

Unit Summary

This Unit is about preparing for mixing and mixing a range of fermented and non fermented dough in a non automated bakery production environment. Fermented dough typically include bread and roll dough, plain and fruited bun dough, base dough for Danish and Croissant. Non fermented dough typically include sweet and savoury pasties, puff pastry, scones and biscuits.

You need to show that you can check and adjust the condition of ingredients required by a product specification or recipe and prepare for mixing. You will need to mix ingredients correctly using different types of mixer, adjust mixtures to meet final specifications and store dough ready for processing. Complying with health and safety, food safety and organisational requirements are essential features of this Unit.

In order to be assessed as competent you must demonstrate to your assessor that you can consistently perform to the requirements set out below. Your performance evidence must include at least one observation by your assessor.

Achievement of this Unit will provide you with opportunities to develop the following SQA Core Skills:

Communication at Access 3

• Read and understand simple written communication.

Numeracy Intermediate 1

• Apply a range of straightforward numerical skills in everyday contexts.

Problem Solving at Access 3

- ♦ Analyse a simple situation or issue.
- Plan, organise and complete a simple task.

I have completed the requirements of this Un	iit.

Evidence of Performance

Evidence of performance may employ examples of the following assessment:

- ♦ observation
- written and oral questioning
- evidence from company systems (eg Food Safety Management System)
- reviewing the outcomes of work
- checking any records of documents completed
- checking accounts of work that the candidate or others have written

You 1	need to know and understand	
Evidence of knowledge and understanding should be collected during observation of performance in the workplace. Where it cannot be collected by observing performance, other assessment methods should be used.		Evidence
K1	To what standards of health and safety and food safety you are required to work during dough mixing, why it is important that you do so and what might happen if they are not met.	
K2	The importance of mixing to the required specifications for mixing equipment, recipe, ingredients, and process control.	
K3	The purpose of the mixing process for dough and the importance of achieving the specified outcome.	
K4	The importance of loading ingredients at the correct temperatures, in the correct weights/volumes and the correct order.	
K5	What problems result from overloading the mixer, using an inappropriate mixer or selecting the incorrect mixer attachments.	
K6	Basic blending and changes that occur during mixing that develop dough structure.	
K7	Basic principles and key differences between the bulk fermentation process, mechanical dough development process, and activated dough development process.	
K8	The basic function of key ingredients in dough making which can influence dough structure, quality and texture.	
K9	How to recognise a dough which is not conforming to specification and what basic corrective actions may be relevant.
