
Overview

What this standard is about

This standard is about checking a goods vehicle and its load at appropriate times during a journey. It covers the physical checks that a driver needs to make and the procedures and associated documentation that they may need to complete if damage or other problems are found. It requires drivers to be aware of factors that may affect the security of the vehicle and its load and the actions they can take to reduce risks.

Who this standard is for

This standard is relevant to drivers of goods vehicles and those who are responsible for goods vehicles within logistics organisations.

SFLDGV2 SQA Unit Code (FA19 04)

SfL2 Protect the vehicle and the load

Performance criteria

- You must be able to:*
- P1 obtain information on the organisation's procedures and all relevant **legal, safety and operating requirements** relating to the protection of the **vehicle** and **load**
 - P2 take appropriate action if you identify any problems in complying with the organisation's procedures
 - P3 monitor the condition of the **load** at regular intervals
 - P4 report any change in the condition of the **load** according to the organisations procedures
 - P5 follow the organisations protection procedures in relation to the **vehicle** and the **load** in different **locations**
 - P6 report any theft or damage to the **vehicle** or **load**, according to the organisations procedures
 - P7 carry out **vehicle** security checks at appropriate times
