

Guide to Assessment in the Sciences

Amendments

Occasionally amendments will be made to the *Guide to Assessment in the Sciences*. When this happens we will not be re-issuing the Guide to centres, but we will be updating the electronic version on SQA's website. This document lists any amendments that have been made and the date the new version was published online. This will allow you to update the version you have with the new pages, rather than print off the entire Guide.

May 2008
