

LANCS59 - HY3E 04

Prepare and operate a powered vehicle with attachments

Overview

This standard covers the preparation and operation of a powered vehicle, such as ATVs, four wheel drives, quad bikes, skid-steers and bob-cats, with attachments. The standard does not cover the use of tractors with attachments.

The standard covers the use of a powered vehicle with a range of attachments in a variety of weather conditions, ground conditions and terrain. These conditions will have an impact on the handling and use of the vehicle.

When using a powered vehicle on the public highway you will need to hold the appropriate licenses for both yourself and the vehicle.

You must carry out your work in a way which will consider any impact on the natural environment.

This standard is suitable for anyone operating a powered vehicle with attachments on or off the public highway.

Prepare and operate a powered vehicle with attachments

Performance criteria

You must be able to:

- P1 wear appropriate clothing and personal protective equipment
- P2 prepare appropriate powered vehicle by carrying out pre-start checks and adjustments in accordance with specifications and in line with current legislation
- P3 confirm the powered vehicle is safe and ready for use
- P4 check and adjust operator environment to meet personal requirements
- P5 select appropriate attachments to carry out the required work
- P6 make sure attachments are suitable for the vehicle
- P7 make sure attachments are fitted securely and safely
- P8 make sure attachment is set or calibrated if required
- P9 check the immediate work area for hazards and obstacles before moving off
- P10 use the correct warning signals at all times
- P11 operate and manoeuvre the vehicle safely, and consistent with the type of vehicle, attachment and operation
- P12 use attachments safely at all times
- P13 make sure attachment is in transport position when not in use in accordance with manufacturers' instructions
- P14 modify operating procedures to take into account any changes in weather, ground conditions and types of terrain
- P15 maintain the efficiency of powered vehicle and attachment performance through the appropriate handling and use of the vehicle
- P16 deal with any hazards and obstacles encountered during operation in accordance with standard practice
- P17 monitor the operation of the attachment and recognise faults
- P18 stop and isolate powered vehicle on completion of activity in line with standard practice
- P19 remove attachment in accordance with specifications
- P20 leave the vehicle and attachment secure after use and in a suitable condition for future use
- P21 carry out all work in accordance with relevant environmental and health and safety legislation, risk assessment requirements, codes of practice and company policies

Knowledge and understanding

You need to know and understand:

- K1 how to select appropriate powered vehicle for the required activity and how to carry out pre-start checks and adjustments
- K2 different types of accessories available for powered vehicles and how they are secured
- K3 which vehicles are suitable to carry passengers
- K4 the type of clothing and personal protective equipment suitable for the activity
- K5 the types of safety equipment that should be available
- K6 current legislation in relation to the use of powered vehicles and attachments
- K7 how to mount and dismount safely
- K8 how to start and stop the vehicle
- K9 the function of all controls and instruments including the vehicle and attachment
- K10 types of attachments and how they should be secured and removed from the vehicle
- K11 types of attachments that are safe for use with the vehicle and those that are not
- K12 conditions that should be taken into account when considering the use of attachments
- K13 how to set or calibrate attachments where required
- K14 appropriate use of warning signals and indicators
- K15 the ways in which the vehicle and attachment should be operate and manoeuvred, and how different weather, ground conditions and terrain must be taken into account
- K16 how to operate and use attachments safely on the powered vehicle
- K17 how to put attachment into transport position and work position where appropriate
- K18 the capabilities of the vehicle and factors which may affect efficiency
- K19 types of hazards and obstacles which may be encountered and how these should be dealt with
- K20 how to monitor the operation of the attachment and actions that might be required
- K21 faults, defects and wearing parts that occur with attachments used in your place of work
- K22 how to preserve the efficiency of the vehicle and attachment through daily maintenance
- K23 how and where to refer problems with the vehicle or attachment
- K24 the reasons why the vehicle and attachment should be left in a suitable condition for future use
- K25 why it is important to maintain safety and security of the vehicle and attachment at all times

Glossary

Specifications:

- drawings
- schedules
- method statements
- Standard Operating Procedures (SOPs)
- manufacturers' guidelines
- customer requirements

Instructions could be verbal or written.

Powered vehicles include:

- ATVs
- four wheel drives
- quad bikes
- mules
- skid-steers
- bob-cats

Attachments include trailed or mounted equipment

Operator environment:

- seat
- steering wheel
- mirrors
- seat belt

Ground conditions:

- wet
- dry
- frost
- ice
- mud
- loose ground

Terrain:

- hard surfaces
- soft surfaces
- uneven surfaces
- slopes

Efficiency factors:

- gears
- hydraulics
- tyre pressure
- track condition
- brakes
- clutches
