

SUMRAC11 (SQA Unit Code – H9M1 04)

Commission air conditioning and heat pump systems

Overview

This standard is for people who commission air conditioning & heat pump systems.

The person performing this work must be able to comply with the correct procedures and practices for commissioning air conditioning & heat pump systems. This work must be in accordance with the current versions of the appropriate industry standards and regulations; the specification; industry recognised working practices; the working environment and the natural environment. They must know and understand the types, operation, operating principles and/or application of:

- methods, procedures and techniques for commissioning appliances, components and accessories
- site services and system supplies
- air conditioning units/systems
- heat pumps

Please note that industry specific terminology is identified by *italic* text and its explanation and/or definition can be found in the glossary of this standard.

SUMRAC11 (SQA Unit Code – H9M1 04)

Commission air conditioning and heat pump systems

Performance criteria

To perform this work in accordance with the current versions of *the appropriate industry standards and regulations, the specification, working practices, the working environment and the natural environment*

You must be able to:

- P1 verify that the job and system information and documentation are current and relevant and that the **plant**, instruments, *access equipment* and tools are fit for purpose
- P2 confirm before work starts that the work location and work area can be accessed safely
- P3 interpret, as required, **system** information, diagrams and drawings to identify the location of the **equipment, accessories and components** that need commissioning
- P4 confirm that the **equipment, components and accessories** installed are:
 - P4.1 of the right type and size
 - P4.2 fit for purpose in accordance with the **air conditioning & heat pump system** design
 - P4.3 suitable for the **working environment** in which they are to be installed
- P5 confirm that the site services are compatible with the **system's** design
- P6 produce a risk assessment and method statement in accordance with **organisational procedures** for the work to be performed, including the identification and use of *personal protective equipment*
- P7 complete safe-isolation, as required, to ensure the safe commissioning of the **system**
- P8 perform checks to ensure that the **equipment, components and accessories** have been fixed, fitted, and connected in accordance with:
 - P8.1 the **system** design
 - P8.2 the **working environment**
 - P8.3 manufacturer instructions
- P9 confirm, as appropriate, the integrity of the installed **system**
- P10 commission **appliances, components and accessories**, adjusting the controls to ensure the configuration, safety and effective performance of the system in accordance with:
 - P10.1 the **system's** design

SUMRAC11 (SQA Unit Code – H9M1 04)

Commission air conditioning and heat pump systems

-
- P10.2 the **working environment**
 - P10.3 manufacturer's instructions
 - P10.4 **organisational procedures**
 - P11 confirm with the **relevant people**:
 - P11.1 those necessary variations to the planned programme of work
 - P11.2 the actions to be taken to ensure that any variations to the planned programme of work will minimise the potential for hazard and risk
 - P12 obtain *customer/client* acceptance of the commissioned **system** and its associated **equipment, components and accessories** in accordance with **organisational procedures**

SUMRAC11 (SQA Unit Code – H9M1 04)

Commission air conditioning and heat pump systems

Knowledge and understanding

To perform this work in accordance with the current versions of *the appropriate industry standards and regulations, the specification, working practices, the working environment and the natural environment*

You need to know and understand:

- K1 the operation and operating principles of different **systems** and their associated **equipment, components and accessories** in relation to:
 - K1.1 the **system's** design
 - K1.2 the **working environment**
- K2 the **appropriate industry standards and regulations** relevant to commissioning air conditioning and heat pump **systems**
- K3 how to verify that job and **system** information and documentation is current and relevant and that the **plant**, instruments, *access equipment* and tools are fit for purpose
- K4 how to produce a risk assessment and method statement for the work to be carried out, including the identification and use of *personal protective equipment*, in accordance with:
 - K4.1 the **system's** design
 - K4.2 the conditions of the **working environment**
 - K4.3 **organisational procedures**
 - K4.4 activities of other personnel on site
- K5 the checks required to confirm that the **equipment, components and accessories** have been fixed, fitted and connected in accordance with:
 - K5.1 the **system's** design
 - K5.2 the conditions of the **working environment**
 - K5.3 manufacturer instructions
- K6 how to interpret system information, diagrams and drawings to identify the location of the **equipment, components and accessories** that need commissioning
- K7 safe-isolation procedures, as required, to ensure the safe commissioning of the **system**
- K8 the methods and techniques for commissioning the **system** and its associated **equipment, components and accessories** in accordance with:
 - K8.1 the **system's** design
 - K8.2 the **working environment**

SUMRAC11 (SQA Unit Code – H9M1 04)

