

## National Unit specification: general information

**Unit title:** Apply Surface Finishes to External Wall Insulation (SCQF level 5)

**Unit code:** H0V5 11

**Superclass:** TG

**Publication date:** March 2012

**Source:** Scottish Qualifications Authority

**Version:** 01

## Summary

This Unit provides candidates with an introduction to the key principles and techniques of applying surface finishes to external wall insulation. It will develop candidates understanding and practical skills for preparing the work area and applying various surface finishes to external wall surface insulation areas. This Unit is suitable for candidates working towards a Modern Apprenticeship in the Construction Operative and Specialist suite.

## Outcomes

- 1 Identify the requirements for applying surface finishes to external wall insulation.
- 2 Explain how to prepare to apply surface finishes.
- 3 Apply external finishes in accordance with the given work specification.

## Recommended entry

Entry is at the discretion of the centre. Candidates undertaking this Unit in a Group Award (NPA) as part of a Modern Apprenticeship (MA) must meet the requirements of the MA which include being employed in the relevant construction industry.

## Credit points and level

5 National Unit credits at SCQF level 5: (30 SCQF credit points at SCQF level 5\*)

*\*SCQF credit points are used to allocate credit to qualifications in the Scottish Credit and Qualifications Framework (SCQF). Each qualification in the Framework is allocated a number of SCQF credit points at an SCQF level. There are 12 SCQF levels, ranging from Access 1 to Doctorates.*

## **General information (cont)**

**Unit title:** Apply Surface Finishes to External Wall Insulation (SCQF level 5)

### **Core Skills**

Achievement of this Unit gives automatic certification of the following:

Complete Core Skill            None

Core Skill component        Critical Thinking at SCQF level 4

There are also opportunities to develop aspects of Core Skills which are highlighted in the Support Notes of this Unit Specification.

## **National Unit specification: statement of standards**

**Unit title:** Apply Surface Finishes to External Wall Insulation (SCQF level 5)

Acceptable performance in this Unit will be the satisfactory achievement of the standards set out in this part of the Unit specification. All sections of the statement of standards are mandatory and cannot be altered without reference to SQA.

### **Outcome 1**

Identify the requirements for applying surface finishes to external wall insulation.

#### **Performance Criteria**

- (a) Interpret information, drawings for the given work specification for the task.
- (b) Calculate the quantity and type of materials required for the specified task.
- (c) Identify the hand or powered tools and equipment for the work.

### **Outcome 2**

Explain how to prepare to apply surface finishes.

#### **Performance Criteria**

- (a) Explain the methods for measuring and marking out the work area in accordance with the given specification.
- (b) Explain how to prepare the work area and protect the surrounding area for the given task.
- (c) Explain how to remove obstructions from the work area.
- (d) Explain suitable techniques for checking the work area is suitable for surface finishes.

### **Outcome 3**

Apply external finishes in accordance with the given work specification.

#### **Performance Criteria**

- (a) Prepare the surface finish with appropriate tools and equipment.
- (b) Apply external wall finishes in accordance with the given specification.
- (c) Fix corner and surface beads and apply reinforcing mesh in accordance with the given work specification.

## National Unit specification: statement of standards (cont)

**Unit title:** Apply Surface Finishes to External Wall Insulation (SCQF level 5)

### Evidence Requirements for this Unit

Evidence is required to demonstrate that the candidate has achieved this Unit to the standard specified in the Outcomes and Performance Criteria. Candidate training and assessment should take place in as realistic an environment as possible to that of a live working site.

Performance and knowledge evidence is required to demonstrate that the candidate has achieved the standard specified in the Outcomes and Performance Criteria.

Performance and knowledge evidence must be produced at an appropriate point in training under supervised conditions once the candidate has developed the necessary skills and knowledge required to carry out the assessment. This evidence must be supplemented with a completed assessor observational/operational checklist.

Evidence must be demonstrated by the candidate applying surface finishes to external wall insulation using three of the following finishes:

- ◆ Mortar finishes
- ◆ Dash finishes
- ◆ Proprietary pre-case finishes
- ◆ Paint finishes
- ◆ Synthetic renders
- ◆ Sealants
- ◆ Corner and surface beads
- ◆ Reinforcing mesh
- ◆ Fixings
- ◆ Fittings

Candidates must adhere to relevant Health and Safety regulations and legislation relating both to working practices within the construction environment, as well as those specific to any practical task they are requested to carry out (such as emphasising the importance of selecting and using the correct PPE at all times).

As part of the assessment for this Unit, the candidate will also produce evidence of a method statement and a completed risk assessment for a specified training activity. Oral or written evidence of knowledge and understanding may be demonstrated by the candidate during practical assignments set for all Outcomes and Performance Criteria and noted at the time by the training assessor.

## **National Unit specification: support notes**

**Unit title:** Apply Surface Finishes to External Wall Insulation (SCQF level 5)

This part of the Unit specification is offered as guidance. The support notes are not mandatory.

While the exact time allocated to this Unit is at the discretion of the centre, the notional design length is 200 hours.

