's name	James Cameron
Evidence index no	09
Index no of other evidence which this testimony relates to (if any)	05
Element(s)	VR 96, PCs 1, 2 and 3
Date of evidence	08/03/11
Name of witness	Archie Gordon
Designation/relationship to candidate	Supervisor
Details of testimony	
<p>James Cameron has worked with me for about five years now; he is a good tradesman, and very reliable.</p> <p>Last Wednesday, I was attending a site meeting which had been called at short notice. In the middle of the meeting, Wullie Johnstone, our labourer, stormed in shouting that he couldn't get on with his work and he needed a longer ladder. I told him to calm down and took him to the site compound store and got him a 12 metre ladder. He then left quickly with the ladder and I returned to the site meeting.</p> <p>When I returned to the job an hour later I could see that good progress was being made on the roof sheeting (Unit VR273) and I observed that the ladder I had given Wullie, was set at the correct angle and fixed securely at the top. I safely made my way up the ladder and on to the roof and started to work.</p> <p>I asked the guys what all the fuss had been about, they explained, and we talked about it. I complimented him on his conscientious and safe action and made sure Wullie overheard this conversation, but he didn't speak.</p>	

I can confirm the candidate's performance was satisfactory.

Witness's signature Archie Gordon **Date** 08/03/11

Witness (please select the appropriate box):

- Holds A1/A2 or D32/D33 qualifications
- Is familiar with the SVQ standards to which the candidate is working

Filling the gaps

There may come a time when your candidate has provided evidence for most of the Unit (or SVQ), but there are some gaps. For example, you may find that certain situations, such as handling contingencies, have not arisen during assessment. Often these will relate to dealing with health and safety issues, or unexpected problems with workflow like delays in receiving information from another part of the organisation.

It may be necessary, in extreme cases, to find another organisation which can provide the relevant experience for candidates to generate the required evidence.

Guidance and support to candidates

At all times during the assessment process — from planning through to making your assessment decision — feedback should be on-going, clear and constructive. Feedback should be given against the national standards by relating it to the evidence provided, including the knowledge specifications.

Where there are any shortfalls in a candidate's competence, you should discuss these with your candidate and make plans for re-assessment.

Judging candidate evidence and making an assessment decision

In judging candidate evidence, you must be satisfied that your candidates can work consistently to the required standard, and that the evidence they have produced is their own. You must consider whether your candidate understands and applies the knowledge evidence and how this links to performance evidence.

Evidence must:

- ◆ be relevant to the SVQ
- ◆ be authentic
- ◆ show current competence
- ◆ be sufficient to help you form a decision about the candidate's competence

Insufficient evidence

You have to judge whether the candidate has produced enough evidence required by the standards for you to reach a decision about their evidence.

Where there is insufficient evidence, you should say this to your candidate. You should tell them that it is not that they are not yet competent — there is simply not enough evidence on which to make a decision.

In this situation, your feedback to your candidates must help them produce more evidence and/or plan for further assessment.

Authenticating candidates' evidence

Authentication is required where you have not observed candidates' performance at first hand.

You can check whether a candidate has produced evidence which they claim shows their competence by questioning them or, if this is appropriate, asking them to produce a personal statement, using witness testimony, or seeking peer reports from other colleagues of the candidate.

Example

Authentication will be required when a candidate has produced a piece of evidence that could, on the face of it, have been produced by anyone. For example, a candidate may have constructed a product of work. It may require the use of a personal statement, candidate questioning, witness testimony or photographic evidence to confirm that the work is genuinely the candidates own.

4 Recording achievement

You should retain all evidence — clearly referenced — for internal and external verification.

The candidate's evidence is normally kept in a file, often called a *portfolio*. These documents help you and your candidates to collect, present and cross-reference the evidence to the national standards. They are also a means of recording your assessment decisions, and they tell an External Verifier what stage a candidate has reached in achieving the SVQ.

An SQA document, *Candidate Guidance and Portfolio*, specific to the SVQ's in Cladding Occupations at level 2 is available. This publication contains much of the control and recording documentation for use by both the assessor and candidate and collectively they have the potential to form the basis for the production of a well-ordered candidate portfolio of evidence. Should you choose to use your own recording material, this has to be approved by us.

Recording documents do not need to be paper-based — it is possible to use an electronic format for collecting and structuring the evidence. Whatever format you and your candidates choose to use, the documents must show what evidence was generated, the assessment decisions you made, how the evidence meets the standards, and where the evidence can be located. You should avoid photocopying items simply to put them in a portfolio — a clear explanation of where the evidence can be found (for example, in a filing cabinet) may be sufficient for the External Verifier to follow it up and include it in the visit.

There are various reasons why record-keeping is so important:

- ◆ it provides a way of tracking a candidate's progress in achieving an SVQ
- ◆ it helps candidates to make claims for certification of their competence
- ◆ internal verifiers and External Verifiers use the records to sample assessment decisions
- ◆ it helps us to monitor the quality assurance of our qualifications

If your candidates' evidence is incomplete, or cannot be located, or if there is inaccurate cross-referencing to the standards, there is a risk that an internal verifier or External Verifier will be unable to confirm your assessment decisions.

