Total marks — 80

Attempt ALL questions.

All dimensions are in mm.

All technical sketches and drawings use third angle projection.

You may use rulers, compasses or trammels for measuring.

In all questions you may use sketches and annotations to support your answer if you wish.

Write your answers clearly in the spaces provided in this booklet. Additional space for answers is provided at the end of this booklet. If you use this space you must clearly identify the question number you are attempting.

Use blue or black ink.

Before leaving the examination room you must give this booklet to the Invigilator; if you do not, you may lose all the marks for this paper.

Total marks — 80 Attempt ALL questions

1. An invitation to the 50th anniversary of the Golden Camera film and television awards is shown below.

back of invitation

This is an extract of the invitation design brief:

The invitation must be made eye-catching through the use of contrast, exude luxury and link clearly with the 50th anniversary celebration. The design should show that the event is relevant to the modern era but pay homage to the golden age of film. The black silhouette is to be embossed with the brand logo and the gold areas should include matt, gloss and textured finishes.

(co		
(a)	Describe four ways the invitation meets the design brief.	4
(b)		
(b)	Explain why it is important that each of the following graphics technologies are	
(b)	Explain why it is important that each of the following graphics technologies are specified for printing the invitation:

2. A 3D CAD model of a reusable cup is shown below. It consists of a cup, a lid and a detachable straw.

Refer to supplementary sheet 1 for use with question 2 (a).

(a) Describe the 3D CAD modelling techniques used to create the **straw**.

Refer to the dimensions in your answer.

You may use sketches to support your answer.

2.	(cor	itinued)									
		Morphing (freeform modelling) was used to create a series of grip indentations on the cup.									
	Refer to stages 1 to 4 shown on supplementary sheet 2 for use with question 2 (b).										
	(b)	Describe, using morphing (freeform modelling) techniques, how the grip indentations on the cup were created.									
		You may use sketches to support your answer.									

A sportswear company manufactures cycle jerseys which can be customised. Two examples of cycle jerseys on their website are shown below.

CYCLING SHIRT: SHORT AND LONG SLEEVES

(a)	Describe, giving one reason, why the cycle jerseys on the website include surface developments.	1
(b)	Explain two differences between ppi and dpi when working with digital and printed media.	2

---	---------------	-----------	-----------	----------	----------	-------	-----------	----

(c)	Explain the importance of the artwork guidelines to the company.				
	You should consider image resolution, file types, colour space, and using CAD/CAM to cut the jersey.				
	Do not refer to the print process in your response.				

(continued)

3gp ___

Refer to supplementary sheet 3 for use with question 3 (c) and 3 (d).

The company considered various printing options for the cycle jersey but there were a number of disadvantages of using screen printing.

(d)	Explain, considering the information in the artwork guidelines, why screen printing is not suitable for this purpose.	3
	company is going to produce a promotional video of the manufacturing cess. Various graphic media file formats are being considered.	
	Describe one advantage of each of the following graphic media file formats.	
	You must give a different advantage for each graphic media file format.	2

7. A 3D CAD model of a prototype kayak is shown below.

Refer to supplementary sheet 4 for use with question 7.

A CAD technician has created technical graphics for a kayak manufacturing company but has made errors applying British Standards.

(a)	Describe three British Standards errors in the kayak technical graphics on supplementary sheet 4.		

(continu	ed)	MARKS	DO NOT WRITE IN THIS
(b) (i)	Describe how a 2D CAD sketch constraint was used to create the rope		MARGIN
	attachment point.		
	Refer to the dimensions in your answer.		
	You may use sketches to support your answer.	2	
agai	Describe the 3D CAD modelling technique used to create this feature and		
	how it was applied.		
	Refer to the dimensions in your answer.		
	You may use sketches to support your answer.	2	

7.

7. (continued)

The manufacturing company has written about the prototype kayak in its literature.

The prototype kayak was put through a rigorous series of tests. Using our state-of-the-art technology, we were able to show the kayak's improved performance and the kayaker's full range of movement when they descended our specially designed course.

The company used a range of graphic technologies in the design and testing of the prototype kayak.

(c)	(i)	Describe how CFD digital testing could be used in the design of the prototype kayak.	2
	(ii)	Describe how motion capture technology was used by the manufacturing company.	2
