

Process fish or shellfish for retail sale

Overview

This standard covers hand-processing fish or shellfish for sale to customers. It covers the preparations you need to make so that you can process fish or shellfish and processing fish or shellfish by hand to produce products that are suitable to sell to customers. The standard involves working with common UK types of flat fish, round fish and shellfish.

You must be able to prepare to process fish or shellfish in a retail environment. You must also be able to process fish or shellfish using hand tools in a retail environment. You must also know how to address problems and adhere to regulatory standards and standard operating procedures and be able to apply your skills and knowledge within food safety and health and safety regulations and any relevant international industry codes. You should also have an understanding of how the green circular economy supports repeated use of resources and products within your organisation.

This standard is for you if you work in fish or shellfish processing and are involved in the processing in a retail environment.

Process fish or shellfish for retail sale
