

National Unit specification: general information

Unit title: Textile Floorcoverings: An Introduction

Unit code: H3PF 11

Superclass: TG

Publication date: April 2013

Source: Scottish Qualifications Authority

Version: 01

Summary

The Unit is suitable for candidates with no experience in the subject area and will introduce them to the skills and techniques needed for the installation of textile floorcoverings. It develops knowledge and awareness of the various materials, tools and equipment used in the installation of textile floorcoverings on an assortment of diverse surfaces. It also develops knowledge and awareness of measuring and calculating work areas for selected materials and marking out and positioning selected materials to work areas.

Throughout the Unit, candidates will develop the skills to identify any potential hazards and will adhere to health and safety, sustainability and waste management regulations and legislation at all times.

This is an optional Unit in the National Progression Award in Construction at SCQF level 5 (G8H4 45) but is also available as a freestanding Unit. This Unit is suitable for candidates who are working towards a Modern Apprenticeship in the Construction Craft Occupations suite or who wish to obtain a basic knowledge of textile floorcoverings.

Outcomes

- 1 Identify terminology and practices used in the installation of textile floorcoverings
- 2 Prepare area for the installation of textile floorcoverings
- 3 Install textile floorcoverings to work area

Recommended entry

While entry is at the discretion of the centre, basic numeracy and problem solving would be beneficial.

General information (cont)

Unit title: Textile Floorcoverings: An Introduction

Credit points and level

1 National Unit credit at SCQF level 5: (6 SCQF credit points at SCQF level 5*).

**SCQF credit points are used to allocate credit to qualifications in the Scottish Credit and Qualifications Framework (SCQF). Each qualification in the Framework is allocated a number of SCQF credit points at an SCQF level. There are 12 SCQF levels, ranging from Access 1 to Doctorates.*

Core Skills

Achievement of this Unit gives automatic certification of the following Core Skills component:

Complete Core Skill	None
Core Skill component	Critical Thinking at SCQF level 5 Planning and Organising at SCQF level 5

There are also opportunities to develop aspects of Core Skills which are highlighted in the Support Notes of this Unit specification.

National Unit specification: statement of standards

Unit title: Textile Floorcoverings: An Introduction

Acceptable performance in this Unit will be the satisfactory achievement of the standards set out in this part of the Unit specification. All sections of the statement of standards are mandatory and cannot be altered without reference to SQA.

Outcome 1

Identify terminology and practices used in the installation of textile floorcoverings.

Performance Criteria

- (a) Identify and select terminology related to the installing of textile floorcoverings
- (b) Identify and select practices relating to the installing of textile floorcoverings
- (c) Identify methods used to install textile floorcoverings

Outcome 2

Prepare area for the installation of textile floorcoverings.

Performance Criteria

- (a) Interpret drawings/plans and instruments for the given task
- (b) Using appropriate methods and techniques, evaluate floor moisture content
- (c) Scrape and sweep area and clean off any contaminants present
- (d) Prepare background surface using appropriate background materials
- (e) Install interlays and/or underlays and accessories appropriate for installation
- (f) Minimise damage to the surrounding work area

Outcome 3

Install textile floorcoverings to work area.

Performance Criteria

- (a) Use appropriate methods to measure and mark out work area
- (b) Select the required quantity of materials, equipment and tools required for given task
- (c) Measure and set out work area for the installation of textile floorcoverings
- (d) Install textile floorcoverings to work area
- (e) Minimise damage to the work area

National Unit specification: statement of standards (cont)

Unit title: Textile Floorcoverings: An Introduction

Evidence Requirements for this Unit

Evidence is required to demonstrate that the candidates have achieved this Unit to the standard specified in all Outcomes and Performance Criteria.

For Outcome 1, written and/or oral recorded evidence is required to demonstrate candidates' knowledge of terminology of terminology, construction practices, tools, equipment and work methods relating to the installation of textile floorcoverings. Assessment will be conducted under controlled, closed-book, supervised conditions.

For Outcomes 2 and 3, product and performance evidence is required to demonstrate that candidates can prepare an area for the installation of textile floorcoverings and install textile floorcoverings. Assessment should be conducted under controlled, supervised conditions.

