

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

Overview

This standard is for people who install industrial and commercial heating and ventilating ductwork systems

The person performing this work must be able to comply with the correct procedures and practices for installing industrial and commercial heating and ventilating ductwork systems. This work must be in accordance with the current versions of the appropriate industry standards and regulations; the specification; industry recognised working practices; the working environment and the natural environment. They must know and understand the methods, procedures and techniques for fitting, fixing and connecting components and accessories, including welding, and the ductwork requirements of the following systems:

- supply, extract and re-circulation
- local exhaust ventilation
- low, medium and high pressure air

Please note that industry specific terminology is identified by *italic* text and its explanation and/or definition can be found in the glossary of this standard.

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

Performance criteria

To perform this work in accordance with the current versions of *the appropriate industry standards and regulations, the specification, working practices, the working environment and the natural environment*

- You must be able to:
- P1 verify that the job information and documentation are current and relevant and that the **plant**, instruments, *access equipment* and tools are fit for purpose
 - P2 confirm, as required, that the **site services** are compatible with the **system's** design
 - P3 produce a risk assessment and method statement in accordance with **organisational procedures** for the work to be carried out, including the identification and use of *personal protective equipment*
 - P4 confirm before work starts that the work location and work area can be accessed safely and has been checked for the risk to other personnel on the **site**, and take appropriate action if a risk is present
 - P5 select the **equipment, components and accessories** to be installed ensuring they are:
 - P6.1 of the right type and size
 - P6.2 fit-for-purpose
 - P6.3 in accordance with the **system's** design
 - P6.4 suitable for **the working environment** in which they are to be installed
 - P6 determine at the outset, that the plans for positioning and fixing the **equipment, components and accessories** are in accordance with:
 - P6.1 the **system's** design
 - P6.2 the **working environment**
 - P6.3 manufacturer instructions
 - P7 comply with industry practices and **organisational procedures** to ensure the co-ordination of **site services** and the activities of other trades
 - P8 measure and mark out locations for fitting and fixing the selected **equipment, components and accessories** in accordance with:
 - P8.1 the **system's** design
 - P8.2 manufacturer instructions
 - P9 prepare, fit, fix and connect the selected **ductwork** and **equipment, components and accessories** using suitable **jointing methods** in accordance with:

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

- P9.1 the **system's** design
- P9.2 the **working environment**
- P9.3 manufacturer instructions
- P9.4 when required, appropriate **welding** techniques
- P10 adjust, as appropriate, safety and control features of the **system**
- P11 carry out cleaning and flushing of the **system** as required
- P12 confirm the integrity of the installed **system** using **soundness test** procedures
- P13 confirm with the **relevant people**:
 - P13.1 those necessary variations to the planned programme of work
 - P13.2 the actions to be taken to ensure that any variations to the planned programme of work will minimise the potential for hazard and risk
- P14 implement **organisational procedures** for the safe transport and/or disposal of waste material, in accordance with supplier and manufacturer instructions

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

Knowledge and understanding

To perform this work in accordance with the current versions of *the appropriate industry standards and regulations, the specification, working practices, the working environment and the natural environment*

You need to know and understand:

- K1 the operation, applications, advantages and limitations of different **systems**
- K2 the applications, advantages and limitations of **system equipment, components and accessories** in relation to the **working environment**
- K3 the **appropriate industry standards and regulations** relevant to installing and testing the **systems**
- K4 how to verify that job information and documentation is current and relevant and that the **plant**, instruments, *access equipment* and tools are fit for purpose
- K5 how to produce a risk assessment and method statement for the work to be carried out, including the identification and use of *personal protective equipment*, in accordance with:
 - K5.1 the **system's** design
 - K5.2 the conditions of the **working environment**
 - K5.3 **organisational procedures**
 - K5.4 activities of other personnel on **site**
- K6 the methods for determining the type and size of **equipment, components and accessories** for the **system**
- K7 how to interpret diagrams and drawings of the **system** to:
 - K7.1 locate **site services**
 - K7.2 identify the planned location of the **system's, equipment, components and accessories**
- K8 the **organisational procedures** for confirming, before work starts, that the work location and work area can be accessed safely and has been checked for the risk to other personnel on the **site**, and for taking appropriate action if a risk is present
- K9 the methods, techniques and **jointing methods** for fitting, fixing and connecting the selected **components and accessories** in accordance with:
 - K9.1 the **system's** design
 - K9.2 the **working environment**
 - K9.3 manufacturer instructions
 - K9.4 when required, appropriate **welding** techniques

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

- K10 the **soundness test** procedures for confirming the **systems's** integrity
- K11 the methods and techniques for adjusting safety and control features
- K12 the methods and techniques for cleaning and flushing the **system**
- K13 the **organisational procedures** for confirming with the **relevant people** the appropriate actions to be taken to ensure that any variations to the planned programme of work will not introduce a hazard and have minimum negative impact on the installation work to be undertaken
- K14 how to implement **organisational procedures** for the safe transport and/or disposal of any waste material, substances and liquids in accordance with suppliers' and manufacturers' instructions

Install and test industrial and commercial heating and ventilating ductwork systems

Additional information

Scope related to performance criteria and knowledge and understanding:

The contexts and circumstances below identify where and when the NOS could apply.

