

## National Unit specification

### General information

**Unit title:** Single Lap Roof Tiling: An Introduction (SCQF level 4)

**Unit code:** DD1T 10

**Superclass:** TG

**Publication date:** April 2016

**Source:** Scottish Qualifications Authority

**Version:** 02

### Unit purpose

This Unit will be suitable for learners who have limited or no knowledge of roofing practices. The Outcomes require the learner to set out elementary roofing projects, apply craft skills using single lap tiles and maintain a positive working relationship with members of a team whilst engaging in planning, organising, preparing and setting out a roof to be covered with single lap tiles. Learners who achieve this Unit should feel confident in undertaking basic roof tiling skills and in progressing to Units based on other pitched roofing disciplines when competences gained in this Unit will be further developed and applied.

### Outcomes

On successful completion of the Unit the learner will be able to:

- 1 Prepare roof surface prior to tiling.
- 2 Fix single lap tiles to a pitched roof surface to incorporate a dry ridge and dry verge.
- 3 Identify tools, materials and dry fixing systems used for single lap tiling.

### Credit points and level

0.5 National Unit credit at SCQF level 4: (3 SCQF credit points at SCQF level 4)

### Recommended entry to the Unit

Access to this Unit is at the discretion of the centre. It would be beneficial if the learner had an aptitude for craft skills.

## **National Unit specification: General information (cont)**

**Unit title:** Single Lap Roof Tiling: An Introduction (SCQF level 4)

### **Core Skills**

Opportunities to develop aspects of Core Skills are highlighted in the Support Notes for this Unit specification.

There is no automatic certification of Core Skills or Core Skill components in this Unit.

### **Context for delivery**

If this Unit is delivered as part of a Group Award, it is recommended that it should be taught and assessed within the subject area of the Group Award to which it contributes.

### **Equality and inclusion**

This Unit specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence.

Further advice can be found on our website [www.sqa.org.uk/assessmentarrangements](http://www.sqa.org.uk/assessmentarrangements).

## **National Unit specification: Statement of standards**

### **Unit title:** Single Lap Roof Tiling: An Introduction (SCQF level 4)

Acceptable performance in this Unit will be the satisfactory achievement of the standards set out in this part of the Unit specification. All sections of the statement of standards are mandatory and cannot be altered without reference to SQA.

#### **Outcome 1**

Prepare roof surface prior to tiling.

##### **Performance Criteria**

- (a) Underlay is fixed to the roof surface correctly.
- (b) Counter battens are fixed correctly.
- (c) Tile battens are fixed correctly.

#### **Outcome 2**

Fix single lap tiles to a pitched roof surface to incorporate a dry ridge and dry verge.

##### **Performance Criteria**

- (a) The eaves course is fixed to the roof surface correctly.
- (b) The main roof surface is tiled correctly.
- (c) Dry ridge and dry verge system installed as per manufacturers' instructions.

#### **Outcome 3**

Identify tools, materials and dry fixing systems used for single lap tiling.

##### **Performance Criteria**

- (a) Roofing tools used for single lap tiling are correctly identified.
- (b) Materials used for single lap tiling are correctly identified.
- (c) Materials used for dry ridge and dry verge systems are correctly identified.
- (d) Terms and simple calculations associated with single lap tiles are applied correctly.

## **National Unit specification: Statement of standards (cont)**

**Unit title:** Single Lap Roof Tiling: An Introduction (SCQF level 4)

### **Evidence Requirements for this Unit**

Evidence is required to demonstrate that learners have achieved all Outcomes and Performance Criteria.

Learners must adhere to relevant Health and Safety regulations and legislation relating both to working practices within the construction environment, as well as those specific to any practical task they are requested to carry out (such as emphasising the importance of selecting and using the correct PPE at all times).

#### **Outcome 1**

Evidence of actual performance is required to show the learner can prepare a pitched roof surface prior to single lap tiling.

#### **Outcome 2**

Evidence of actual performance is required to show the learner can fix single lap tiles to a pitched roof.

#### **Outcome 3**

Oral/written evidence is required to show the learner can:

- (a) Identify roofing tools and materials used for single lap roof tiling.
- (b) Demonstrate the correct use of terminology in single lap tiling and perform simple calculations.

## **National Unit Support Notes**

**Unit title:** Single Lap Roof Tiling: An Introduction (SCQF level 4)

Unit Support Notes are offered as guidance and are not mandatory.

While the exact time allocated to this Unit is at the discretion of the centre, the notional design length is 20 hours.

### **Guidance on the content and context for this Unit**

This Unit is designed to introduce the learners to skills associated with introductory roofing, in particular single lap tiling. It includes planning, organising, setting out and completing introductory projects of single lap tiling. The learner will work in pairs in order to complete the project. Effective participation with others forms an important aspect of this Unit.

Prescriptive practical models are not outlined within the Unit specification in order to allow centres to develop projects suitable to their particular situation.

It is expected that learners will have no or little experience of roof work prior to this Unit.

