

External Assessment Report 2014

Subject(s)	Gàidhlig
Level(s)	Higher

The statistics used in this report are prior to the outcome of any Post Results Services requests

This report provides information on the performance of candidates which it is hoped will be useful to teachers/lecturers in their preparation of candidates for future examinations. It is intended to be constructive and informative and to promote better understanding. It would be helpful to read this report in conjunction with the published question papers and marking instructions for the examination.

Comments on candidate performance

General comments

Overall, candidates were well prepared and acquitted themselves competently, or well, in most of the exam.

Areas in which candidates performed well

Section B(iii): Literature

This question was answered well, or very well, by most candidates, showing detailed knowledge of the texts and also giving, in most cases, their personal reaction.

Areas which candidates found demanding

Section A: Listening

Most candidates answered this question well or very well. However candidates from a small number of centres found it demanding.

Section B(i): Reading

Candidates found this question very demanding. The allegorical nature of the passage as a whole, and in particular the number of questions relating to figurative use of language, proved particularly challenging. (Grade boundaries were adjusted to reflect this.)

Advice to centres for preparation of future candidates

Candidates should be encouraged to leave time in the exam for the writing question: many of the essays and stories this year were short and not particularly well-organised.

Students should continue to be encouraged to analyse and evaluate literary texts for themselves as well as being taught about them.

Students, and in particular those in situations where they seldom hear spoken Gaelic outwith the classroom, should be encouraged to listen to radio/television broadcasts on news and current affairs to develop their knowledge of the vocabulary and registers involved.

Statistical information: update on Courses

Number of resulted entries in 2013	117
------------------------------------	-----

Number of resulted entries in 2014	122
------------------------------------	-----

Statistical information: Performance of candidates

Distribution of Course awards including grade boundaries

Distribution of Course awards	%	Cum. %	Number of candidates	Lowest mark
Maximum Mark 150				
A	30%	30%	37	102
B	38%	68%	46	87
C	21%	89%	26	72
D	6%	95%	7	64
No award	5%		6	-

General commentary on grade boundaries

- ◆ While SQA aims to set examinations and create marking instructions which will allow a competent candidate to score a minimum of 50% of the available marks (the notional C boundary) and a well prepared, very competent candidate to score at least 70% of the available marks (the notional A boundary), it is very challenging to get the standard on target every year, in every subject at every level.
- ◆ Each year, SQA therefore holds a grade boundary meeting for each subject at each level where it brings together all the information available (statistical and judgemental). The Principal Assessor and SQA Qualifications Manager meet with the relevant SQA Business Manager and Statistician to discuss the evidence and make decisions. The meetings are chaired by members of the management team at SQA.
- ◆ The grade boundaries can be adjusted downwards if there is evidence that the exam is more challenging than usual, allowing the pass rate to be unaffected by this circumstance.
- ◆ The grade boundaries can be adjusted upwards if there is evidence that the exam is less challenging than usual, allowing the pass rate to be unaffected by this circumstance.
- ◆ Where standards are comparable to previous years, similar grade boundaries are maintained.
- ◆ An exam paper at a particular level in a subject in one year tends to have a marginally different set of grade boundaries from exam papers in that subject at that level in other years. This is because the particular questions, and the mix of questions, are different. This is also the case for exams set in centres. If SQA has already altered a boundary in a particular year in, say, Higher Chemistry, this does not mean that centres should necessarily alter boundaries in their prelim exam in Higher Chemistry. The two are not that closely related, as they do not contain identical questions.
- ◆ SQA's main aim is to be fair to candidates across all subjects and all levels and maintain comparable standards across the years, even as arrangements evolve and change.
