

Chemistry in Society (National 4)

SCQF: level 4 (6 SCQF credit points)

Unit code: H21L 74

Unit outline

The general aim of this Unit is to develop skills of scientific inquiry, investigation, analytical thinking and knowledge and understanding of chemistry in society. Learners will apply these skills when considering the applications of chemistry in society on our lives, as well as the implications on the environment/society. This can be done using a variety of approaches, including investigation and problem solving.

The Unit covers the key areas of metals and alloys, materials, fertilisers, nuclear chemistry and chemical analysis. Learners will research issues, apply scientific skills and communicate information related to their findings, which will develop skills of scientific literacy.

Learners who complete this Unit will be able to:

- 1 Apply skills of scientific inquiry and draw on knowledge and understanding of the key areas of this Unit to carry out an experiment
- 2 Draw on knowledge and understanding of the key areas of this Unit and apply scientific skills

This Unit is a mandatory Unit of the National 4 Chemistry Course and is also available as a free-standing Unit. The Unit Specification should be read in conjunction with the *Unit Support Notes*, which provide advice and guidance on delivery, assessment approaches and development of skills for learning, skills for life and skills for work. Exemplification of the standards in this Unit is given in *Unit Assessment Support*.

The *Added Value Unit Specification* for the National 4 Chemistry Course gives further mandatory information on Course coverage for learners taking this Unit as part of the National 4 Chemistry Course.

Recommended entry

Entry to this Unit is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by one or more of the following or equivalent qualifications and/or experience:

- ◆ National 3 Chemistry Course or relevant component Units

There may also be progression from National 3 Biology, National 3 Environmental Science, National 3 Physics, or National 3 Science Courses.

In terms of prior learning and experience, relevant experiences and outcomes may also provide an appropriate basis for doing this Unit.

Equality and inclusion

This Unit Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information, please refer to the *Unit Support Notes*.

Standards

Outcomes and Assessment Standards

Outcome 1

The learner will:

- 1 Apply skills of scientific inquiry and draw on knowledge and understanding of the key areas of this Unit to carry out an experiment by:**
 - 1.1 Planning an experiment
 - 1.2 Following procedures safely
 - 1.3 Making and recording observations/measurements correctly
 - 1.4 Presenting results in an appropriate format
 - 1.5 Drawing valid conclusions
 - 1.6 Evaluating experimental procedures

Outcome 2

The learner will:

- 2 Draw on knowledge and understanding of the key areas of this Unit and apply scientific skills by:**
 - 2.1 Making accurate statements
 - 2.2 Solving problems

Evidence Requirements for the Unit

Assessors should use their professional judgement, subject knowledge and experience, and understanding of their learners, to determine the most appropriate ways to generate evidence and the conditions and contexts in which they are used.

The key areas covered in this Unit are:

- ◆ **metals and alloys**
- ◆ **materials**
- ◆ **fertilisers**
- ◆ **nuclear chemistry**
- ◆ **chemical analysis**

Evidence can be drawn from a variety of sources and presented in a variety of formats. The table below describes the evidence for the Assessment Standards which require exemplification. Evidence may be presented for individual Outcomes or gathered for the Unit as a whole, through combining assessment holistically in a single activity. If the latter approach is used, it must be clear how the evidence covers each Outcome.

Assessment Standard	Evidence required
Planning an experiment	The plan should include: <ul style="list-style-type: none"> ◆ an aim ◆ a variable to be kept constant ◆ measurements/observations to be made ◆ the resources ◆ the method, including safety considerations
Following procedures safely	A checklist
Making and recording observations/measurements correctly	Observations/measurements with units used appropriately
Presenting results in an appropriate format	One format from: table, graph, chart, key, diagram, flow chart, or other appropriate format
Drawing a valid conclusion	Include reference to the aim
Evaluating experimental procedures	Suggest an improvement
Making accurate statements	At least half of the statements should be correct across the key areas of each Unit.
Solving problems	<p>One of each problem-solving skill:</p> <ul style="list-style-type: none"> ◆ making generalisations/predictions ◆ selecting information ◆ processing information, including calculations, as appropriate <p>Making accurate statements and solving problems may be combined into one holistic assessment, with marks allocated to each question. In this case, to achieve Outcome 2, the candidate must achieve at least 50% of the marks available in the assessment.</p>

Transfer of Evidence

Evidence for the achievement of Outcome 1 and Assessment Standard 2.2 for this Unit can be used as evidence of the achievement of Outcome 1 and Assessment Standard 2.2 in the *Nature's Chemistry* and *Chemical Changes and Structure* Units of this Course.

Exemplification of assessment is provided in *Unit Assessment Support*. Advice and guidance on possible approaches to assessment is provided in the *Unit Support Notes*.

Development of skills for learning, skills for life and skills for work

It is expected that learners will develop broad, generic skills through this Unit. The skills that learners will be expected to improve on and develop through the Unit are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and drawn from the main skills areas listed below. These must be built into the Unit where there are appropriate opportunities.

2 Numeracy

- 2.1 Number processes
- 2.2 Money, time and measurement
- 2.3 Information handling

4 Employability, enterprise and citizenship

- 4.6 Citizenship

5 Thinking skills

- 5.3 Applying
- 5.4 Analysing and evaluating

Amplification of these is given in SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work*. The level of these skills should be at the same SCQF level of the Unit and be consistent with the SCQF level descriptor. Further information on building in skills for learning, skills for life and skills for work is given in the *Unit Support Notes*.

Administrative information

Published: April 2018 (version 2.0)

Superclass: RD

History of changes to National Unit Specification

Version	Description of change	Authorised by	Date
1.1	Standards section: change to wording in Assessment Standard 1.2 to clarify meaning; 'accurately' replaced with 'correctly'; Evidence Requirements section: wording added/changed to clarify Evidence Requirements	Qualification Development Manager	June 2013
2.0	<ul style="list-style-type: none">◆ Assessment Standards 2.2 and 2.3 have been removed.◆ Assessment Standard 2.4, solving problems, has been renumbered as Assessment Standard 2.2.◆ Evidence required for Assessment Standards 1.2 and 1.3 included.	Qualifications Manager	April 2018
