

# LANLEO29 - SQA Unit Code F9H2 04

## Monitor the handover and installation of land-based equipment

---

### Overview

This standard is for those who have responsibility for ensuring the installation of land-based equipment in any of the land-based sectors, (e.g. agriculture, horticulture, amenities, ground care, arboriculture, forestry).

The individual is also required to provide assistance to customers during installation within the limits of their own authority and to resolve customers' queries and problems.

The term installation is used in this context to mean any aspect of the initial use of a product or service.

**This standard requires adherence to all relevant legislation and regulations.**

## **LANLEO29** - SQA Unit Code F9H2 04

### Monitor the handover and installation of land-based equipment

---

#### **Performance criteria**

- You must be able to:*
- P1 select an appropriate location to carry out handover and installation tasks
  - P2 successfully carry out handover and installations as specified
  - P3 review and confirm operator's understanding
  - P4 record the results of the installation in an appropriate format

**Knowledge and understanding**

*You need to know and understand:*

- K1 the reasons and benefits of handover and installation of products, e.g. legal, machine economic, performance, efficiency, professionalism
- K2 any equipment characteristics which must be taken into account when carrying out handover/installations, e.g. physical dimensions, transport/work settings
- K3 how to establish that the operator has a satisfactory level of understanding after handover and installation
- K4 how to identify the relevant criteria in order to carry out a satisfactory handover and installation
- K5 how to carry out an installation using a systematic process and the relevant quality control systems, e.g. handbooks, stop procedures, safety issues, control and operation techniques, maintenance, service schedules, warranty and terms and conditions
- K6 responsibilities and limits of authority
- K7 technical advice and assistance that can be offered to customers
- K8 how to deal effectively with queries or problems
