

Conduct health and safety risk assessments of a workplace

Overview

This standard is for people carrying out risk assessments in the workplace. This could be an employer, line manager, supervisor, safety representative or employee.

It covers competences needed to identify hazards, evaluate risks and make recommendations to control risks and review results.

Conduct health and safety risk assessments of a workplace

Performance criteria

You must be able to:

1. define why and where risk assessments will be carried out
2. select appropriate methods for identifying hazards and evaluating risks following best practice
3. prioritise areas where hazards with potential for serious harm to health are most likely to occur following best practice
4. identify hazards that have potential to cause harm and/or loss following best practice
5. review internal and external standards and guidelines following standard operating procedures
6. confirm appropriate precautions are in place following best practice
7. assess levels of risk and record significant findings following best practice
8. consider and prioritise where further controls are required following standard operating procedures
9. present results and reasonably practicable recommendations of risk assessments to the responsible people
10. review and revise risk assessments following standard operating procedures
11. maintain suitable and sufficient records following standard operating procedures
12. take suitable action to control or remove imminent risks following best practice

Conduct health and safety risk assessments of a workplace

Knowledge and understanding

You need to know and understand:

1. relevant legal requirements and standards
