Course outline

Course title: Advanced Higher Physical Education

SCQF: level 7 (32 SCQF credit points)

Course code: C756 77

Mandatory Units

H252 77 Physical Education: Performance Skills (Advanced Higher) 8 SCQF credit points
H254 77 Physical Education: Factors Impacting on Performance (Advanced Higher) 16 SCQF credit points

Course assessment 8 SCQF credit points

This Course includes eight SCQF credit points to allow additional time for preparation for Course assessment. The Course assessment covers the added value of the Course. Further information on the Course assessment is provided in the Assessment section.

Recommended entry

Entry to this Course is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by one or more of the following or equivalent qualifications and/or experience:

♦ Higher Physical Education Course

Progression

This Course or its Units may provide progression to:

♦ Higher National Diplomas in areas such as sports science, sports coaching, or health and fitness
♦ degrees in areas such as physical education, physical activity and health, sport and exercise science, health promotion, or sports psychology
♦ further study, employment and/or training related to personal training or health promotion

Other progression pathways are also possible, including progression to other qualifications at the same or different levels.

Further details are provided in the Rationale section.
Equality and inclusion

This Course Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information, please refer to the Course/Unit Support Notes.
Rationale

All new and revised National Courses reflect Curriculum for Excellence values, purposes and principles. They offer flexibility, provide more time for learning, more focus on skills and applying learning, and scope for personalisation and choice.

In this Course, and its component Units, there will be an emphasis on skills development and the application of those skills. Assessment approaches will be proportionate, fit for purpose and will promote best practice, enabling learners to achieve the highest standards they can.

This Course provides learners with opportunities to continue to acquire and develop the attributes and capabilities of the four capacities as well as skills for learning, skills for life and skills for work.

All Courses provide opportunities for learners to develop breadth, challenge and application, but the focus and balance of the assessment will be appropriate for the subject area.

Relationship between the Course and Curriculum for Excellence values, purposes and principles

In this Course, learners are provided with opportunities to actively develop their movement and performance skills through the application of knowledge and understanding of the mental, emotional, social and physical factors which impact on performance.

This Course enables all learners to develop physical skills, techniques and abilities through challenging and enjoyable activities. Throughout the Course, learners' mental, emotional, social and physical capacity will be developed by participating in physical activities. The Course provides opportunities for learners to demonstrate and reflect on attitudes, values and behaviours in the context of physical activities.

Throughout the Course there will be opportunities for learners to develop their independence and take responsibility for their own learning. The Course also enables learners to work co-operatively, as they apply higher order thinking skills, including research, analysis, evaluation and decision-making skills, to develop personal, group or team performances. Learners will gather information and use advanced communication skills to present findings.

Learners will be able to effectively contribute in challenging contexts as they develop their ability to apply higher level techniques, and reflect on the performance of self and/or others to justify modifications by reasoned evaluation. The competencies obtained during the Course will enable learners to progress confidently into further study, employment or training.

The Course also promotes mental, emotional, social and physical wellbeing. The Physical Education Course will influence and enhance confidence, resilience, reciprocity and responsibility, and will provide opportunities for personal achievement.
Purpose and aims of the Course

The main purpose of the Course is to research and analyse factors which underpin and impact on performance, and use this knowledge to develop their own performance or that of others. To do this effectively, learners will engage in research and undertake independent investigative work, and develop skills of analysis, evaluation, and communication.

During the Course, learners will also understand how to develop consistency of performance in challenging environments and become proficient in their ability to analyse and apply strategies and techniques to make appropriate decisions about their personal performance.

The range of skills developed in the Course will allow learners to work confidently and independently. By actively participating in physical activities, learners can demonstrate initiative, decision-making and problem-solving abilities — attributes which are applicable to both life and work.

The Course has six broad and inter-related aims to enable learners to:

- investigate and evaluate how a range of factors impact on performance
- understand and apply methods to develop performance
- develop independent research and investigation skills to analyse how skills, techniques and strategies combine to produce effective performance
- select and apply a range of movement and performance skills, by making informed decisions during high-level performance
- carry out high-level personal performance in a selected physical activity
- analyse and evaluate the process of performance development

Learners will be able to appreciate the demands of high-level performance, in particular the mental, emotional, social and physical demands, and make effective decisions as they select, combine and adapt skills and techniques.

Information about typical learners who might do the Course

The Course is suitable for learners who have an interest in and enthusiasm for developing performance in physical activity. The Course builds on the knowledge and understanding and practical skills developed by the learner in the Higher Physical Education Course or equivalent courses. The Course will also appeal to learners who desire to have more independence and responsibility for their learning as, at this level, the context of study and performance are complex and challenging. The flexible context and breadth of learning experiences offered within the Course will appeal to a variety of learners.

Learners progressing on to the Course will find that it provides opportunities to further develop knowledge and understanding of skills relevant to pursuing study or career options related to physical education, to broaden their learning experience and contribute to their own health and wellbeing. They will also continue to develop a range of skills for learning, skills for life and skills for work.

Skills developed on the Course will include skills of: research and analysis; selecting, applying and evaluating complex performance skills; performance development
planning; decision-making and problem-solving; selecting and applying approaches for enhancing performance; and the development of effective personal and interpersonal skills.

On successful completion of the Course, some learners may wish to pursue further study and/or career options related to physical education, such as Higher National Diplomas in sports science, sports coaching or health and fitness, or degrees in areas such as physical education, physical activity and health, sport and exercise science, health and fitness and physiotherapy. Others may wish to engage in training or employment related to personal training or health promotion.
Course structure and conditions of award

Course structure
The main purpose of the Course is to develop performance through research and analysis of factors which underpin and impact on performance. Through analysis and evaluation, learners will apply strategies, techniques and skills which will enable them to build on and enhance performance.

