

#### **Overview**

This standard is about managing quality assurance systems – systems to ensure that business processes consistently deliver products and services that meet customers' and other stakeholders' quality expectations and legal and regulatory requirements.

The standard is relevant to managers and leaders who have specific responsibility for managing quality systems to assure quality of products and/or services in their organisation, or their part of the organisation.

This standard links closely to all the other standards in key area *FE Manage quality and performance*.

# Performance criteria

| You must be able to: | P1  | Ensure the quality standards to which you are working                     |
|----------------------|-----|---|
|                      |     | P1.1 are capable of delivering the quality of products and services       |
|                      |     | your customers expect   |
|                      |     | P1.2 allow you to obtain any expected quality marks, awards or            |
|                      |     | accreditation   |
|                      |     | P1.3 are in line with your organisation's values, aims and objectives     |
|                      |     | P1.4 meet any legal and regulatory requirements.                          |
|                      | P2  | Ensure systems, plans and resources are in place to ensure quality        |
|                      |     | standards are met and maintained.   |
|                      | P3  | Ensure that people are kept up-to-date about their roles and              |
|                      |     | responsibilities in meeting quality standards and are competent to fulfil |
|                      |     | their roles.  |
|                      | P4  | Identify and assess risks of shortfalls in the quality of processes,      |
|                      |     | products and services and take preventative action to mitigate these      |
|                      |     | risks.  |
|                      | P5  | Encourage people to take personal responsibility for achieving quality    |
|                      |     | standards and to address or report any actual or potential shortfalls.    |
|                      | P6  | Obtain sufficient, valid information from your quality assurance system   |
|                      |     | and other sources, including customers, to enable you to evaluate         |
|                      |     | accurately whether processes, products and services are meeting the       |
|                      |     | required standards.   |
|                      | P7  | Provide feedback to motivate people to maintain quality standards and     |
|                      |     | continuously improve performance.   |
|                      | P8  | Detect and record any shortfall in the quality of processes, products and |
|                      |     | services, investigate the causes and take prompt corrective action.       |
|                      | P9  | Report quality performance, including shortfalls and corrective actions   |
|                      |     | taken, to those who need to know, within agreed timescales.               |
|                      | P10 | Encourage customers and those involved in delivering products and         |
|                      |     | services to identify and recommend quality improvements.                  |
|                      | P11 | Develop resourced plans to implement quality improvements which           |
|                      |     | deliver significant benefits at reasonable cost and acceptable level of   |
|                      |     | risk.   |

#### **Knowledge and** understanding

understand:

| General knowledge and understanding |
|-------------------------------------|
|-------------------------------------|

- K1 How to keep up-to-date with current developments, tools and techniques You need to know and in guality management, customers' and other stakeholders' guality expectations and legal and regulatory requirements.
