

National unit specification

General information

Unit title: Dental Removable Appliances: an Introduction
(SCQF level 6)

Unit code: HK6A 46

Superclass: PF

Publication date: April 2017

Source: Scottish Qualifications Authority

Version: 01

Unit purpose

This unit has been designed to develop the learner's knowledge, understanding and practical skills in the production and modification of dental removable appliances.

Learners will examine the content and purposes of dental prescriptions, producing and modifying dental removable appliances to the given prescription whilst ensuring that safe working practices are applied throughout.

This is an introductory unit, mandatory within the National Certificate in Dental Technology at SCQF level 6, so is appropriate for trainee dental technicians.

Outcomes

On successful completion of the unit the learner will be able to:

- 1 Outline the key aspects of a dental prescription.
- 2 Produce dental removable appliances to a given prescription ensuring safe working practices at all times.
- 3 Modify dental removable appliances to a given prescription ensuring safe working practices at all times.

Credit points and level

2 National unit credits at SCQF level 6: (12 SCQF credit points at SCQF level 6)

National unit specification: General information (cont)

Unit title: Dental Removable Appliances: an Introduction
(SCQF level 6)

Recommended entry to the unit

Access to this unit is at the discretion of the centre. It would be helpful if learners had successfully completed or be working towards the unit *Dental Care Professionals: Fitness to Practice*.

Core Skills

Opportunities to develop aspects of Core Skills are highlighted in the support notes for this unit specification.

There is no automatic certification of Core Skills or Core Skill components in this unit.

Context for delivery

If this unit is delivered as part of a group award, it is recommended that it should be taught and assessed within the subject area of the group award to which it contributes.

Equality and inclusion

This unit specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence.

Further advice can be found on our website www.sqa.org.uk/assessmentarrangements.

National unit specification: Statement of standards

Unit title: Dental Removable Appliances: an Introduction
(SCQF level 6)

Acceptable performance in this unit will be the satisfactory achievement of the standards set out in this part of the unit specification. All sections of the statement of standards are mandatory and cannot be altered without reference to SQA.

Outcome 1

Outline the key aspects of a dental prescription.

Performance criteria

- (a) Describe the range of purposes of a dental prescription.
- (b) Identify the key details required on a dental prescription.

Outcome 2

Produce dental removable appliances to a given prescription ensuring safe working practices at all times.

Performance criteria

- (a) Manufacture one complete upper denture to the given prescription ensuring safe working practices are maintained.
- (b) Manufacture one removable orthodontic appliance to the given prescription ensuring safe working practices are maintained.
- (c) Accurately assess the quality of the complete upper denture and removable orthodontic appliance produced.

Outcome 3

Modify dental removable appliances to a given prescription ensuring safe working practices at all times.

Performance criteria

- (a) Modify one complete upper denture to the given prescription ensuring safe working practices.
- (b) Modify one removable orthodontic appliance to the given prescription ensuring safe working practices.
- (c) Accurately assess the quality of the modified complete upper denture and removable orthodontic appliance.

National unit specification: Statement of standards (cont)

Unit title: Dental Removable Appliances: an Introduction
(SCQF level 6)

Evidence Requirements for this unit

Evidence is required to demonstrate that learners have achieved all outcomes and performance criteria.

Learners should be presented with real or simulated projects and given a clear brief to ensure that they have the opportunity to achieve all the performance criteria.

Evidence must be provided to show that learners can demonstrate their understanding of information, materials, terminology practices and techniques related to the production and modification of dental removable appliances. Evidence must also be provided to show that learners can apply relevant knowledge and skills in a practical context.

Learners will be required to demonstrate safe working practices, including infection prevention and control during the practical aspects of delivery and assessment of this unit.

