

CFACSB7 (SQA Unit Code – H9Y2 04) Deal with customers using bespoke software

Overview

This Standard is part of the Customer Service Theme of Delivery. This Theme covers Customer Service behaviours and processes that have most effect on the customer experience during Customer Service delivery. Remember that customers include everyone you provide a service to. They may be external to your organisation or they may be internal customers.

Customer service is often delivered using bespoke software when dealing with customers face-to-face, by telephone or on-line. For the process to be effective, you must be able to navigate the system quickly by directly following recommended routes and using all the functionality of the system. Customers are unaware of the details of the system you are using and they must be kept informed of the different steps you are taking. Your use of the system must also ensure that you keep appropriate records of the transaction so that it can proceed successfully through the next stages. Most of all, customer satisfaction must drive the interaction and it should not appear to be dominated by the demands of the software. This Standard is for you if you are responsible for delivering service to customers at the same time as operating bespoke service software. Do not choose this Standard if you do not make regular use of a bespoke software system when dealing with customers.

Performance criteria

Prepare to deliver customer service using bespoke software

You must be able to:

- P1 sign on and open access to appropriate functions in the IT system
- P2 navigate the architecture and geography of the customer service site to ensure you can access all appropriate areas
- P3 explore screen or menu routes that are most appropriate for the customer service you are seeking to deliver
- P4 ensure that you are familiar with the software manual, help screens or help lines to know where to locate technical support when needed
- P5 prepare your work area to deliver customer service using bespoke software

Deliver customer service using bespoke software

You must be able to:

- P6 identify your customer or the services or products they wish to access
- P7 follow organisational procedures to step through the system in a way that responds to your customer's needs
- P8 use search or other specialist functions within the software to respond to customer requests
- P9 enter new records using the bespoke software system
- P10 amend customer service records in the bespoke software system
- P11 communicate with your customers in terms they can understand relating to the software system
- P12 follow organisational procedures to lead the conversation in a way that makes it easy to follow the paths and sequences of the bespoke software
- P13 interpret error messages and act on them to support your customer service
- P14 refer your customer to a colleague following organisational procedures if you are unable to complete the transaction
