

---

**Overview**

This standard is about interpreting information, adopting safe, healthy and environmentally responsible work practices, selecting and using materials, components, tools and equipment and preparing and installing rainscreen wall cladding systems

This standard is for people installing rainscreen wall cladding systems working in the occupational area of cladding occupations and can be used by operatives, supervisors and managers

- You must be able to:
- P1 interpret the given information relating to the work and resources to confirm its relevance
  - P2 comply with the given, relevant legislation and official guidance to carry out your work and maintain safe and healthy work practices
  - P3 select the required quantity and quality of resources for the methods of work
  - P4 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
  - P5 comply with the given contract information to carry out the work efficiently to the required specification
  - P6 complete the work within the allocated time, in accordance with the programme of work

**Interpretation of information**

You need to know and understand:

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

**Performance Criteria 2**

**Safe work practices**

You need to know and understand:

- K4 the level of understanding operatives must have of **information** for relevant, current **legislation and official guidance** and how it is applied
- K5 how **emergencies** should be responded to and who should respond
- K6 the organisational **security procedures** for tools, equipment and personal belongings
- K7 what the accident reporting procedures are and who is responsible for making the report
- K8 why, when and how **health and safety control equipment** should be used
- K9 how to comply with environmentally responsible work practices to meet current **legislation and official guidance**

## COSVR184 – SQA Unit Code HN8H 04

### Install rainscreen wall cladding systems

---

#### Performance Criteria 3

##### Selection of resources

You need to know and understand:

- K10 the characteristics, quality, uses, sustainability, limitations and defects associated with the **resources** and how defects should be rectified
- K11 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K12 the organisational procedures to select **resources**, why they have been developed and how they are used
- K13 the **hazards** associated with the **resources** and **methods of work** and how they are overcome

#### Performance Criteria 4

##### Minimise the risk of damage

You need to know and understand:

- K14 how to **protect work** from damage and the purpose of protection
- K15 why **disposal of waste** should be carried out safely and how it is achieved

#### Performance Criteria 5

##### Meet the contract specification

You need to know and understand:

- K16 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K17 how **maintenance** of tools and equipment is carried out

#### Performance Criteria 6

##### Allocated time

You need to know and understand:

- K18 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

**Scope/range related to performance criteria**

**Performance Criteria 1**

- 1 interpretation of drawings, specifications, schedules, method statements, risk assessments and manufacturers' information related to the work to be carried out

**Performance Criteria 2**

- 2 avoidance of risk by complying with the given information relating to the following
  - 2.1 methods of work
  - 2.2 safe use of health and safety control equipment
  - 2.3 safe use of access equipment
  - 2.4 safe use, storage and handling of materials, tools and equipment
  - 2.5 specific risks to health

**Performance Criteria 3**

- 3 selection of resources associated with own work
  - 3.1 materials, components and specialised fixings for compatible materials
  - 3.2 tools and equipment
  - 3.3 access equipment

**Performance Criteria 4**

- 4 protection of the work and its surrounding area from damage
- 5 prevent damage and maintain a clean work space
- 6 disposal of waste in accordance with current legislation

**Performance Criteria 5**

- 7 demonstration of work skills to measure, mark out, set out, adjust, align, fit, position and secure
- 8 use and maintain hand tools, portable power tools, levelling instruments and ancillary equipment
- 9 install rainscreen wall cladding to given working instructions

**Performance Criteria 6**

- 10 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

## Install rainscreen wall cladding systems

Scope/range related  
to knowledge and  
understanding

### **Disposal of waste**

- 1 environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

### **Emergencies**

- 2 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
  - 2.1 fires, spillages, injuries, falls, rescue procedures
  - 2.2 emergencies relating to occupational activities

### **Hazards**

- 3 those identified by risk assessment, method of work, manufacturers' technical information, statutory regulations and official guidance

### **Health and safety control equipment**

- 4 identified by the principles of prevention for occupational use, types and purpose of each type, work situations and general work environment
  - 4.1 collective protective measures
  - 4.2 personal protective equipment (PPE)
  - 4.3 respiratory protective equipment (RPE)

### **Information**

- 5 drawings, specifications, schedules, method statements, risk assessments, manufacturers' information and current regulations governing buildings and official guidance associated with the installation of rainscreen wall cladding systems

### **Legislation and official guidance**

- 6 this relates to the operative's responsibilities regarding potential accidents, health hazards and the environment whilst working in the workplace, in confined spaces, at height, with tools and equipment, with materials and substances, with movement and storage of materials, by manual handling and mechanical lifting and with mechanical access equipment