To help you and your candidate present evidence and record your assessment decision, we have provided examples of the forms which you and your candidate might use to compile the portfolio.

- ◆ Completing the Unit progress record
- ◆ Using the evidence index
- ◆ Completing the Element achievement record

These forms are also used in SQA's portfolio.

Completing the Unit progress record

You should complete this form each time your candidate achieves a Unit from the SVQ by adding your signature and the date next to the relevant Unit.

At this stage, candidates should make sure they have completed the recording documents correctly and that their evidence can be easily located. Only then should they circle the relevant Unit number at the top of the form. This enables both of you to see at a glance what stage the candidate is at in their SVQ.

Unit progress record

Qualification and level SVQ in Cladding Occupations (Construction): Specialised Cladding and Rainscreen Systems at level 2

Candidate James Cameron

To achieve the whole qualification, you must prove competence in three **mandatory** Units plus three optional Units, up to one Unit from each of the optional groups.

Unit Checklist

Mandatory	VR 01	VR 02	VR 03			
Optional	VR 183	VR 184	VR 185	VR 186		

Mandatory Units achieved

Unit number	Title	Assessor's signature	Date
VR 01	Conform to General Workplace Safety	R Watson	16/05/11
VR 02	Conform to Efficient Work Practices		
VR 03	Move and Handle Resources	R Watson	16/05/11

Optional Units achieved

Prepare Backgrounds

Unit number	Title	Assessor's signature	Date
VR 183	Prepare Backgrounds to Receive Wall Cladding Systems: Rainscreen Cladding		
VR 183	Prepare Backgrounds to Receive Wall Cladding Systems: Specialist Cladding		

Install Wall Cladding

Unit number	Title	Assessor's signature	Date
VR 184	Install Wall Cladding Systems: Rainscreen Cladding	R Watson	16/05/11
VR 184	Install Wall Cladding Systems: Specialist Cladding		

Repair Wall Cladding

Unit number	Title	Assessor's signature	Date
VR 185	Repair Wall Cladding Systems: Rainscreen Cladding		
VR 185	Repair Wall Cladding Systems: Specialist Cladding		

Remove Existing Wall Cladding

Unit number	Title	Assessor's signature	Date
VR 186	Remove Existing Wall Cladding Systems: Rainscreen Cladding		
VR 186	Remove Existing Wall Cladding Systems: Specialist Cladding		

Using the index of evidence

The purpose of the index of evidence is to help you locate and work through the candidate's evidence. It should give you a summary of what evidence the candidate has collected, and where (eg in a portfolio) it can be found.

The index of evidence should be completed by entering:

- ◆ the index number for each piece of evidence
- ◆ a description of each piece of evidence
- ◆ the place or location where it can be found
- ◆ the initials of the internal verifier and the date (if they have sampled the candidate's evidence)

Ideally, it should be candidates themselves (with your support and encouragement) who complete the index.

You must make sure that the information in the evidence index is accurate when your candidates' portfolios are presented for assessment and verification — particularly the information about where the evidence can be located. This is important because we suggest that anything which has been produced as day-to-day work is kept in its normal location, but anything which has been produced through assessment for the SVQ, eg observation checklists, is filed in the candidate's portfolio. In this way, your candidate can avoid having to photocopy work products just for the sake of including them in a portfolio. It also means that evidence produced as a result of assessment is kept safely in a central file.

If the index of evidence is not completed with an accurate description and location of the evidence, there is a risk that an internal verifier or External Verifier might be unable to confirm your assessment decisions.

Completing the Element achievement record

To help you and your candidates cross-reference the evidence to the standards of the SVQs, we have provided records similar to those produced in the SQA portfolio. Use one record for each Element. The grids should be completed by:

- ◆ entering the evidence index number in the first column
- ◆ giving a brief description of the evidence in the second
- ◆ ticking the relevant boxes for the Performance Criteria (or statements of competence as they are sometimes known)
- ◆ entering the areas of knowledge and understanding the piece of evidence covers

If integrated assessment is used (linking PCs or Elements across different Units) the evidence should be cross-referenced back to the relevant Units.

We have provided a completed example to show how to use the record.

Element achievement record

Unit VR01 Conform to General Workplace Safety

Unit VR01 Conform to General Workplace Safety

Notes/Comments

James carried out the tasks in a confident manner demonstrating the ability to recognise problems and come up with a solution, ensuring he still conformed to the specification. He showed good communication skills and the ability to follow company procedures.

The candidate has satisfied the assessor and internal verifier that the performance evidence has been met.

Candidate's signature James Cameron **Date** 12/07/11

Assessor's signature Robert Watson **Date** 12/07/11

Internal verifier's signature Alan Green **Date** 11/08/11

5 Further information

What else should I read?

The publications listed here provide additional information on how to implement SVQs. Details of these and other SQA publications are available on our website at **www.sqa.org.uk** on the 'Publications, Sales and Downloads' section. They can be ordered from SQA's Business Development and Customer Support Team — telephone 0303 333 0330. Please note that there may be a charge for some of these publications.
