

CFACSC1 (SQA Unit Code – H9YA 04)

Recognise and deal with customer queries, requests and problems

Overview

This Standard is part of the Customer Service Theme of Handling Problems. This Theme covers the behaviours, processes and approaches that are most effective when handling customer service problems. Remember that customers include everyone you provide a service to. They may be external to your organisation or they may be internal customers.

No matter how good you are at providing consistent and reliable customer service, some of your customers will from time to time expect more. They can signal this in various ways and when they do you must know how to handle it. Sometimes customers ask different questions and request special treatment. You may be able to help them yourself and you certainly need to know who to ask for help if necessary. Some customers may be dissatisfied with the service and may present a problem. Your job is to recognise that there is a problem and make sure that the appropriate person deals with it.
