Plan and organise the development of customer service staff

Overview

This Standard is part of the Customer Service Theme of Development and Improvement. This Theme covers activities and approaches that play a vital part in customer service by seeking and implementing improvements and developments. Remember that customers include everyone you provide a service to. They may be external to your organisation or they may be internal customers.

Achieving excellent customer service depends on the skills and knowledge of the staff that provide it. To be effective, organisations need to review constantly how effective their customer service is and what improvements should be made. Sometimes customer service improvements will depend on the development of staff skills. New staff must be brought up to the required standards of skills and knowledge and established staff need to be updated on new procedures and techniques or refreshed on existing ones. Senior customer service staff have an important contribution to make to this process. This Standard is about identifying what development and training is needed for staff, organising its delivery and monitoring its success.