Commission air conditioning and heat pump systems

- K8.3 manufacturer instructions
- K8.4 **organisational procedures**
- K9 the procedures and tests to confirm the integrity of the **system**
- K10 the methods and techniques for confirming that the system provides cooling and/or heating by measuring air flow temperature difference across relevant key points to determine whether it meets the **system's** design
- K11 the **organisational procedures** for:
 - K10.1 confirming with **relevant people** those necessary variations to the planned programme of work that may have the potential to introduce a hazard and/or impact
 - K10.2 confirming with **relevant people** the correct actions to be taken to ensure that any variations to the planned programme of work will not introduce a hazard and have minimum impact on the commissioning work to be undertaken
 - K10.3 obtaining *customer/client* acceptance of the commissioned **system** and its associated **equipment, components and accessories**
- K11 how to implement **organisational procedures** for the safe transport and/or disposal of any waste material, substances and liquids in accordance with suppliers' and manufacturers' instructions
- K12 how to complete relevant documentation in accordance with **organisational procedures**

Additional information

Scope related to performance criteria: The contexts and circumstances below identify where and when the NOS could apply

1 Working Environment (Internal and/or External)

- 1.1 commercial
- 1.2 industrial
- 1.3 domestic
- 1.4 agricultural/horticultural
- 1.5 leisure and entertainment
- 1.6 residential medical and care facilities
- 1.7 *public services establishments*
- 1.8 pre 1919 traditional/historic buildings

2 Systems

- 2.1 single
- 2.2 split
- 2.3 multi split

3 Equipment, components and accessories

- 3.1 heat pumps
- 3.2 condensers
- 3.3 evaporators
- 3.4 compressors
- 3.5 expansion devices
- 3.6 accumulators
- 3.7 filters
- 3.8 pressure controls
- 3.9 temperature controls
- 3.10 line and regulating valves
- 3.11 sensors and gauges
- 3.12 vacuum pumps
- 3.13 condensate pumps

3.14 grilles/diffusers/fans/filters

3.15 heat exchangers

3.16 air handling units

3.17 liquid receivers

4 Organisational procedures

4.1 information management

4.2 project management

4.3 risk assessment and management

4.4 implementing and monitoring health & safety requirements and issues

4.5 implementing and monitoring issues relating to the *natural environment*

4.6 customer service

4.7 accident reporting

4.8 emergencies

4.9 communication with relevant people

5 Plant

5.1 transformers for low voltage hand-tools

5.2 lifting equipment

5.3 *access equipment*

6 Relevant people

6.1 *customers/clients*

6.2 client representatives

6.3 supervisors

6.4 site/contract manager

6.5 other contractors/trades

6.6 members of the public

6.7 work colleagues

- 6.6 members of the public
- 6.7 work colleagues

Glossary

Appropriate industry standards and regulations for:

- construction design and management
- controlling noise at work
- controlling asbestos in the work place
- controlling substances hazardous to health
- electricity at work
- managing health and safety at work
- manual handling operations
- personal protection at work
- provision and use of work equipment
- recycling and disposal of waste electrical and electronic equipment
- the quality of buildings and building work in England, Northern Ireland, Scotland and Wales
- working at heights
- workplace health and safety and welfare
- environmental protection
- heritage/historic building requirements
- brazing/jointing standards
- requirements for electrical installations
- carriage of Dangerous Goods (Classification, Packaging and Labelling) and use of transportable pressure receptacles
- pressure systems safety
- control of legionella
- pressure testing
- hot work

Specification

A verbal and/or documented instruction that is an explicit set of requirements for commissioning identified systems, equipment or products, to be satisfied by materials, components, design, processes, procedures, data management and/or service(s).

Clients and customers

- purchaser of installation services

- other trades and services at the work site
- colleagues within the same organisation
- architect
- contract manager
- main/sub-contractor
- consultant
- local authority representatives
- work colleagues

A public services establishment can be a:

- hospital/medical centre
- school/college/university
- museum/library
- prison
- military base
- place of worship

Natural environment

The climate, weather and natural resources that effect and are affected by human life and economic activity

Working practices

Methods, techniques and procedures that are adopted for carrying out specific tasks that ensures workers' exposure to hazardous situations is controlled in a safe manner when:

- working with equipment, tools and plant
- working with materials and substances (hazardous and non-hazardous)
- manual handling lifting
- using lifting equipment
- using personal protective equipment (PPE)
- pressure testing
- working on electrical circuits and equipment
- working in extreme temperature environment
- working alone

SUMRAC11 (SQA Unit Code – H9M1 04)

Commission air conditioning and heat pump systems

- working in confined spaces

Access equipment

- scaffold
- ladders
- steps
- staging
- trestles
- mobile elevated work platform (MEWP)

Personal protective equipment (PPE)

- safety helmets/hats
- hairnets
- gloves
- safety steel toe capped boots/shoes
- safety spectacles/goggles
- face shields/visors
- ear plugs/muffs
- conventional or disposable overalls, boiler suits, aprons, chemical suits
- respiratory protective equipment (RPE)