Each Unit of the Course helps the learner develop skills, knowledge and understanding, which will be integrated and applied in the Course assessment.

The Units are designed to stand alone or be taught in any sequence. There will be many naturally occurring opportunities of applying knowledge to enhance performance which allow for integration of Unit learning and teaching opportunities and cross-assessment.

Units are statements of standards for assessment and not programmes of learning and teaching. They can be delivered in a number of ways.

The Course has two mandatory Units.

**Physical Education: Performance Skills (Advanced Higher)**
In this Unit, learners will develop their movement and performance by selecting and consistently applying an appropriate repertoire of skills and techniques in chosen activities. They will learn how to problem solve and make effective decisions, while adapting these skills and techniques in challenging performance contexts.

Learners will develop consistency in the precision, control and fluency of movement; and their body management, particularly spatial awareness, will be enhanced through the study of this Unit. They will also learn how to react to the mental, emotional, social and physical demands of their personal performance, as they apply compositional, technical and tactical awareness within challenging performance contexts. The Unit offers considerable opportunity for personalisation of physical activity.

**Physical Education: Factors Impacting on Performance (Advanced Higher)**
In this Unit, learners will develop their independent research, analytical, and evaluative skills by investigating a range of factors which have an impact on performance in physical activities. Learners will investigate and consider how mental, emotional, social and physical factors can positively and/or negatively affect performance.

As learners deepen their knowledge and understanding of factors which underpin performance development, their awareness of these factors is consolidated through independent research. Learners will reflect on performance development plans and evaluate the effect of the factors from their research. The Unit offers opportunities for personalisation within a range of contexts.

**Conditions of award**
To gain the award of the Course, the learner must pass all of the Units as well as the Course assessment. The required Units are shown in the Course outline section. Course assessment will provide the basis for grading attainment in the Course award.
**Skills, knowledge and understanding**

Further information on the assessment of skills, knowledge and understanding for the Course is given in the *Course Assessment Specification*. A broad overview of the mandatory subject skills, knowledge and understanding that will be assessed in the Course is given in this section.

These cover:

- applying a range of movement and performance skills during a high-level single performance
- making decisions during a high-level single performance
- demonstrating independent research and investigation skills
- investigating how factor(s) impact on performance
- understanding and applying methods to develop performance
- analysing and evaluating the process of performance development

Skills, knowledge and understanding to be included in the Course will be appropriate to the SCQF level of the Course. The SCQF level descriptors give further information on characteristics and expected performance at each SCQF level ([www.sqa.org.uk/scqf](http://www.sqa.org.uk/scqf)).
Assessment

Information about assessment for the Course is included in the Course Assessment Specification, which provides full details including advice on how a learner’s overall attainment for the Course will be determined.

Unit assessment

All Units are internally assessed against the requirements shown in the Unit Specification.

They can be assessed on a Unit-by-Unit basis or by combined assessment.

They will be assessed on a pass/fail basis within centres. SQA will provide rigorous external quality assurance, including external verification, to ensure assessment judgments are consistent and meet national standards.

The assessment of the Units in this Course will be as follows.

Physical Education: Performance Skills (Advanced Higher)

Learners will be required to provide evidence of the development of their movement and performance by selecting and consistently applying an appropriate repertoire of skills and techniques in chosen activity. Learners will also demonstrate evidence of their ability to react to the mental, emotional, social and physical demands of performance, as they apply compositional, technical or tactical awareness within challenging performance contexts. The Unit offers opportunity for personalisation in choice of physical activity.

Physical Education: Factors Impacting on Performance (Advanced Higher)

Learners will be required to provide evidence of their knowledge and understanding of factors which underpin performance development through independent research. Learners will reflect on performance development plans, evaluate the effect of the factors and justify modifications to the performance development plans from their research. The Unit offers opportunities for personalisation and choice within a range of contexts.

Course assessment

Courses from National 4 to Advanced Higher include assessment of added value\(^1\). At National 5, Higher and Advanced Higher, the added value will be assessed in the Course assessment. The added value for the Course must address the key purposes and aims of the Course, as defined in the Course rationale. It will do this by addressing one or more of breadth, challenge or application.

\(^1\) Definitions can be found here: [www.sqa.org.uk/sqa/58409.html](http://www.sqa.org.uk/sqa/58409.html)
In the Advanced Higher Physical Education Course, added value will focus on:

- challenge
- application

The learner will be assessed by a performance and a project\(^2\). Together they will add challenge and application to the Course as the learner will integrate, extend and apply the skills, knowledge and understanding they have learned during the Course.

In the performance, the learner will effectively perform in a high-level environment. The choice of physical activity will allow for personalisation and choice.

The project will require application of research findings, knowledge and understanding to the investigation of a topic designed to develop an aspect of performance development.

\(^2\) See link above for definitions.
Development of skills for learning, skills for life and skills for work

It is expected that learners will develop broad, generic skills through this Course. The skills that learners will be expected to improve on and develop through the Course are based on SQA’s Skills Framework: Skills for Learning, Skills for Life and Skills for Work and drawn from the main skills areas listed below. These must be built into the Course where there are appropriate opportunities.

1  Literacy
   1.1 Listening and talking

3  Health and wellbeing
   3.2 Emotional wellbeing
   3.3 Physical wellbeing

4  Employability, enterprise and citizenship
   4.3 Working with others

5  Thinking skills
   5.3 Applying
   5.4 Analysing and evaluating

Amplification of these skills is given in SQA’s Skills Framework: Skills for Learning, Skills for Life and Skills for Work. The level of these skills will be appropriate to the level of the Course. Further information on building in skills for learning, skills for life and skills for work for the Course is given in the Course Support Notes.