For **Outcome 1**, learners must provide evidence of the following in closed-book conditions:

- ◆ Description of a minimum of three purposes of a dental prescription
- ◆ Identify the six key details required on a prescription as stated by the regulatory body, Medicines and Healthcare Products Regulatory Agency (MHRA)

Outcome 2

Evidence must be produced under supervised conditions to show that learners can produce and accurately assess the quality of one complete upper denture and one removable orthodontic appliance to the given prescription ensuring the following:

Complete upper denture

- ◆ Correct tooth positioning is achieved
- ◆ Correct labial and buccal contour is achieved
- ◆ Correct thickness and extension of denture base is achieved
- ◆ Safe use of equipment, use of Personal Protective Equipment (PPE), cleanliness and tidiness
- ◆ Accurate completion of a quality checklist

Removable orthodontic appliance

- ◆ Correct position of components is achieved
- ◆ Correct coverage of the base is achieved
- ◆ Safe use of equipment, use of Personal Protective Equipment (PPE), cleanliness and tidiness
- ◆ Accurate completion of a quality checklist

National unit specification: Statement of standards (cont)

Unit title: Dental Removable Appliances: an Introduction
(SCQF level 6)

Outcome 3

Product evidence must be produced under supervised conditions to show that learners can modify and accurately assess the quality of one complete upper denture and one removable orthodontic appliance to the given prescription ensuring the following:

Complete upper denture

- ◆ Correct tooth positioning is restored to original quality
- ◆ Correct labial and buccal contour is restored to original quality
- ◆ Correct thickness and extension of denture base is restored to original quality
- ◆ Safe use of equipment, use of Personal Protective Equipment (PPE), cleanliness and tidiness
- ◆ Accurate completion of a quality checklist

Removable orthodontic appliance

- ◆ Correct position of components is restored to original quality
- ◆ Correct coverage of the base is restored to original quality
- ◆ Safe use of equipment, use of Personal Protective Equipment (PPE), cleanliness and tidiness
- ◆ Accurate completion of a quality checklist

National unit support notes

Unit title: Dental Removable Appliances: an Introduction
(SCQF level 6)

Unit support notes are offered as guidance and are not mandatory.

While the exact time allocated to this unit is at the discretion of the centre, the notional design length is 80 hours.

Guidance on the content and context for this unit

This introductory unit forms part of the NC in Dental Technology at SCQF level 6. This unit will develop the learner's knowledge, understanding and practical skills in the construction and modification of Dental Removable Appliances.

Where this unit is delivered as part of a national course, due to the holistic nature of course delivery, it would be beneficial if learners had completed or be working towards other relevant units.

Outcome 1 provides learners with the underpinning knowledge of the prescription requirements for producing Dental Removable Appliances as stated by the regulatory body Medicines and Healthcare Products Regulatory Agency (MHRA).

- ◆ The name and address of the manufacturer.
- ◆ Data allowing identification of the device in question.
- ◆ A statement that the device is intended for exclusive use by a particular patient, together with the name of the patient.
- ◆ The name of the medical practitioner or the authorised person who made out the prescription and, where applicable, the name of the clinic concerned.
- ◆ The specific characteristics of the product as indicated by the prescription.
- ◆ A statement that the device in question conforms to the essential requirements of custom-made devices and, where applicable, indicating which essential requirements have not been fully met, together with the grounds.

Broader learning should include the reasons prescriptions are issued, including new appliances and modifying/repairing existing appliances. The costs of carrying out required work should be explored as this provides valuable context for the workplace. Learners could be signposted to current industry laboratory pricelists.

The completion of Outcome 1 will prepare learners for the practical activities in Outcomes 2 and 3. The importance of maintaining safe working practices and infection prevention and control should be emphasised during these outcomes, centres must ensure that learners are aware of Safe Working signs and manufacturer's instructions and have access to all necessary health and safety resources, eg PPE; facemasks, laboratory coat, eye protection and gloves.

National unit support notes (cont)

Unit title: Dental Removable Appliances: an Introduction
(SCQF level 6)

Outcome 2 is practical and provides learners with the opportunity to develop their skills in constructing and assessing the quality of Dental Removable Appliances. Learners should be provided with a prescription on which to base their work and a quality checklist to complete upon completion of the appliances.

Outcome 3 is practical and provides learners with the opportunity to develop their skills in modifying and assessing the quality of Dental Removable Appliances. Learners should be provided with a prescription on which to base their work and a quality checklist to complete upon completion of the appliances.

Guidance on approaches to delivery of this unit

The learning and teaching of the production and modification of dental removable appliances is most effective when set in a relevant context, eg by making reference to the applications of the appliances in real life situations. Due to the holistic nature of course delivery, there is scope for integration with other units.

Learning and teaching approaches should include lectures, practical demonstrations, group work and individual exercises. The practical work can be reinforced from, eg moodle and worksheets. Resources used could include examples of removable appliances and audio visual material.