Using the correct equipment and materials, candidates will install textile floorcoverings through the interpretation of drawings, specifications, schedules and manufacturers' information related to the work to be carried out.

Performance evidence will include candidates setting out and installing textile floorcoverings on all of the following:

- ◆ Solid floor
- ◆ Hollow timber floor
- ◆ Horizontal surface
- ◆ Inclined surface
- ◆ Stepped surface
- ◆ Regular and irregular areas

At all times candidates must comply with current health, safety and welfare, sustainability and waste management requirements and legislation. This includes the selection and use of appropriate personal protective equipment.

National Unit specification: support notes

Unit title: Textile Floorcoverings: An Introduction

This part of the Unit specification is offered as guidance. The Support Notes are not mandatory.

While the exact time allocated to this Unit is at the discretion of the centre, the notional design length is 40 hours.

Guidance on the content and context for this Unit

This is an optional Unit in the National Progression Award in Construction at SCQF level 5 (G8H4 45) but is also available as a freestanding Unit.

The Outcomes and Performance Criteria for this Unit can be demonstrated by the candidate understanding how to set out and install textile floorcoverings for all of the following:

- ◆ Horizontal surfaces
- ◆ Inclined surfaces
- ◆ Stepped surfaces
- ◆ Regular and irregular areas
- ◆ Solid floors
- ◆ Hollow timber floors

The content of the Unit is set at an introductory level so that candidates can develop a basic knowledge and ability in installing textile floorcoverings within a construction environment.

Health and safety, sustainability and waste management are vital to working practices within the construction industry. Wherever appropriate during the delivery of this Unit, an emphasis will be placed on the correct application of health and safety, sustainability and waste management principals and processes, in accordance with current codes of practice and legislation.

Guidance on learning and teaching approaches for this Unit

Candidates should be given the opportunity to further develop their skills in floorcovering by learning about textile floorcovering and its principles. Candidate centred learning and teaching approaches are encouraged with candidates actively participating in practical activities after lecturer demonstration of key construction practices and principles.

The introductory training for this Unit should take place in a separate training area independent of the productive work environment and using dedicated equipment and resources. This should cover theoretical and practical principles before any practical application of knowledge is carried out by the candidate.

Delivery of this Unit will be focussed on enabling candidates to develop the knowledge required to install textile floorcoverings safely before they are given the opportunity to do so within the workplace environment. Candidates should learn and be encouraged to communicate the theories and principles behind good construction techniques. Delivery of this Unit should also ensure candidates learn about different materials, are able to use correct terminology and understand the correct tools, equipment and materials to be used for specified systems, before any practical work takes place. Emphasis will also be placed on the importance of candidates accurately understanding and interpreting the information provided within work specifications and drawings.

National Unit specification: support notes (cont)

Unit title: Textile Floorcoverings: An Introduction

During delivery of the practical components of this Unit, candidates should understand the importance of ensuring good visibility at all times when operating tools and machinery. Candidates should also know to adhere to relevant health and safety, sustainability and waste management regulations and legislation relating to both working practices within the construction environment, as well as those specific to any practical task that are requested to carry out (such as emphasising the importance of selecting and using the correct PPE at all times).

Guidance on approaches to assessment for this Unit

Opportunities for integrated assessment of this Unit may be possible with all mandatory Units in Construction at SCQF level 5 (G8H4 45).

Underpinning knowledge of installing textile floorcoverings should be assessed before any practical assignments are carried out by candidates. This will include assessment of the ability to select the correct equipment and techniques for a specified task. Assessment of practical performance should take place under supervised conditions and confirm that candidates can lay textile floorcoverings using the correct techniques and accessories, whilst adhering to health and safety, sustainability and waste management regulations and legislation.

For Outcome 1, candidates may be assessed by centres setting a series of technical or theoretical questions. Any oral responses given by candidates may be recorded by an observer by an appropriate method when carrying out any practical assignments.

Outcomes 2 and 3 may be assessed by a series of appropriate practical assignments carried out under supervised conditions, and recorded via an observation checklist. Practical assignments undertaken will be assessed according to candidates' abilities to carry out tasks safely, and where appropriate, using machinery in accordance with manufacturer guidelines.

Adherence to appropriate health and safety, sustainability and waste management regulations and legislation should be adhered to during any practical work.

