
Overview

What this standard is about

This standard is about obtaining and evaluating information to improve the supply chain. It deals with identifying critical factors, evaluating information and identifying problems. It involves providing the results of evaluation to improve performance in the supply chain.

Who this standard is for

This standard is for supply chain practitioners. This could, for example be in purchasing, freight logistics operations or transport management roles.

[SQA Unit Code – DX5H 04] V2

SfL87 Evaluate information on the supply chain