### **Maintenance**

- 7 operative care of hand tools, portable power tools and ancillary equipment
- 8 how and when maintenance should be carried out

**Methods of work**

---

- 9 application of knowledge for safe and healthy work practices, procedures and skills relating to the method and area of work and materials used to
  - 9.1 identify installation quality requirements
  - 9.2 conform to agreed specification
  - 9.3 confirm manufacturers' installation criteria
  - 9.4 ensure currency of calibration for levelling equipment
  - 9.5 assess suitability of background materials
  - 9.6 identify, recognise and work to gridlines and datum marks
  - 9.7 identify the types and characteristics of current rainscreen cladding materials, including, metal, clay, ceramic and laminate
  - 9.8 form internal and external angles
  - 9.9 form opening reveals
  - 9.10 install rainscreen wall cladding systems
  - 9.11 position and install panel hangers, drips, cover strips, fixings and fittings
  - 9.12 maintain the integrity of surfaces
  - 9.13 fit components around protrusions and penetrations
  - 9.14 position and secure flashings and vents
  - 9.15 check quality and suitability of work on completion and at the end of each working period
  - 9.16 recognise and determine when additional specialist skills and knowledge are required and report accordingly
  - 9.17 work from mobile elevating work platforms
  - 9.18 work with, around and in close proximity to plant and machinery
  - 9.19 use hand tools, portable power tools and equipment
  - 9.20 work at height
  - 9.21 use access equipment
- 10 team work and communication
- 11 needs of other occupations associated with installing rainscreen wall cladding systems

**Problems**

12 those arising from information, resources and methods of work

12.1 own authority to rectify

12.2 organisational reporting procedures

**Programme**

13 types of progress charts, timetables and estimated times

14 organisational procedures for reporting circumstances which will affect the work programme

**Protect work**

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

**Resources**

16 materials, components and equipment relating to types, quantity, quality, sizes and the sustainability of standard and specialist

16.1 fixings, fasteners, flashings, fittings, panel hangers, drips, cover strips, halters and spacer systems

16.2 insulation, fire stops, vapour control, separation and breather membranes

16.3 primers, cleaning agents, sealing tapes, sealants and fillers

16.4 metal and translucent sheets, built up, standing seam, secret fix, composite panels, decking panels and rainscreen panels and fibre cement systems

16.5 rainwater goods

16.6 hand tools, portable power tools and equipment

17 identify quantity, length, area and wastage associated with the method and procedure to install rainscreen wall cladding systems

**Security procedures**

18 site, workplace, company and operative

## COSVR184 – SQA Unit Code HN8H 04

### Install rainscreen wall cladding systems

#### Glossary:

---

**Sheeting and cladding** on roof and walls – a waterproof skin (multi layered) over a structure.

**Single skin** – one layer of either sinusoidal (corrugated) profiled steel, aluminium, Polyvinyl Chloride (PVC), Glass Reinforced Plastic (GRP), Poly carbonate or fibre cement sheeting that fits directly to roof or wall without insulation, this also applies to **trapezoidal** (box) profiled sheet of either of the above materials except fibre cement which is only available as sinusoidal profiles.

**Crown** – highest part of the profile.

**Trough or pan** – lowest part of the profile.

**Standing seam** – sheets with a raised seam usually made from steel or aluminium.

**Halter** – the fixing connecting the sheets together, **zipped**, and to the structure.

**Clip fix sheets** – a variant of raised seam and halter, made from the same material as the sheets but using hidden clips, **secret fix**, to secure them to the structure.

**Twin or double skin insulated systems** – utilise a lining sheet and **spacer** system to create a void for insulation, and all other forms of sheeting and cladding can be utilised to form the waterproof skin when fixed to the spacer.

**Composite panels** – also referred to as **sandwich panels**, are manufactured to fit to roofs and walls in a variety of profiles and configurations and comprise two layers of metal with an insulation core, some systems are only suitable for walls. These panels come in various configurations including **standing seam**.

**Decking** – a profiled sheet or tray that provides a base for another roof system.

**Structural panels** – metal profiled sheeting or trays designed to span beams and columns. Specific designs of composite panels can be used as structural components.

**Cladding materials made from:** ACM – Aluminium Composite Material, Aluminium, Brick slip, Ceramic, Copper, Fibre cement, Fibre concrete, GRC – Glassfibre Reinforced Concrete, GRP – Glass Reinforced Plastic, Polycarbonate, Glass (non vision) Monolithic Panels, Chromatics, HPL – high pressure laminate, Photovoltaic, Render, Stainless steel, Terracotta, Timber, Timber laminate, Thin stone, Weather boarding, Zinc.
