

SFLWS23 - H2CP 04

SfL23 Operate equipment to perform work requirements in logistics operations

Overview

What this standard is about

This standard is about the safe operation of both mobile and fixed equipment. It deals with identifying the correct equipment for the task, ensuring it is safe to use and returning the equipment to the correct place after use.

Who this standard is for

This standard is relevant to all operatives at every level in logistics operations. Operatives could, for example, be working in warehousing and storage, transport, or freight forwarding

SFLWS23 - H2CP 04

SfL23 Operate equipment to perform work requirements in logistics operations

Performance criteria

You must be able to:

- P1 confirm the work required and identify the appropriate **equipment** to undertake it
- P2 check that the appropriate **equipment** is available, safe to use, and operational for the work to be carried out
- P3 prepare, set up and adjust the **equipment** in accordance with instructions, safety, and work requirements
- P4 monitor the **equipment** to maintain safe operation throughout the work, and record any defects and damage to the **equipment**
- P5 secure **equipment** in accordance with organizational procedures
- P6 identify any problems with using the **equipment** at any stage, and take the appropriate action to deal with them
- P7 record work according to organisational procedures
- P8 comply with the organisation's procedures and all relevant **legal, safety and operating requirements** relating to the operation of **equipment**

Knowledge and understanding

You need to know and understand:

- K1 the types of **equipment** to be used for different work activities
