

Peter MacDonald – MacDonald Bros. Ltd, Portree

Well as a business it's important for us, MacDonald Brothers, to be part of the Portree High School Skills for Work programme because from an early stage we're seeing the enthusiasm shown by the youngsters. We're here giving them a flavour, it's not an apprenticeship its just a flavour of what work in the Construction industry is about because the Construction industry offers a vast opportunity from bricklayers, joiners, to CAD operators, to engineers, to surveyors, to administrative roles within businesses such as our own. I think it's important for businesses in a community to re-invest in their youngsters, to pass on some of the skills in house to offer them a future within their community.
