Title	Place Goods in Storage in Logistics Operations	
Learning Outcomes		Assessment Criteria
The learner will:		The learner can:
1	Know how to place goods in storage in logistics operations.	<p data-bbox="804 394 1412 517">1.1 Explain the relevant organisational policies and procedures for placing the goods into storage in logistics operations, that relate to:</p> <ul style="list-style-type: none"> <li data-bbox="895 555 1299 589">◆ health, safety and security <li data-bbox="895 593 1235 627">◆ environmental factors <li data-bbox="895 631 1225 665">◆ special requirements <li data-bbox="895 669 1193 703">◆ storage conditions <li data-bbox="895 707 1129 741">◆ stock rotation <p data-bbox="804 775 1412 875">1.2 Describe the different sources and types of information required for placing the goods.</p> <p data-bbox="804 909 1412 987">1.3 Describe the areas for storing different types of goods.</p> <p data-bbox="804 1021 1412 1099">1.4 Explain the importance of preparing storage areas before placing goods.</p> <p data-bbox="804 1133 1412 1211">1.5 Describe the equipment and facilities required in the area receiving goods.</p> <p data-bbox="804 1245 1412 1323">1.6 Explain the correct handling methods for different types of goods.</p> <p data-bbox="804 1357 1412 1435">1.7 Identify problems that can occur when placing goods in storage.</p> <p data-bbox="804 1469 1412 1505">1.8 Explain appropriate action when dealing with identified problems.</p>

Learning Outcomes	Assessment Criteria
The learner will:	The learner can:
<p>2 Be able to place goods in storage in logistics operations.</p>	<p>2.1 Ensure that the area is clean, tidy and clear of obstructions.</p> <p>2.2 Use the correct handling methods and/or equipment to place the goods into storage.</p> <p>2.3 Place the goods in the correct location for space utilisation, to prevent damage and meet distribution requirements.</p> <p>2.4 Update stock control records accurately.</p> <p>2.5 Communicate clearly and accurately, with appropriate people, the monitoring and storage arrangements for the goods.</p>

Additional information about the Unit
Unit purpose and aim(s)
<p>This Unit is about placing goods into storage in logistics operations in order to maximise space, improve distribution and reduce risks. It deals with identifying appropriate locations for the size, weight or type of goods including usage or turnover.</p> <p>This Unit is aimed at operatives in logistics operations. Operatives could, for example, be working in warehousing and storage, transport or freight forwarding.</p>
Details of the relationship between the Unit and relevant national occupational standards (if appropriate)
Developed from Creative and Cultural Skills National Occupational Standards

Assessment (evidence) Requirements

Assessors must ensure that learners provide evidence to cover all the Learning Outcomes and Assessment Criteria.

This Unit is designed to assess the skills of learners in the workplace. Evidence of occupational competence should be generated and collected through performance in workplace conditions. This includes the knowledge-based Learning Outcomes and Assessment Criteria of the competence Units.

These conditions would be those typical to the learner's normal place of work. The evidence collected under these conditions should also be as naturally occurring as possible. It is accepted that not all employees have identical workplace conditions and therefore there cannot be assessment conditions that are identical for all learners. However, assessors must ensure that, as far as possible, the conditions for assessment should be those under which the learner usually works.

Collection of evidence of performance can be used to substantiate, support and expand the evidence base for competent performance. This may include:

- ◆ Observation
- ◆ Product and photographic evidence
- ◆ Relevant active documentation, reports, presentations

Performance Evidence: Observation

Observation of performance at work. Assessors must provide information about the context of the assessment.

Performance Evidence: Products

Work products (such as reports, letters, memos, printouts, presentations, etc) are valuable items of performance evidence. Assessors are encouraged to assess work products and record the location of evidence within their assessment records. Assessment centres using 'paperless portfolios' should first discuss their approach to assessment with their awarding body.

Guidance on Methods/Instruments of Assessment

This Unit is designed to assess the knowledge of learners in the workplace. Learning Outcomes may be assessed by a work-based assessment or by observation/product evidence/witness testimony. Online assessment may also be used. The collection of supplementary evidence of performance can be used to further substantiate, support and expand the evidence base for competent performance where this is necessary. This may be required depending on the size of the organisation in which the learner is working.

Supplementary evidence may include:

- ◆ Questioning
- ◆ Professional discussion
- ◆ Witness testimony
- ◆ Other valid evidence which relates directly to learner performance

Guidance on Methods/Instruments of Assessment (cont)

Supporting Evidence: Questioning

Assessment by observation and examination of work products usually results in inferred knowledge. As a result, questions should only be asked to fill gaps where knowledge is not explicit. This style of assessment still requires the assessor to confirm how knowledge and understanding has been addressed but avoids over assessment of the learner.

Questioning includes: verbal and written questioning, questionnaires, work based tasks, reflective accounts, case studies, professional discussion and feedback reports.

Supporting Evidence: Professional Discussion

Professional discussion is a single, or series of structured, planned and in-depth discussions which can be recorded electronically or manually in paper, computer, audio or video files. Professional discussions can be used to support observation reports, examination of work products and knowledge questionnaires. It is more usually used to fill in gaps in existing performance and knowledge evidence. It can be used formatively and summatively, and using it enhances the assessment process for both learners and assessors.

Professional discussion is used in holistic assessment, which is rigorous, informative and cost-effective, provided the learner is competent in their job role and ready to be assessed. If these conditions are met, assessors can plan to assess naturally-occurring 'evidence-rich' opportunities at work by observation, examination of work products, professional discussion and questioning knowledge within one assessment session. It is also possible for assessors to obtain witness testimonies at the same assessment session. Such a comprehensive activity is likely to focus on major work activities that demonstrate learner competence.

Supporting Evidence: Witness Testimony

Witness testimony can provide valuable evidence of learner competence. In line with established principles it must be:

- ◆ a clear, authentic statement indicating how the learner carries out their job
- ◆ dated, signed and include the job title of the witness

Supporting Evidence: Other qualifications

Other qualifications can be used as supporting evidence in a learner's portfolio. The qualification must be current and be benchmarked to one or more of the national occupational standards. However, it will only be supporting evidence, as assessors must still make judgements about how the learner demonstrates competence at work.

SQA's Guide to Assessment provides information on appropriate instruments of assessment. This guide is designed to provide support for everyone who assesses for SQA qualifications. It looks at the principles of assessment, and brings together information on assessment in general as well as on best practice in assessment.

The *Guide to Assessment* can be downloaded free from SQA's website www.sqa.org.uk.

Creative and Cultural Skills Assessment Strategy also supports the assessment of this Unit.
