XSQA

SCQF level 5 Unit Specification

Practical Metalworking: Bench Skills

SCQF: level 5 (6 SCQF credit points)

Unit code: J2CR 75

Unit outline

The general aim of this Unit is to help learners develop a range of metalworking hand tool skills including bench-fitting work, sheet-metal work, and measuring and marking out. The ability to read and interpret drawings and diagrams is also developed in this Unit. Learners will also develop their knowledge and understanding of metalworking materials, recycling and sustainability issues, as well as an appreciation of safe working practices in a workshop environment.

Learners who complete this Unit will be able to:

- 1 Prepare for metalwork bench tasks
- 2 Use a range of marking out tools and hand tools
- 3 Manufacture metalwork products from working drawings using bench-fitting skills

This Unit available as a free-standing Unit. The Unit Specification should be read in conjunction with the *Unit Support Notes*, which provide advice and guidance on delivery, assessment approaches and development of skills for learning, skills for life and skills for work. Exemplification of the standards in this Unit is given in the *Unit Assessment Support*.

Recommended entry

Entry to this Unit is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by the following or equivalent qualifications and/or experience:

National 4 Practical Metalworking Course or relevant Units

Equality and inclusion

This Unit Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information, please refer to the *Unit Support Notes*.

Standards

Outcomes and assessment standards

Outcome 1

The learner will:

1 Prepare for metalwork bench tasks by:

- 1.1 Selecting metalworking tools, equipment and materials appropriate for tasks
- 1.2 Confirming that metalworking tools and equipment are in good condition and safe working order before, during and after use
- 1.3 Adjusting tools where necessary, following safe working practices
- 1.4 Using correct names and terminology when referring to common metalworking tools, equipment, materials and processes

Outcome 2

The learner will:

2 Use a range of marking out tools and hand tools by:

- 2.1 Creating and using datum marks
- 2.2 Marking out components or workpieces in accordance with working drawings and with five functional and two linear sizes to within specified tolerances
- 2.3 Using a minimum of six fitting tools, three sheet-metal tools and three measuring tools
- 2.4 Cutting, shaping, forming and fitting metal components using sections and sheet materials
- 2.5 Using tools safely and correctly

Outcome 3

The learner will:

3 Manufacture metalwork products from working drawings using bench fitting skills by:

- 3.1 Checking materials supplied against working drawings
- 3.2 Manufacturing metalwork products with three functional and two linear sizes within specified tolerances in fitting work, sheet-metal work and bending
- 3.3 Working in accordance with recognised procedures and safe working practices
- 3.4 Carrying out good practice in terms of sustainability and recycling

Evidence Requirements for the Unit

Assessors should use their professional judgement, subject knowledge and experience, and understanding of their learners, to determine the most appropriate ways to generate evidence and the conditions and contexts in which they are used.

Evidence may be presented for individual Outcomes, or gathered for the Unit. If the latter approach is used, it must be clear how the evidence covers each Outcome.

For this Unit, learners will be required to provide evidence of:

- knowledge and understanding of a range of practical metalworking tools, metals and materials
- practical skills in bench-fitting work, basic sheet-metal work and measuring and marking out
- knowledge and understanding of sustainability issues and good practice in recycling in practical metalworking activities and environments
- the ability to work in accordance with recognised procedures and safe working practices

Learners will be expected to produce items from sheet-metal and by using bench fitting skills.

It is assumed that assemblies in this Unit are readily portable. The specified tolerances referred to in the Assessment Standards are:

Operation	Tolerance
Marking out	±0.5mm
Fitting work	±0.5mm
Sheet metal work	±1mm
Bending work	±2 mm
Functional sizes	±0.5mm on linear

The tolerances are also given assuming that available machinery and equipment can reasonably meet these expectations.

Exemplification of assessment for this Unit is provided in the *Unit Assessment Support*. Advice and guidance on possible approaches to assessment is provided in the *Unit Support Notes*.

