

Carry out specific tests on plant or machinery to determine operational serviceability

Overview

This standard is about

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting materials, components, consumables and equipment
- 4 carrying out specific tests on plant or machinery to determine operational serviceability

Carry out specific tests on plant or machinery to determine operational serviceability

Performance criteria

You must be able to:

- P1 interpret the given information relating to the work and resources to confirm its relevance
- P2 comply with the given, relevant legislation and official guidance to carry out your work and maintain safe and healthy work practices
- P3 select the required quantity and quality of resources for the methods of work
- P4 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- P5 comply with the given contract information to carry out the work efficiently to the required specification
- P6 complete the work within the allocated time, in accordance with the programme of work

Carry out specific tests on plant or machinery to determine operational serviceability

Knowledge and understanding

You need to know and understand:

Performance Criteria 1

Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate information and unsuitable resources, and how they are implemented
- K2 the types of information, their source and how they are interpreted
- K3 the organisational procedures to solve problems with the information and why it is important they are followed

Performance Criteria 2

Safe work practices

- K4 the level of understanding operatives must have of information for relevant, current legislation and official guidance and how it is applied
- K5 how emergencies should be responded to and who should respond
- K6 the organisational security procedures for tools, equipment and personal belongings
- K7 what the accident reporting procedures are and who is responsible for making the report
- K8 why, when and how health and safety control equipment should be used

Performance Criteria 3

Selection of resources

- K9 the characteristics, quality, uses, sustainability, limitations and defects associated with the resources and how defects should be rectified
- K10 how the resources should be used and how any problems associated with the resources are reported
- K11 the organisational procedures to select resources, why they have been developed and how they are used
- K12 the hazards associated with the resources and methods of work and how they are overcome

Performance Criteria 4

Minimise the risk of damage

- K1 how to protect work from damage and the purpose of protection
- K2 why disposal of waste should be carried out safely and how it is achieved

Performance Criteria 5

Carry out specific tests on plant or machinery to determine operational serviceability

Carry out specific tests on plant or machinery to determine operational serviceability

Meet the contract specification

K3 how methods of work, to meet the specification, are carried out and problems reported

K4 how maintenance of tools and equipment is carried out

Performance Criteria 6

Allocated time

K5 what the programme is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Carry out specific tests on plant or machinery to determine operational serviceability

Scope/range

Performance Criteria 1

1 interpretation of drawings, specifications, schedules, method statements, risk assessments, workshop manuals, technical service bulletins, parts manuals and manufacturers' information related to the work to be carried out

Performance Criteria 2

2 avoidance of risk by complying with the given information relating to at least five of the following

- 2.1 methods of work
- 2.2 safe use of health and safety control equipment
- 2.3 safe use of access equipment
- 2.4 safe use, storage and handling of materials
- 2.5 safe use and storage of, tools and equipment
- 2.6 specific risks to health

Performance Criteria 3

3 selection of resources associated with own work

- 3.1 materials, components and fixings / fittings
- 3.2 tools and equipment
- 3.3 consumables

Performance Criteria 4

- 4 protection of the work and its surrounding area from damage
- 5 minimise damage and maintain a clean work space
- 6 disposal of waste in accordance with current legislation

Performance Criteria 5

- 7 demonstration of work skills to measure, test and compare
- 8 use and maintain hand tools, portable power tools, specialist test equipment and ancillary equipment
- 9 complete specific tests to given working instructions on at least four of the following

- 9.1 electric systems
- 9.2 cooling systems
- 9.3 lubrication systems
- 9.4 emission control
- 9.5 hydraulic systems
- 9.6 hydrostatic drive
- 9.7 transmission systems
- 9.8 pneumatic systems
- 9.9 braking systems
- 9.10 vibration management

Carry out specific tests on plant or machinery to determine operational serviceability