1 Working Environment (Internal and/or External)

- 1.1 commercial
- 1.2 industrial
- 1.3 agricultural/horticultural
- 1.4 leisure and entertainment
- 1.5 residential medical and care facilities
- 1.6 *public services establishments*
- 1.7 pre 1919 traditional/historic buildings

2 Site services

- 2.1 electricity
- 2.2 water
- 2.3 gas
- 2.4 oil

3 Systems

- 3.1 supply, extract and re-circulation
- 3.2 local exhaust ventilation
- 3.3 low, medium and high pressure air

4 Equipment, components and accessories

- 4.1 air handling units
- 4.2 fans
- 4.3 dampers
- 4.4 access doors
- 4.5 terminal units
- 4.6 laboratory fume cupboards
- 4.7 storage cabinets
- 4.8 ventilation hoods

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

4.9 filters

4.10 humidifiers

4.11 metal and flexible ductwork

4.12 measuring instruments

4.13 prefabricated modules

5 Organisational Procedures

5.1 information management

5.2 project management

5.3 risk assessment/management

5.4 implementing and monitoring health & safety requirements and issues

5.5 implementing and monitoring issues relating to the *natural environment*

5.6 customer service

5.7 accident reporting

5.8 emergencies

5.9 communication with relevant people

6 Welding

6.1 manual arc welding

6.2 oxy-acetylene welding

6.3 tungsten inert welding

7 Plant

7.1 generators

7.2 transformers for low voltage hand-tools

7.3 lifting equipment

7.4 *access equipment*

8 Site

8.1 new build construction – building or structure

8.2 existing building or structure

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

Range related to performance criteria and knowledge and understanding:

The contexts and circumstances below identify where and when the NOS must apply

1 Relevant people

- 1.1 *customers/clients*
- 1.2 client representatives
- 1.3 supervisors
- 1.4 site/contract manager
- 1.5 other contractors/trades
- 1.6 members of the public
- 1.7 work colleagues

2 Soundness tests

- 2.1 pressure
- 2.2 system hygiene and charging
- 2.3 performance

3 Jointing methods

- 3.1 welding
- 3.2 grooved
- 3.3 flanges
- 3.4 compression
- 3.5 adhesives

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

Glossary

Appropriate industry standards and regulations for:

- construction design and management
- controlling noise at work
- controlling asbestos in the work place
- controlling substances hazardous to health
- electricity at work
- managing health and safety at work
- manual handling operations
- personal protection at work
- provision and use of work equipment
- the quality of buildings and building work in England, Northern Ireland, Scotland and Wales
- working at heights
- workplace health and safety and welfare
- environmental protection
- heritage/historic building requirements
- brazing/jointing standards
- carriage of Dangerous Goods (Classification, Packaging and Labelling) and use of transportable pressure receptacles

Specification

A verbal and/or documented instruction that is an explicit set of requirements for installing identified systems, equipment or products, to be satisfied by materials, components, design, processes, procedures, data management and/or service(s).

Clients and customers

- purchaser of installation services
- other trades and services at the work site
- colleagues within the same organisation
- architect
- contract manager
- main/sub-contractor
- consultant
- local authority representatives
- work colleagues

A public services establishment can be a:

- hospital/medical centre
- school/college/university
- museum/library
- prison
- military base
- car park
- place of worship

Natural environment

The climate, weather and natural resources that effect and are affected by human life and economic activity

Working practices

Methods, techniques and procedures that are adopted for carrying out specific tasks that ensures workers' exposure to hazardous situations is controlled in a safe manner when:

- working with equipment, tools and plant
- working with materials and substances (hazardous and non-hazardous)
- manual handling lifting
- using lifting equipment
- using personal protective equipment (PPE)

SUMHV05 (SQA Unit Code – H9LM 04)

Install and test industrial and commercial heating and ventilating ductwork systems

Access equipment

- scaffold
- ladders
- steps
- staging
- trestles
- mobile elevated work platform (MEWP)

Personal protective equipment (PPE)

- safety helmets/hats
- hairnets
- gloves
- safety steel toe capped boots/shoes
- safety spectacles/goggles
- face shields/visors
- ear plugs/muffs
- conventional or disposable overalls, boiler suits, aprons, chemical suits
- respiratory protective equipment (RPE)