Assessment standard thresholds

If a candidate successfully meets the requirements of the specified number of Assessment Standards they will be judged to have passed the Unit overall and no further re-assessment will be required.

The specific requirements for this Unit is as follows:

• 9 out of 13 Assessment Standards must be achieved.

It should be noted that there will still be the requirement for candidates to be given the opportunity to meet all Assessment Standards. The above threshold has been put in place to reduce the volume of re-assessment where that is required.

Development of skills for learning, skills for life and skills for work

It is expected that learners will develop broad, generic skills through this Unit. The skills that learners will be expected to improve on and develop through the Unit are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and drawn from the main skills areas listed below. These must be built into the Unit where there are appropriate opportunities.

- 2 Numeracy
- 2.2 Money, time and measurement
- 4 Employability, enterprise and citizenship
- 4.3 Working with others
- 5 Thinking skills
- 5.3 Applying
- 5.4 Creating

Amplification of these is given in SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work.* The level of these skills should be at the same SCQF level of the Unit and be consistent with the SCQF level descriptor. Further information on building in skills for learning, skills for life and skills for work is given in the *Unit Support Notes*.

Appendix: Unit support notes Introduction

These support notes are not mandatory. They provide advice and guidance on approaches to delivering and assessing this Unit. They are intended for teachers and lecturers who are delivering this Unit. They should be read in conjunction with:

- ♦ the Unit Specification
- the Unit Assessment Support packs

Developing skills, knowledge and understanding

Teachers and lecturers are free to select the skills, knowledge, understanding and contexts which are most appropriate for delivery in their centres.

Approaches to learning, teaching and assessment

For Outcome 3, learners must produce metalwork products from working drawings using bench fitting tools. It may be possible to produce evidence of marking out skills for Outcome 2 at the same time.

Application of the knowledge, processes and skills related to the following, as				
appropriate: Measuring and marking out	Tools and equipment: scriber and scribing block steel rule combination set engineer's square centre finder spring dividers calipers (oddleg, inside, outside, and Vernier or digital) micrometer (analogue or digital) centre punch witness marks surface table angle block v-block Knowledge and understanding of: units of measurement: datum, functional dimensions engineer's blue allowances for expansion, bending, stretching, forming, trimming, welding, brazing and soldering			
Reading and interpreting drawings and documents	Working drawings, pictorial drawings, diagrams, cutting lists. Knowledge and understanding of orthographic projection, scale, dimensioning (linear, radial angular dimensions and diameter) and basic drawing conventions including: line types, centre lines and hidden detail.			
Materials	 Knowledge of a variety of common metalworking materials: ferrous metals (steel, high carbon steel, iron) non-ferrous metals (aluminium, copper, nickel) alloys (bronze, brass, stainless steel) common sections (square bar, round bar, hexagonal bar, angle iron, tube) sheet materials (tin plate, copper, brass, steel, aluminium) Common metals associated with different fabrication and joining techniques. 			
Bench work	Common bench tools, including:			

	 hammers (ball-pein) cold chisels files saws taps, dies, tap wrench and die stock for tapping and threading and awareness of twist drill size rivet set and snap 	
Sheet metal tools and machines	 bending equipment including folding bars notchers hide or rubber mallets tin snips pop riveter spot welder formers and jigs (as appropriate) 	
Care and maintenance of tools and equipment	 Knowledge and understanding of: ◆ reporting faults and fault reporting systems ◆ general condition before, during and after use ◆ position and condition of guards ◆ position and security of cutting tools on machine tools ◆ secure holding techniques 	
Safe working practices	Good practices and safe systems for general workshop and individual activities as appropriate. Personal Protective Equipment	
Sustainability and recycling	Best practice in selecting materials appropriate for use. Understanding and following workshop recycling practices and processes.	

Combining assessment within Units

Assessment could be combined in this Unit by holistically assessing all the Outcomes of the Unit in a single assessment. When assessment within the Unit is holistic, teachers and lecturers should take particular care to track the evidence for each individual Outcome.
