

## Laundry items using the washing process

---

### Overview

This standard is for those who launder items and organise and control the washing process using a washer extractor.

The job role may involve:

- maintaining operating standards, equipment and supplies
- washing items using a washer extractor
- selecting the load required for washing processes
- controlling the washing process

Launder items using the washing process

---

**Performance criteria**

You must be able to:

1. prepare the washer extractor ready for use
2. plan and allocate the washing of the loads
3. operate the machinery in accordance with manufacturers procedures and instructions
4. safely use detergents, chemicals and additives during the washing process
5. safely load and unload machines between washing processes
6. handle items with care and in line with organisational procedures
7. check that work is being carried out as planned
8. identify and report any machine faults in line with organisational procedures
9. remove any items that are not washed satisfactorily or have been damaged and deal with these according to organisational procedures
10. identify and report any problems that arise in carrying out the washing process
11. transfer the cleaned load to the next stage of the laundry process

Launder items using the washing process

---

## Knowledge and understanding

You need to know and understand:

1. how the complete washing process works
2. the operational settings and range of performance from machinery
3. how to interpret care labels and why these must be followed
4. the different fibres, fabrics and textile finishes and how to process these
5. the correct load weight for the machine and fabric
6. the difference between wash programmes and how to select these
7. the different temperature setting for the wash programmes
8. the problems associated with high and low dip levels
9. how to recognise faults and malfunctions within the machine or wash process and the action to take
10. how to identify faults or deficiencies in washed work in line with organisational quality standards
11. who to report faults with machinery to and when this should be done
12. who to report faults in the washed items to and when this should be done
13. how to stop a malfunctioning washing machine safely
14. how to carry out routine machine maintenance in line with organisational procedures
15. statutory responsibilities under health, safety and environmental legislations and regulations during the washing process

The candidate and assessor must only sign below when all Performance Criteria and Knowledge points have been met.

**Unit assessed as being complete**

<b>Candidate's Name:</b>	
<b>Candidate's Signature:</b>	
<b>Date submitted to assessor as complete:</b>	

<b>Assessor's Name:</b>	
<b>Assessor's Signature:</b>	
<b>Date assessed as complete:</b>	

**Internal Verification —**

to be completed in accordance with centre's IV strategy

<b>Evidence for this Unit was sampled on the following date/s:</b>	<b>IV's Signature</b>	<b>IV's Name</b>

This Unit has been subject to an admin check in keeping with the centre's IV strategy.
