

EUSWFRBE4b SQA Unit Code - (FA8T 04)

Inspect premises (domestic) for compliance with water fittings regulations/byelaws

Overview

This unit is for you if you carry out inspections of domestic premises, i.e., where water is supplied to single occupancy dwellings, to make sure they comply with the Water Supply (Water Fittings) Regulations 1999. This may include inspections of contractors' work for audit purposes.

EUSWFRBE4b SQA Unit Code - (FA8T 04)

Inspect premises (domestic) for compliance with water fittings regulations/byelaws

Performance criteria

You must be able to:

Agree inspection

- P1 you confirm the need for the proposed individual inspection, according to organisational procedures
- P2 you confirm inspection details, special needs requirements, access requirements and any agreed security measures and procedures
- P3 you determine any safety issues which may be posed by the inspection, and identify the equipment which may be required to carry out the inspection in a safe manner
- P4 you confirm the time, date, expected duration of the inspection and those who will be attending the inspection
- P5 you provide accurate and complete information to relevant people about the extent of the inspection and any specific requirement

Determine compliance with regulations

- P6 you gain access to the premises in an effective and courteous manner, and you confirm the inspection details
- P7 you confirm the accuracy of information about the premises and note any amendments to be made
- P8 you identify the specific system(s) to be inspected and you confirm the regulatory requirements
- P9 you identify the hazards associated with carrying out the inspection, and where this indicates an unacceptable risk you terminate the inspection and inform the relevant people of the details
- P10 you safely gain access to the system(s) to be inspected, using appropriate personal protective and access equipment
- P11 you carry out the inspection in a safe manner with minimum disruption or damage to the premises
- P12 you accurately identify any contravention of the regulations and where this constitutes a serious risk you take immediate relevant action
- P13 you propose solutions and actions which can be undertaken to ensure compliance
- P14 you identify any planned work activities which may impinge on future compliance

Record and report inspection information

- P15 you accurately record the details of inspected properties and update organisational records as required
- P16 you provide accurate and complete information to the relevant people of the outcomes of the inspection
- P17 you accurately record contravention details and the specific part of the regulations that have been breached
- P18 you check that relevant people understand the implications of the identified contravention of the regulations

EUSWFRBE4b SQA Unit Code - (FA8T 04)

Inspect premises (domestic) for compliance with water fittings regulations/byelaws

- P19 where contravention of the regulations has been identified you agree a timescale for re-inspection with relevant people
- P20 where compliance with the regulations is identified you provide the required formal notification to the relevant person
- P21 you identify and record any planned changes which may require future inspections
- P22 you provide complete and accurate inspection information to relevant people, according to organisational and regulatory requirements

Knowledge and understanding

You need to know and understand:

Agree inspection

- K1 reasons for and purposes of inspections, i.e. the regulatory requirements for inspections, the audit requirements (for the approved installer scheme), and organisational procedures
- K2 the importance of making sure the inspection is necessary
- K3 the implications of an inspection for those being inspected
- K4 statutory provisions for powers of entry
- K5 the types of safety issues posed by inspections and their implications
- K6 who requires the details of the inspection
- K7 recording requirements

Determine compliance with regulations

- K8 how to gain effective access and the importance of being courteous
- K9 statutory provisions for powers of entry
- K10 the information to be checked and the importance of doing this
- K11 how to interpret design installation diagrams
- K12 regulatory requirements for systems in domestic premises and how to apply them to different plumbing systems
- K13 how to carry out a risk assessment - the hazards associated with inspections in domestic premises and what would constitute an unacceptable risk
- K14 who to inform if an inspection is terminated
- K15 use of personal protective equipment
- K16 safe working practices for inspections and the types of access equipment you may require
- K17 the reasons why it may be necessary to disrupt or damage premises and the implications which may be involved
- K18 what constitutes a contravention of regulations for different types of plumbing systems
- K19 the references made to other regulations and standards in the regulations
- K20 what would constitute a serious risk and organisational procedures for the action to take
- K21 actions which will ensure compliance, including contamination prevention methods, use of backflow devices and the situations in which they apply
- K22 the types of planned work activities which may cause a future breach of the regulations

Record and report inspection information

- K23 recording methods
- K24 how to determine fluid categories for regulation purposes
- K25 the importance of updating records