- 9.11 steering/suspension systems
 - 9.12 generator output control
 - 9.13 electronic management
 - 9.14 powered access equipment
 - 9.15 material handling equipment
 - 9.16 water pumps
 - 9.17 craneage
 - 9.18 lifting equipment
 - 9.19 load testing (cranes, hoists, MEWPs, MHE)
 - 10 complete tests to given working instructions for the following
 - 10.1 statutory requirement
 - 10.2 compliance with policy and procedures
 - 10.3 operational efficiency (speeds, flow rates, consumption, emissions, outputs)
 - 10.4 complete functional, operational and safety checks
 - 11 complete and maintain records
- Performance Criteria 6
- 12 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Carry out specific tests on plant or machinery to determine operational serviceability

Scope/range related to knowledge and understanding

Disposal of waste

1 environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

Emergencies

2 operative's response to situations in accordance with organisational authorisation and personal skills when involved with

2.1 fires, spillages, injuries

2.2 emergencies relating to occupational activities

Hazards

3 those identified by risk assessment, method of work, manufacturers' technical information, statutory regulations and official guidance

Health and safety control equipment

4 identified by the principles of protection for occupational use, types and purpose of each type, work situations and general work environment

4.1 collective protective measures

4.2 personal protective equipment (PPE)

4.3 respiratory protective equipment (RPE)

4.4 local exhaust ventilation (LEV)

Information

5 drawings, specifications, schedules, method statements, risk assessments, workshop manuals, technical service bulletins, parts manuals, manufacturers' information and current regulations associated with the specific testing of plant or machinery

Legislation and official guidance

6 this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, in confined spaces, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

7 operative care of hand tools and portable power tools, specialist test equipment and ancillary equipment

Methods of work

1 application of knowledge for safe and healthy work practices, procedures and skills relating to the method/area of work and materials

Carry out specific tests on plant or machinery to determine operational serviceability

used to:

- 1.1 isolate plant, machinery and components
- 1.2 confirm calibration of test equipment
- 1.3 test electric systems, cooling systems, lubrication systems, hydraulic systems, hydrostatic drive, transmission systems, pneumatic systems, braking systems, vibration management, steering/suspension systems, generator output control, electronic management, powered access equipment, material handling equipment, water pumps, craneage, lifting equipment and load testing (cranes, hoists, MEWPs MHE)
- 1.4 conduct tests for statutory requirements, compliance with policy and procedures and operational efficiency (speeds, flow rates, consumption, emissions, output)
- 1.5 collect measurements, readings, input and output data, working cycle times and tolerances
- 1.6 identify and assess the relevance of inconsistent data
- 1.7 make allowances for situation, environment, atmospheric conditions
- 1.8 operate pressure gauge, flow gauge, multi-meter, portable appliance testing equipment, computer aided diagnostic software, test lamp, compression measurement equipment and timing devices
- 1.9 analyse information collected; make comparisons with other plant and machinery, consider previous knowledge, apply sensory abilities (visual, audible, touch and smell) consult manufacturers' information and results of other tests
- 1.10 compare and confirm test outcome with given specifications
- 1.11 report findings
- 1.12 use hand tools, portable power tools and equipment
- 1.13 work at height
- 1.14 use access equipment
- 1.15 complete and maintain records
- 2 team work and communication
- 3 needs of other occupations associated with conducting specific tests on plant and machinery to determine operational serviceability

Problems

- 1 those arising from information, resources and methods of work

Carry out specific tests on plant or machinery to determine operational serviceability

- 1.1 own authority to rectify
- 1.2 organisational reporting procedures
- Programme
- 2 types of progress charts, timetables and estimated times
- 3 organisational procedures for reporting circumstances which will affect the work programme
- Protect work
- 4 protect work against damage from general workplace activities, other occupations and adverse weather conditions
- Resources
- 5 materials, components and equipment relating to types, quantity, quality, sizes and the sustainability of standard and/or specialist:
 - 5.1 consumables
 - 5.2 fixings and fittings
 - 5.3 hand tools, portable power tools, specialist test equipment and ancillary equipment
- 6 methods of calculating quantity, length, volume, area and wastage associated with the method/procedure to conduct specific tests on plant or machinery to determine operational serviceability
- Security procedures
- 7 site, workplace, company and operative

Carry out specific tests on plant or machinery to determine operational serviceability