Part of the assessment for this Unit may include written product evidence such as a works checklist or completed health and safety assessment form. Written and/or oral evidence of knowledge and understanding may be demonstrated during practical assignments and noted at the time.

Opportunities for the use of e-assessment

E-assessment may be appropriate for some assessments in this Unit. By e-assessment we mean assessment which is supported by Information and Communication Technology (ICT), such as e-testing or the use of e-portfolios or e-checklists. Centres which wish to use e-assessment must ensure that the national standard is applied to all candidate evidence and that conditions of assessment as specified in the Evidence Requirements are met, regardless of the mode of gathering evidence. Further advice is available in *SQA Guidelines on Online Assessment for Further Education (AA1641, March 2003)*, *SQA Guidelines on e-assessment for Schools (BD2625, June 2005)*.

Unit title: Textile Floorcoverings: An Introduction

Opportunities for developing Core Skills

Components of the Core Skill of *Problem Solving* at SCQF level 4, Critical Thinking and Planning and Organising, may be developed as candidates undertake this Unit. Candidates will need to take account of a range of factors in order to work efficiently and safely, such as the interpretation of drawings, choice of tools and appropriate materials, application of scientific principles, risk assessments, health, safety and welfare and a sustainable approach. Individual discussions with tutors may enhance the evaluation of productive work practices.

There are opportunities to develop the Core Skill of *Working with Others* at SCQF level 4, particularly in Outcomes 2 and 3, as these practical assessments should ideally be carried out in pairs or teams. Candidates can agree responsibilities and provide support and information to each other during the practical group activities.

There are opportunities for candidates to develop the Core Skill of *Information and Communication Technology* at SCQF level 3 by researching health and safety legislation affecting their area of work, manufacturer's instructions and specifications, and through interpretation of drawings.

There are opportunities for candidates to develop the Core Skill of *Numeracy* at SCQF level 4 could be enhanced through the knowledge evidence in the calculation of materials and equipment and measuring scales.

There are opportunities for candidates to develop the Core Skill of *Communication* at SCQF level 4. As candidates complete practical tasks they need to communicate effectively with others using the correct terminology, tone and style suited to the workplace.

This Unit has the Critical Thinking and Planning and Organising components of Problem Solving embedded in it. This means that when candidates achieve the Unit, their Core Skills profile will also be updated to show they have achieved Critical Thinking at SCQF level 5 and Planning and Organising at SCQF level 5.

Disabled candidates and/or those with additional support needs

The additional support needs of individual candidates should be taken into account when planning learning experiences, selecting assessment instruments, or considering whether any reasonable adjustments may be required. Further advice can be found on our website www.sqa.org.uk/assessmentarrangements

General information for learners

Unit title: Textile Floorcoverings: An Introduction

This Unit is at Scottish Credit and Qualification Framework (SCQF level 5) and is 1 National Unit Credit.

This Unit will develop your skills and knowledge in the installation of textile floorcoverings. This Unit is designed to competently work with tools and equipment to install textile floorcoverings to apply these skills in the workplace.

The Unit will prepare you for formal assessment by developing your practical skills. The practical exercises used when studying the Unit, will also give you an awareness of the standards that you will be required to meet. Your Lecturer/Assessor will provide you with feedback on your work and this will be recorded in your portfolio.

This Unit is suitable if you are working towards a Modern Apprenticeship in the Construction Craft Occupations suite or wish to obtain a basic knowledge of the preparation of surfaces as an interest subject.

To successfully achieve this Unit, you must successfully complete all practical assessments to the standards and tolerances outlined by your Lecturer/Assessor. The standards you need to achieve will be fully explained during your training and prior to assessment.

There is no formal certification of Core Skills within this Unit, however there may be opportunities to develop the following Core Skills:

- ◆ Problem Solving at SCQF level 4
- ◆ Working with others at SCQF level 4
- ◆ ICT at SCQF level 3
- ◆ Numeracy at SCQF level 4
- ◆ Communications at SCQF level 4

There are three Outcomes of study within this Unit:

- 1 Identify terminology and construction practices used in the installation of textile floorcoverings
- 2 Prepare area for the installation of textile floorcoverings
- 3 Install textile floorcoverings to work area