### **Guidance on approaches to delivery of this Unit**

Outcomes 1 and 2 are practical activities and as such form the basis of the practical project, which should be completed on a simulated roof structure, of such a size to allow realistic approaches to single lap roof tiling. It is recommended that the learners should be encouraged to work in pairs in order to simulate a 'real' roofing project. The project will be deemed to be completed by the learners when the appropriate standards are achieved. As these Outcomes are of a practical nature appropriate safe working practices should be encouraged and the relevant health and safety regulations must be complied with at all times in order to achieve the standards required to achieve the Outcomes.

The opportunity should be taken to explain the types of faults that may appear on a roof such as protruding nails, holes and other defects prior to roof tiling, however this should not be assessed.

Outcome 3 can be integrated into the workshop situation during the practical activities where instruction and discussion methods could be used. Alternatively this may be better achieved and learned as underpinning knowledge in a classroom situation.

## National Unit Support Notes (cont)

**Unit title:** Single Lap Roof Tiling: An Introduction (SCQF level 4)

### Guidance on approaches to assessment of this Unit

Centres may use the method of assessment which they consider to be most appropriate but are encouraged to use the Training Assessment Programme (TAP) developed centrally by SQA. It is expected that learners will have to demonstrate current knowledge and understanding of safe working practice and risk assessment methods, etc prior to being set the assessment tasks.

Knowledge and Understanding of the processes involved in *Single Lap Roof Tiling: An Introduction (SCQF level 4)* should be assessed before any practical assignments are carried out by learners. This will include assessment of a learner's ability to prepare the work area for laying modular pavement.

Practical assignments should be carried out under supervised conditions and recorded in an assessor observation/operational checklist. Assessments should confirm that a learner has the ability to safely lay modular pavement using designated machinery or equipment correctly and safely, whilst adhering to current statutory Health and Safety regulations and legislation.

Adherence to current statutory working regulations and Health and Safety procedures will be observed during the practical exercise carried out by the learner towards all Outcomes.

Detailed assessment material for this Unit will be found in the relevant Training and Assessment Programme (TAP). Centres may use the instruments of assessment which they consider to be most appropriate but are advised to use the TAP which has been developed centrally by SQA. Any other instruments of assessment used must be comparable to the TAP and have been prior verified.

### Opportunities for e-assessment

E-assessment may be appropriate for some assessments in this Unit. By e-assessment we mean assessment which is supported by Information and Communication Technology (ICT), such as e-testing or the use of e-portfolios or social software. Centres which wish to use e-assessment must ensure that the national standard is applied to all learner evidence and that conditions of assessment as specified in the Evidence Requirements are met, regardless of the mode of gathering evidence. The most up-to-date guidance on the use of e-assessment to support SQA's qualifications is available at [www.sqa.org.uk/e-assessment](http://www.sqa.org.uk/e-assessment).

## National Unit Support Notes (cont)

**Unit title:** Single Lap Roof Tiling: An Introduction (SCQF level 4)

### Opportunities for developing Core and other essential skills

There are opportunities to develop aspects of the Core Skill of *Problem Solving*. Learners will need to take account of a range of factors in order to work efficiently and safely, such as the choice of tools, appropriate materials, safety issues, safety equipment and sustainability.

*Numeracy* skills at SCQF level 4 could be developed through roofing calculations for area and material estimating.

Opportunities also arise for learners to develop the Core Skill of *Information and Communication Technology (ICT)* at SCQF level 3 through researching roofing terminology and techniques on the internet, spread sheets for materials information, e-learning and e-assessment.

## History of changes to Unit

## General information for learners

### Unit title: Single Lap Roof Tiling: An Introduction (SCQF level 4)

This section will help you decide whether this is the Unit for you by explaining what the Unit is about, what you should know or be able to do before you start, what you will need to do during the Unit and opportunities for further learning and employment.

This Unit is designed to introduce you to skills required by craft persons working in the construction industry as roofers. The Unit will focus on basic skills and associated tasks involved in the application of plaster. Little or no experience is required of working with the range of tools, materials and equipment.

Health and Safety and Sustainability are integral and key to the Construction Industry therefore throughout the Unit emphasis will be placed where appropriate on the application of Health and Safety and Sustainability. Safety working practices will be looked at in accordance with current safety codes of practice and regulations.

There will be a series of training exercises followed by some practical task based assessment and multi choice knowledge assessment. Completion of the Unit will provide you with the basic skills necessary to enable you to progress to more complex aspects of Plasterwork which in turn will further develop your skills and knowledge.

The Core Skill of *Problem Solving* could be developed as you undertake this Unit. You will need to take account of a range of factors in order to work efficiently and safely, such as the choice of tools, appropriate materials, safety issues, safety equipment and sustainability.

*Numeracy* at SCQF level 4 could be developed through measuring and costing exercises.

There will be opportunities for you to develop the Core Skill of *Communication* at SCQF level 4 as you will have the opportunity to develop Written and/or Oral Communication skills.