### **Guidance on the content and context for this Unit**

The Outcomes and Performance Criteria for this Unit can be demonstrated by the candidate applying surface finishes to external wall insulation using three of the following finishes:

- ◆ Mortar finishes
- ◆ Dash finishes
- ◆ Proprietary pre-case finishes
- ◆ Paint finishes
- ◆ Synthetic renders
- ◆ Sealants
- ◆ Corner and surface beads
- ◆ Reinforcing mesh
- ◆ Fixings
- ◆ Fittings

The content and context of this Unit has been set at an introductory level so that the candidate can develop a basic knowledge and ability in applying surface finishes to external wall insulation within a construction environment.

Health and Safety are vital to working practices within the construction industry and therefore, emphasis will be placed wherever appropriate during the delivery of this Unit on the correct application of Health and Safety principles and processes, in accordance with current codes of practice and legislation

### **Guidance on learning and teaching approaches for this Unit**

These notes are for guidance purposes only, and are not to be considered as a complete training package for centres to follow.

The introductory training for this Unit should take place in a separate training area independent of the productive work environment and using dedicated equipment and resources. This should cover theoretical and practical principles before any practical application of knowledge is carried out by candidates.

## **National Unit specification: support notes (cont)**

**Unit title:** Apply Surface Finishes to External Wall Insulation (SCQF level 5)

Delivery of this Unit will be focussed on enabling candidates to develop the knowledge required for applying surface finishes to external wall insulation safely before they are given the opportunity to do so within the workplace environment. Candidates should learn and be encouraged to communicate the theories and principles behind good application techniques. Delivery of this Unit should also ensure candidates learn about the different components of surface finishing and external wall insulation, using the correct terminology and understanding the correct tools, equipment and materials to be used for specified systems, before any practical work takes place. Emphasis will also be placed on the importance of candidates accurately understanding and interpreting the information provided within work specifications and drawings.

During delivery of the practical components of this Unit, candidates should understand the importance of ensuring good visibility at all times when operating tools and machinery.

E-learning approaches may be appropriate to help tailor delivery to suit the individual needs or learning styles of candidates. This might include, for example, encouraging learners to use electronic resources to conduct research into a specific knowledge area.

Opportunities for integrated delivery of the Core Skills and knowledge developed in other Units may be possible within the practical activities in this Unit.

### **Guidance on approaches to assessment for this Unit**

Centres may use the method of assessment which they consider to be most appropriate but are encouraged to use the Training Assessment Programme (TAP) developed centrally by SQA. It is expected that candidates will have to demonstrate current knowledge and understanding of safe working practice and risk assessment methods, etc prior to being set the assessment tasks.

Knowledge and understanding of the processes involved in applying surface finishes to external wall insulation should be assessed before any practical assignments are carried out by candidates. This will include assessment of a candidate's ability to prepare the work area for applying surface finishes to external wall insulation.

Practical assignments should be carried out under supervised conditions and recorded in an assessor observation/operational checklist. Assessments should confirm that a candidate has the ability to safely carry out basic external wall insulation surface finishes using designated machinery or equipment correctly and safely, whilst adhering to current statutory Health and Safety regulations and legislation.

Adherence to current statutory working regulations and Health and Safety procedures will be observed during the practical exercise carried out by the candidate towards all Outcomes.

## National Unit specification: support notes (cont)

**Unit title:** Apply Surface Finishes to External Wall Insulation (SCQF level 5)

Detailed assessment material for this Unit will be found in the relevant Training and Assessment Programme (TAP). Centres may use the instruments of assessment which they consider to be most appropriate but are advised to use the TAP which has been developed centrally by SQA. Any other instruments of assessment used must be comparable to the TAP and have been prior verified.

### Opportunities for the use of e-assessment

E-assessment may be appropriate for some assessments in this Unit. By e-assessment we mean assessment which is supported by Information and Communication Technology (ICT), such as e-testing or the use of e-portfolios or e-checklists. Centres which wish to use e-assessment must ensure that the national standard is applied to all candidate evidence and that conditions of assessment as specified in the Evidence Requirements are met, regardless of the mode of gathering evidence. Further advice is available in *SQA Guidelines on Online Assessment for Further Education (AA1641, March 2003)*, *SQA Guidelines on e-assessment for Schools (BD2625, June 2005)*.

### Opportunities for developing Core Skills

Candidates will apply the Core Skill of *Numeracy* (SCQF level 3) when calculating the quantity of materials required for the specified task. Preparing the work area to reduce the potential for damage of the surrounding area will involve key aspects of the Core Skill of *Problem Solving* (SCQF level 3).

The opportunity for the Core Skill *Working with Others* (SCQF level 3) will be provided as candidates ensure the safety of others as they comply with codes of practice and working regulations. Throughout this Unit, candidates will be expected to develop the Core Skill of *Communication* (SCQF level 3) within the work environment, for example to inform others of any safety considerations, using the correct terminology and a tone appropriate to the workplace environment. In addition, assessment processes may enable candidates the opportunity to develop their written communication skills.

This Unit has the Critical Thinking component of Problem Solving embedded in it. This means that when candidates achieve the Unit, their Core Skills profile will also be updated to show they have achieved Critical Thinking at SCQF level 4.

### Disabled candidates and/or those with additional support needs

The additional support needs of individual candidates should be taken into account when planning learning experiences, selecting assessment instruments, or considering whether any reasonable adjustments may be required. Further advice can be found on our website [www.sqa.org.uk/assessmentarrangements](http://www.sqa.org.uk/assessmentarrangements)