Broader informal discussions may be incorporated to clarify difficulties and it may be beneficial to discuss emerging technologies and industry constraints, eg timescales, costs, etc.

Guidance on approaches to assessment of this unit

Evidence can be generated using different types of assessment. The following are suggestions only. There may be other methods that would be more suitable to learners.

Centres are reminded that prior verification of centre-devised assessments would help to ensure that the national standard is being met. Where learners experience a range of assessment methods, this helps them to develop different skills that should be transferable to work or further and higher education.

An appropriate assessment method for Outcome 1 is a range of short answer or restricted response questions set under closed-book conditions. This could be paper based assessment or e-assessment and allows for integration of assessment of knowledge from other relevant units.

Outcomes 2 and 3 may be assessed via observation of practice (including safe working) using an observation checklist, and the submission of quality assurance checklists with the final products constructed.

Use of observation will allow centre staff to verify that products produced are the learners own work and authenticate evidence.

National unit support notes (cont)

Unit title: Dental Removable Appliances: an Introduction
(SCQF level 6)

Opportunities for e-assessment

E-assessment may be appropriate for some assessments in this unit, particularly Outcome 1. By e-assessment we mean assessment which is supported by Information and Communication Technology (ICT), such as e-testing or the use of e-portfolios or social software. Centres which wish to use e-assessment must ensure that the national standard is applied to all learner evidence and that conditions of assessment as specified in the Evidence Requirements are met, regardless of the mode of gathering evidence. The most up-to-date guidance on the use of e-assessment to support SQA's qualifications is available at www.sqa.org.uk/e-assessment.

Opportunities for developing Core and other essential skills

There will be opportunities to develop aspects of the Core Skills in *Communication* (Oral and Written skills) and *Information and Communication Technology (ICT)* (Accessing Information), *Numeracy* (Graphical Information, Using Number — Measuring and Calculation), *Working with Others* (Working Co-operatively with Others) and *Problem Solving* (Critical Thinking) throughout this unit.

There may also be opportunities to develop broader transferable skills which contribute to employability:

- ◆ Time management and organisational skills — through working to deadlines, punctuality, record keeping
- ◆ Sustainability — through consideration of the use of resources, recycling and waste
- ◆ Specific technical skills — through preparing, handling, producing and assessing dental removable appliances
- ◆ Interpersonal skills such as listening, teamwork and study skills
- ◆ Personal development, eg self-confidence and self-motivation

General information for learners

Unit title: Dental Removable Appliances: an Introduction (SCQF level 6)

This section will help you decide whether this is the unit for you by explaining what the unit is about, what you should know or be able to do before you start, what you will need to do during the unit and opportunities for further learning and employment.

This unit has been designed to develop knowledge, understanding and practical skills in the production and modification of dental removable appliances and is suitable for trainee Dental Technicians.

It is an introductory unit which forms part of the NC in Dental Technology.

If you undertake this unit, you will learn about dental prescriptions and the information you need to construct and modify complete upper dentures and removable orthodontic appliances, to the specification and quality required whilst ensuring safe working practices are applied throughout.

There are three outcomes to complete:

- 1 Outline the key aspects of a dental prescription.
- 2 Produce dental removable appliances to a given prescription ensuring safe working practices at all times.
- 3 Modify dental removable appliances to a given prescription ensuring safe working practices at all times.

Assessment methods are varied and may include set question papers and observation of your practice.

There will be opportunities to develop aspects of the Core Skills in *Communication* (Oral and Written skills) and *Information and Communication Technology (ICT)* (Accessing Information), *Numeracy* (Graphical Information, Using Number — Measuring and Calculation), *Working with Others* (Working Co-operatively with Others) and *Problem Solving* (Critical Thinking) throughout this unit.

There may also be opportunities to develop your broader transferable skills which contribute to employability:

- ◆ Time management and organisational skills — through working to deadlines, punctuality, record keeping
- ◆ Sustainability — through consideration of the use of resources, recycling and waste
- ◆ Specific technical skills — through preparing, handling, producing and assessing dental removable appliances
- ◆ Interpersonal skills such as listening, teamwork and study skills
- ◆ Personal development, eg self-confidence and self-motivation
