

Internal Assessment Report: Social and Vocational Skills

Assessment Panel: Standard Grade

The purpose of this report is to provide feedback to centres on verification in National Qualifications in this subject.

Standard Grade

Element of Coursework verified

Social and Vocational Skills: Practical Abilities

Feedback to centres

General comments

The quality of evidence provided by centres continues to be of a good, well organised standard. It clearly shows through where Courses are well co-ordinated and well led by the person responsible. The quality of experiences which candidates organise and participate in, the organisation, selection and clarity of evidence provided, and the accuracy with which internal assessment levels and grades meet the National Standards, all support this conclusion.

Advice on good practice and areas for further development

Effective practice includes:

- ◆ clear evidence that identifies what each candidate has done as an individual
- ◆ accurately following and meeting the verification evidence requirements circulated by SQA to centres that are selected for verification

In addition, the following greatly help verifiers to understand and support the internal assessment of centres:

- ◆ candidate evidence with fully completed flyleaf copies, with grades
- ◆ Grade Related Criteria (GRC) related teacher comments, signed by the person responsible for co-ordinating and leading Social and Vocational Skills in the centre

Feedback is always provided to individual centres if, or when, a specific or general concern arises during verification.
